IDENTIFIERS Listservs; *Web Sites

ABSTRACT

This book identifies more than 650 Internet and World Wide Web sites across the K-12 curriculum that can benefit teachers who may not have time to carry out lengthy searches themselves. The Web sites in this book are organized alphabetically by the following K-12 subject areas: art, bilingual education, drama, ESL, foreign language, health education and physical education, journalism, language arts, math, music, science, social studies, special education, and vocational and technical education. Within each subject area, the sites are organized into at least one of three categories: lesson plans, other resources, and museums and exhibits. The sites described may include a wide range of materials--lesson plans and pictures that can be printed out, online multimedia presentations for students; interactive games; weekly brain teasers; searchable activities; databases for teachers; contests; pen pal opportunities; forms; downloadable graphics; videos; and other resources that can enrich the K-12 curriculum. Appendix 1 describes Web sites for newsgroups, that allow teachers to read and post messages, as well as listservs through which teachers can subscribe to electronic newsletters. Appendix 2 lists Web sites for information on search tools and Appendix 3 provides some sample forms for evaluating recommended and new Web sites. (AEF)

From the Publisher

The International Society for Technology in Education (ISTE) promotes appropriate uses of technology to support and improve learning, teaching, and administration. As part of that mission, ISTE's goal is to provide individuals and organizations with high-quality and timely information, materials, and services that support technology in education.

Our Books and Courseware Department works with educators to develop and produce classroom-tested materials and resources that support ISTE's mission. We look for content that emphasizes the use of technology where it can make a difference—making the teacher's job easier; saving time; motivating students; helping students with various learning styles, abilities, or backgrounds; and creating learning environments that are new and unique or that would be impossible without technology.

We develop products for students, classroom teachers, lab teachers, technology coordinators, and teacher educators, as well as for parents, administrators, policy makers, and visionaries. All of us face the challenge of keeping up with new technologies and the research about their educational applications while we are learning about and implementing appropriate applications in our teaching/learning situations. Please help us in our efforts to help you by providing feedback about this book and other ISTE products and by giving us your suggestions for further development.

Visit ISTE Online

<http://isteonline.uoregon.edu>

Many ISTE resources are available at no charge via telecommunications. If you have Internet access and World Wide Web navigational software, we invite you to access the ISTE Web page.

The ISTE Web site contains conference information, selections from education reports, ISTE distance education course descriptions, contacts for ISTE Special Interest Groups and Organization Affiliates, and more. Of special interest to educators is ISTE's *Guide to Resources & Services for Technology-Using Educators*, which offers complete information on ISTE services and products. The ISTE Web site provides details on how to obtain a free copy of the *Guide*.

About the Authors

Dr. Vicki F. Sharp, Professor of Elementary Education at California State University, Northridge, is the author of numerous books and articles on topics related to the use of computers in education. Her most recent books include *Computer Education for Teachers*, 2nd edition (Brown & Benchmark, 1995), *HyperStudio 3.0 In One Hour* (International Society for Technology in Education, 1995), *Scribble Scrabble and Other Ready-in-a-Minute Math Games* (McGraw Hill, 1995), and *HyperStudio In One Hour for Windows* (International Society for Technology in Education, 1996). She frequently writes about children's software for magazines such as *MacUser* and serves as a computer consultant and trainer for software publishers and school districts in Southern California. She has co-authored a Web page entitled Web Sites and Resources for Teachers, which covers all curriculum areas. The URL is:

<http://www.csun.edu/~vceed009>

Dr. Martin G. Levine teaches courses in methods of teaching social studies, ESL, and bilingual education at California State University, Northridge. Dr. Levine holds the Bilingual Certificate of Competence and the General Secondary Credential awarded by the State of California. He has taught social studies and English at the secondary level and has published articles in social studies and foreign language journals for teachers. He has authored numerous Web pages covering such topics as foreign language instruction, ESL, and social studies. The URLs for these pages are:

Lesson Plans and Resources for ESL and Bilingual Teachers
<http://www.csun.edu/~hcedu013/eslindex.html>

Foreign Language Study Abroad
<http://www.csun.edu/~hcedu013/LanguageAbroad.html>

Lesson Plans and Resources for Social Studies Teachers
<http://www.csun.edu/~hcedu013/index.html>

Dr. Richard M. Sharp, Professor of Elementary Education at California State University, Northridge, is the author of numerous books and articles on topics related to mathematics. His most recent books include *Scribble Scrabble and Other Ready-in-a-Minute Math Games* (McGraw Hill, 1995) and *The Sneaky Square & Other Math Activities* (McGraw Hill, 1996). He serves as a computer consultant and trainer for software publishers and school districts in Southern California. He has co-authored a Web page entitled Web Sites and Resources for Teachers, which covers all curriculum areas. The URL is:

<http://www.csun.edu/~vceed009>

Acknowledgments

We want to express our special appreciation to Karin Levine for her clear and thorough editing and for her excellent suggestions for improving this book. Karin is a Spanish teacher at Thousand Oaks (California) High School in the Conejo Valley Unified School District. As an avid Web user, she has a home page entitled High School Foreign Exchange and Language Study Programs on the World Wide Web. The URL is:

<http://www.csun.edu/~hcedu013/karin.html>

Equilibrium's DeBabelizer was used to produce the screen shots. You can reach Equilibrium by phone at 415-332-4343 or on the Web at:

<http://www.equilibrium.com>

A very special thanks to David Sharp, my son, for checking out the Web sites; and to Anita Best, Jean Hall, and Ron Renschler for their excellent editorial work, advice, and invaluable assistance and direction. Thanks to Judi Mathis Johnson at ISTE and Susan Dahl at the Fermi National Accelerator Laboratory Lederman Science Center-IRC for their development work on the ISTE forms for evaluating new and recommended Web sites. Thanks also goes to Corinne Tan for her conscientiousness, skill, and diligence in preparing this book for publication.

Introduction

The Internet and the World Wide Web: What Are They?

Currently, the terms *Internet* and *World Wide Web* permeate every facet of our lives. Everywhere we travel we hear people talking about worldwide communication using the Internet. We see it in print in magazines and newspapers, and hear it discussed on television, on talk radio, and in educational circles.

The Internet is a huge, worldwide network of connected computer networks with no single master control-center or authority. The Internet was created for military research purposes in 1969 by the U.S. Department of Defense. The Defense Department's major concern was to ensure mass communication of information and at the same time provide maximum security. Although the Internet has been in existence a long time, until recently it has been very difficult for the general public to access it. Because of this difficulty, only scientists and academics used it. It wasn't until 1989 with the development of the World Wide Web that the general public became heavy users of the Internet.

The World Wide Web is an easy way to navigate the Internet. The Web incorporates text, graphics, and sounds in electronic documents called *home pages* or *Web sites*. Each home page or Web site has its own unique URL, or address. (URL stands for Uniform Resource Locator.) Certain items on the Web pages are underlined. These underlined items are called *links*. The World Wide Web gets its name from these links because they are like threads in a spider's web. By clicking with a mouse on the links, you can jump from one page on the Web to another, be it a page on the same computer or a page on the other side of the world. One document is linked to another, which is linked to another, and so on.

What's on the World Wide Web for Teachers?

There are thousands of useful Web sites for teachers that take advantage of the Web's multimedia capabilities. You can visit a museum, take a lesson in a foreign language, play a math game, explore the human brain, read interactive stories, participate in online polls and discussion groups, listen to music, and download lesson plans.

How Can I Find Things on the World Wide Web?

The World Wide Web provides you with tools to search for resources. These search tools bear names such as Lycos, Infoseek, Alta Vista, Yahoo, and DejaNews. (See Appendix 2 for Web site information on various search tools.) You enter keywords to find lists of sites that may contain the information you are looking for. Another way to find information on the Web is to know the address (the URL) for a site. All Web URLs start with **http://**. As an example, to connect to the home page of the White House, you would type

<http://www.whitehouse.gov/>

How Do I Access the World Wide Web?

To access the Web, you need a connection to the Internet. You can get an Internet connection through a commercial online service. Three popular ones are America Online (800/827-6364), Prodigy (800/776-3449), and CompuServe (800/848-8990). Online services charge a monthly fee, and some also charge a per-hour rate for the time you spend online. If you plan to spend a great deal of time on the Internet, it may be more economical to get an Internet connection through an Internet Service Provider (ISP). Many ISPs charge a flat monthly fee for unlimited Internet access. There are several places you can find an ISP to fit your needs. If you already have access to the Internet through a commercial online service, you can check out a list of providers at

<http://thelist.com/>

Another place to find information is in your local Yellow Pages or from a local computer user group.

What Kind of Computer Hardware and Software Do I Need?

To access the Web effectively, you need a computer running MS-DOS or Windows with at least a 386 processor and 8 MB (megabytes) of RAM, or a Macintosh computer running System 7.0 or higher with at least 8 MB of memory. You will also need a modem. If possible, use a modem with a transfer speed of 28.8 bps. A 14.4 bps modem will work, but it will operate at a much slower speed.

What Is the Purpose of This Book?

The authors have searched the Internet and World Wide Web and identified more than 650 sites across the K–12 curriculum that we feel will benefit busy teachers who may not have time to carry out lengthy searches themselves. We believe that this collection of sites will provide teachers with a good starting place for Internet exploration on their own. Be forewarned that Internet resources come and go. There is no guarantee that all of the sites included will be accessible when you try to open them. You might find that the problem is temporary or that the resource simply may have moved to a different address or disappeared. If your initial effort to visit a specific Web site fails, try again later. Because Web sites are frequently redesigned to take advantage of the latest developments, you may find that some of the graphical displays of Web pages in this book are different from what you see on your monitor.

How Is This Book Organized?

The Web sites in this book are organized alphabetically by the following K–12 subject areas: art, bilingual education, drama, ESL, foreign language, health education and physical education, journalism, language arts, math, music, science, social studies, special education, and vocational and technical education. Within each subject area, the sites are organized into at least one of three categories: lesson plans, other resources, and museums and exhibits.

In addition, Appendix 1 describes Web sites for discussion groups, called *newsgroups*, that allow teachers to read and post messages. These groups are similar to electronic bulletin boards. Appendix 1 also describes mailing lists, or *listservs*, through which teachers can subscribe to electronic newsletters. Appendix 2 lists Web sites for information on search tools. Appendix 3 provides some sample forms for evaluating recommended and new Web sites.

The Web sites mentioned in this book are indexed both alphabetically by title and alphabetically by title within each subject-area category.

What's Included in the Sites?

The sites described for each subject area may include a wide range of material—lesson plans and pictures that can be printed out, online multimedia presentations for students, interactive games, weekly brain teasers, searchable activities, databases for teachers, contests, pen pal opportunities, forms, downloadable graphics, videos, and many other resources that can enrich the K–12 curriculum. The descriptions of the sites usually indicate whether the sites are for teachers or students, as well as the grade levels for which the site material is intended.

What Were the Criteria for Selecting the Sites?

Because anyone with access to the Web can rather easily establish a Web site, there are many so-called educational Web sites that contain very little useful information, even though they may be very visually appealing. Furthermore, many sites with good information contain graphics that take too long to download to your computer and therefore tax the attention span of both adults and students who are accustomed fast-paced forms of media. Many sites are poorly constructed with hard-to-read screens, inactive or missing links, and distracting graphics. In selecting sites to include in this book, we considered how appropriate, relevant, and useful the sites would be for teaching and enhancing the K–12 curriculum.

The two evaluation forms in Appendix 3 offer some criteria for evaluating educational Web sites. The first form, Educational Web Sites Recommended by Others, will help you evaluate sites described in this book for use in your own classroom. The second form, Educational Web Sites You Discover, will help you evaluate new sites you encounter in your Web travels.

Keep Us Up to Date

If you have comments or wish to add some of your favorite Web sites to the next edition of this book, please let us know. The e-mail address is:

vicki.sharp@huey.csun.edu

Getting Started

To take advantage of the Web, you need a software program called a *browser*. Currently Netscape 2.0 is the most popular browser. The following instructions tell you how to enter an URL to display a home page. First, launch Netscape. You will then see a toolbar at the top of its window. The toolbar has commands such as **Print**, **Back**, and **Open**. Now follow these steps.

1. Click **Open**.

2. Type the following URL in the dialog box:
`http://www.csun.edu/~vceed009`
3. Click **Open**.

4. After a few seconds, the home page corresponding to the URL will appear.

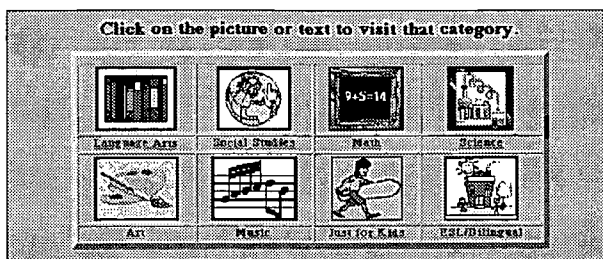

5. Wait until the page is fully loaded on your screen. Check for the following message at the bottom of the screen: Document: Done.

6. You are now ready to explore *links*, or connections, to other Web pages. Links are words that are underlined or displayed in a different color, or are pictures that have a colored border around them.
7. Click on a word link

or picture link.

Note: When you click on a live link, the pointer (or arrow) becomes a hand.

All Web pages displayed in this book were opened using Netscape. Others browsers work in a similar way, although the display of the home page on your monitor may look different.

Tips for Netscape Users

1. When you type a URL in the open location box, you can omit the `http://` part of the URL and it will still work. You can also omit the slash at the end of the URL.
2. Use the Back button to return to the previous site or page.
3. If you cannot open a site with a given URL, use a search tool such as InfoSeek or Yahoo. Type in the name of the site, and the program will produce a listing of sites with that name.
4. When you find a site you like, be sure to place it in your bookmarks so that you can easily retrieve it. (Under the **Bookmarks** menu, select **Add Bookmark**. The site will now be listed under the **Bookmarks** menu. Anytime you select it, Netscape will take you to the site.)
5. To copy or save a graphic, hold down on the mouse button until a menu appears. Slide the mouse up or down to select the option you want. Be sure to use the contact information on the Web page to request permission to use a graphic, and credit the source if you use it. Look for Web sites that give users permission to use the graphics for noncommercial purposes.

Art

Beyond the Frame

<http://educate.si.edu/currkits/beyond/artkit.html>

Beyond the Frame is a curriculum guide focusing on eight works of art from Smithsonian museums. The guide contains eight lesson plans, 40 activities, handout sheets for students, and full-color foldouts. It is designed for middle and secondary school teachers and is available for \$5.00 from the Smithsonian Institution. For a sample lesson, click on Double Portrait of the Artist in Time.

ERIC Art Gopher Menu

gopher://ericir.syr.edu:3000/7?art

ERIC Art Gopher Menu features hundreds of lessons and ideas for art education in grades K–12. Teachers can explore resources for teaching art appreciation, squiggle art, mask-making, and lessons on famous artists, including Marc Chagall and Vincent Van Gogh.

Fascinating Folds

<http://www.csz.com/paper/>

Fascinating Folds, for grades 4–12, is an online tutorial with instructions for making an origami paper swan. Click on Teacher's Corner at the bottom of the page to find additional resources. These include Teacher's Connection for links to other sites and information on obtaining a Teacher's Information Kit, which includes a free lesson plan.

Favorite Lessons

<http://www.in.net/~kenroar/lessons.html>

Favorite Lessons features plans and activities for grades K–12. Click on a category to find a step-by-step explanation for a variety of topics, including Matisse Face Masterpiece, Table Murals, Monster Transformation, Masks and More Masks, and Too Loose Posters. The site also includes a form for submitting your favorite lesson.

Jasper's Guide to Paperfolding Instructions on the Web

<http://web.mit.edu/jasper/www/origami/tutorial/techniques.html>

Jasper's Guide to Paperfolding Instructions on the Web, for grades 4–12, is a tutorial illustrating how to make origami models by repeating certain folds. The guide presents step-by-step instructions showing how to construct a fold the user has selected.

New ERIC Art Gopher Menu

gopher://ericir.syr.edu:70/11/Lesson/NewLesson/Art

New ERIC Art Gopher Menu, for grades K–12, provides a collection of art projects, lesson plans, and activities. Projects and activities include making apple dolls, creating comic strips, formulating dyes from plants, constructing musical instruments, and meeting the masters.

STEM~Net Gopher Menu

gopher://info.stemnet.nf.ca:70/00/k-12/prim/Lesson%20Plans%20and%20Curriculum%20Units/Art-line

STEM~Net Gopher Menu contains art appreciation activities for grades K–12. Kids can learn how to create “Cray-Pas”-Van Gogh, line collage, string painting, and art posters.

Using Art to Teach Science

gopher://spacelink.msfc.nasa.gov:70/00/Instructional.Materials/Curriculum.Materials/Art/Using.Art.to.Teach.Science.K-12

Using Art to Teach Science features a series of lesson plans that integrate art projects with science in the K–12 curriculum.

Vid Kids Lesson Plans

<http://cmp1.ucr.edu/exhibitions/education/vidkids/lessons.html>

Vid Kids Lesson Plans are classroom activities for teaching students in grades 4–6 the art and science concepts involved in taking and making moving pictures. There are many unique activities that emphasize sight, motion, time, and space.

Getty's ArtsEdNet

<http://www.artsednet.getty.edu/ArtsEdNet/>

Getty's ArtsEdNet is an online arts education service for grades K–12 sponsored by the Getty Center for Education in the Arts. The site includes online exhibits, the latest trends in art education, lesson plans, and other curriculum resources.

Joseph Wu's Origamis

<http://www.cs.ubc.ca/spider/jwu/origami.html>

Joseph Wu's Origamis is the ultimate origami site, with extensive resources and information for K–12 teachers.

Kennedy Center's ArtsEdge

<http://artsedge.kennedy-center.org/>

Kennedy Center's ArtsEdge provides a forum where teachers and students can share information and ideas that support the arts in the K-12 curriculum.

Visa Olympics of the Imagination

<http://www.enw.com/visakids/>

Visa Olympics of the Imagination is a worldwide art contest that challenges kids of ages 11 to 13 to draw or paint their own Olympic sport of the future. The site includes information on how kids can enter the contest, artwork from past winners, and an entry form. Scroll and click on Teacher's Guide for suggested activities for teachers and students.

World Art Treasures WWW Server

<http://sgwww.epfl.ch/BERGER/index.html>

World Art Treasures WWW Server, sponsored by the Jacques-Edouard Berger Foundation, presents a series of six online art programs. These include art from Egypt, China, Japan, India, Myanmar/Burma, Laos, Cambodia, and Thailand. Others include the works of Sandro Botticelli and the Renaissance.

Yahoo Arts: Art History: Artists

http://www.yahoo.com/Arts/Art_History/Artists/

Yahoo Arts: Art History: Artists is a Yahoo Index with links to information on the lives and works of famous artists from around the world.

Art and History: Virtual Forum of Mexican Culture

<http://www.arts-history.mx/index2.html>

Art and Art History: Virtual Forum of Mexican Culture features anthropology, contemporary art, dance, photography, literature, and museums. A Spanish version is available.

Arta Gallery, Jerusalem

<http://www.macom.co.il/arta/>

Arta Gallery, Jerusalem, displays online replicas of Marc Chagall's artwork.

ArtServe

<http://rubens.anu.edu.au/>

ArtServe, from the Australian National University, is an extensive online display of 16,000 art and architecture images from the Mediterranean Basin. The site also includes the following resources: Tutorials on Art History, Reference Works for Art Historians, Source Images for Architectural History, and Images of Australian and European Art and Architecture.

Asian Art

<http://www.webart.com/asianart/>

Asian Art is an electronic journal for the study and exhibition of the arts of Asia. For an online tour, click on Exhibitions and Galleries. The site includes articles and links to other relevant resources.

Camden Kid's Art Gallery

http://homer.louisville.edu:80/~mfpetr01/art_gallery/camdart.html

Camden Kid's Art Gallery, appropriate for grades 7–12, is a monthly display of student drawings demonstrating a specific art technique.

BEST COPY AVAILABLE

Carrillo Gil Museum of Contemporary Art

<http://www.conet.com.mx/macg/INDEX.HTM>

Carrillo Gil Museum of Contemporary Art in Mexico City has the largest collection of work by Jose Clemente Orozco, as well as works by Siqueiros, Rivera, and other 20th-century Mexican artists. This site is in Spanish.

Chesley Bonestell Art Gallery

<http://www.secapl.com/bonestell/Top.html>

Chesley Bonestell Art Gallery provides a display of Chesley Bonestell's space-scene paintings accompanied by interesting information about each work.

Claude Monet

http://www.columbia.edu/~jns16/monet_html/monet.html

Claude Monet is an online museum featuring a biography of the artist, an overview of Impressionism, a discussion of Monet's methods and techniques, and a graphical display of his major works.

Dakota State University Art History on the Web

<http://www.dsu.edu/departments/liberal/artwork/ArtH.html>

Dakota State University Art History on the Web features an exhibit of marble sculptures and artwork organized around eight historical periods from the Greek Classical to the Romanesque.

BEST COPY AVAILABLE

Diego Rivera

http://www.diegorivera.com/diego_home_eng.html

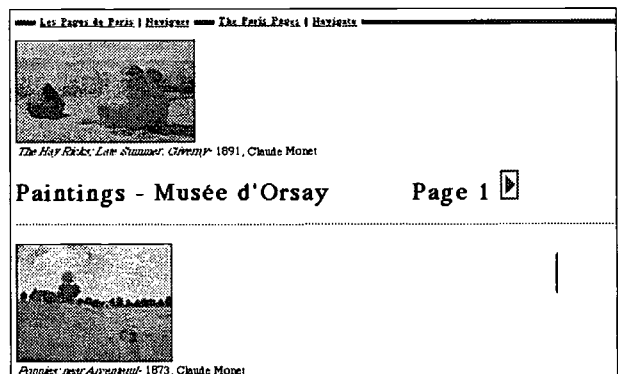

Diego Rivera is an exhibit that provides an in-depth study of the life and work of one of Mexico's most famous artists.

Famous Paintings

<http://www.paris.org.:80/Musees/Orsay/Collections/Paintings/>

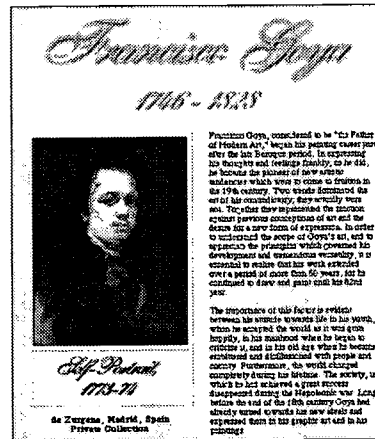

Famous Paintings features a collection of the most celebrated Impressionist paintings from the Museum d'Orsay in France.

Francisco Goya

<http://www.imageone.com/goya/goya.html>

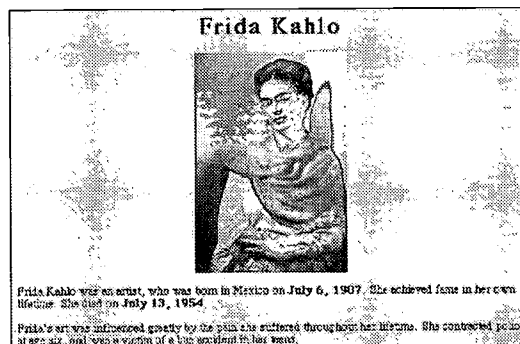

Francisco Goya presents the life of the famous Spanish artist accompanied by illustrations of his important works.

Frida Kahlo Home Page

<http://www.cascade.net/kahlo.html>

Frida Kahlo Home Page presents the life and work of the famous Mexican artist.

Fridge Artz Gallery

<http://www.go-interface.com/fridgeartz/gallery2.html>

Fridge Artz Gallery contains young childrens' drawings and paintings organized in six categories. To post a child's work, click on the Who Am I Gallery and select Send a Pic for instructions.

Georges Seurat Homepage

<http://www.pride.net/~dbirnbaum/seurat/>

Georges Seurat Homepage, for grades 5–12, contains selected paintings and drawings of this celebrated artist. The site also includes a searchable world map and a biographical outline.

Global Show-n-Tell Museum

<http://www.manymedia.com/show-n-tell/>

Global Show-n-Tell Museum provides a place where children of all ages can exhibit their art. There are detailed instructions on how kids can submit their work.

Great Artists

<http://hops.cs.jhu.edu/~baker/artpage.html>

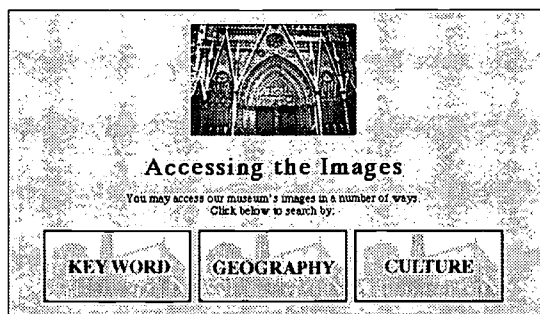

Great Artists contains Brad Baker's exhibit of paintings by Vincent Van Gogh, Claude Monet, and Paul Cezanne. The exhibition also includes picture collections, biographies, and related sites for each of the famous artists.

Historical Gallery

<http://gallery.sjsu.edu/ArtH/art-museum.html>

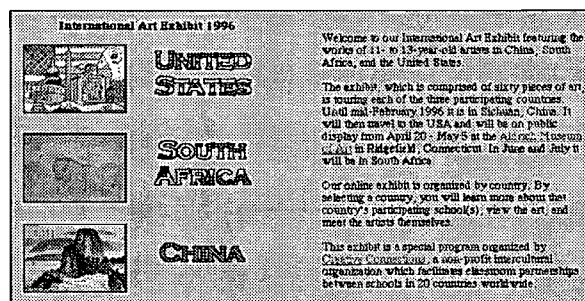

Historical Gallery, provided by San Jose (California) State University, is a collection of photographs of major monuments of the world. The collection includes monuments from Egypt, the Byzantine Empire, Rome, Medieval Europe, and other areas.

International Art Exhibit 1996

<http://www.wensi.com/freeweb/creative/gallery.html>

International Art Exhibit 1996 is an online museum sponsored by Creative Connections. It contains 60 works created by 11- to 13-year-old artists from China, South Africa, and the United States.

Kids Art Museum

http://www.sainet.or.jp/~noma/kidsart/kids_e.html

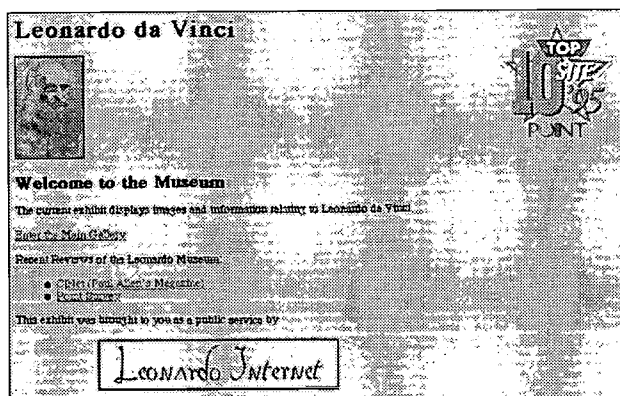

Kids Art Museum features six rooms containing paintings, sculptures, and computer drawings done by elementary school children in Japan.

Leonardo da Vinci

<http://www.leonardo.net/museum/main.html>

Leonardo da Vinci is an online museum featuring biographical information and a display of da Vinci's art.

Leonardo da Vinci Museum

<http://cellini.leonardo.net/museum/gallery.html#1start>

Leonardo da Vinci Museum is an online museum with four galleries devoted to the artist's famous creations. These include oil paintings, engineering and futuristic designs, drawings, sketches, and an historical exhibit of his life and times.

Museo del Prado

http://www.gti.ssr.upm.es/~prado/index_eng.html

Museo del Prado offers information about the museum itself, a quick tour of 49 of its best-known works of art, a temporary exhibit celebrating the 250th anniversary of Goya, and links to other museums on the Web. A Spanish-language version is available.

Museums From A to Z

<http://www.vol.it/UK/EN/ARTE/MuseumsfromAtoZ.html>

Museums from A to Z is an alphabetical list of art museums around the world.

Museum Graphics

<http://www.book.uci.edu/Musgraph.html>

CUNY Gopher Menu of ESL Teaching Tips

gopher://CUNYVM.CUNY.EDU:70/11/Subject%20Specific%20Gophers/teslfl/Teacher%20Training%20Resources/TESL-L%20Archives

CUNY Gopher Menu of ESL Teaching Tips, from the City University of New York, provides ideas ESL teachers can use in the secondary school classroom. Select from among these topics: Testing and Evaluation; Classroom Techniques and Hints; Computers in ESL; and Books, Periodicals, and Other Materials.

ERIC Gopher Menu of ESL Teaching Ideas

gopher://ericir.syr.edu:70/11/Clearinghouses/Adjuncts/ACLE/Digests

ERIC Gopher Menu of ESL Teaching Ideas contains suggestions for the teaching of listening, speaking, reading, and writing skills to ESL students in grades 7–12.

Gessler Teacher Tips' Activities

<http://www.gessler.com/gessler/teach.html>

Gessler Teacher Tips' Activities, suitable for ESL students in grades 5–12, were contributed by teachers and compiled by the Gessler Publishing Company.

Gessler Publishing Company

Teacher Tips' Activities

Creative, innovative and fun. These are the kinds of Teacher Tips Activities that we want to include in this area of our homepage. Tell us about a new activity that you've incorporated into your classroom while using language products. Whether it is an activity that builds vocabulary or even grammar after watching a video, your Teacher Tip could be useful to other teachers. Send us your Teacher Tips and we will post them online for other teachers to use. E-mail your suggestions to info@gessler.com or send them to Gessler at our address listed below.

Dictionary Scategories

Objective: To build content-related vocabulary.

Materials: Dictionary and matrix.

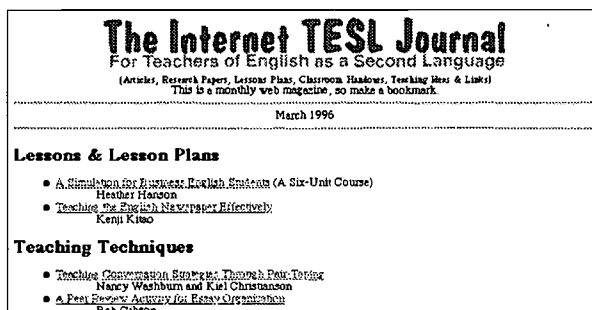

Procedure: Students work in groups or individually to find words that meet the matrix parameters. Points are awarded for unique answers. The person or team with the most points wins.

	Begins with a vowel	Begins with a consonant	Has a double consonant	Has 3 vowels
Clothing				
Food				
Animal				
Place				
Something red				

Internet TESL Journal for Teachers of ESL

<http://www.aitech.ac.jp/~iteslj/>

Internet TESL Journal for Teachers of ESL is a monthly Web magazine featuring lesson plans and lesson ideas.

Outreach and Technical Assistance Network Gopher Menu of ESL Lesson Plans

<gopher://gopher.scoe.otan.dni.us:70/1D-1%3A2334%3AESL%20Lesson%20Plans>

Outreach and Technical Assistance Network (OTAN) Gopher Menu of ESL Lesson Plans is a series of ESL lesson plans. Although designed for adult ESL learners, the lesson plans are easily adaptable for use in grades 7–12.

Dave's ESL Cafe on the Web

<http://www.pacificnet.net/~sperling/eslcafe.html>

Dave's ESL Cafe on the Web is open 24 hours a day for ESL students and teachers from around the world. Scroll down the page and select from a variety of cafe items. You can take an interactive quiz in the ESL Quiz Center, receive help with questions related to English in the ESL Help Center, search for something in the cafe or on the Web in the One-Stop ESL Search Page, share your experiences with others on the ESL Idea Page, read and add your own writings to the ESL Graffiti Wall, or ask a question of Dave on the ESL Question Page. There are also links to other ESL information for both students and teachers, an interactive message exchange, and an ESL e-mail connection. The site is suitable for grades 9–12.

David Sperling Presents the ESL Job Center on the Web

<http://www.pacificnet.net/~sperling/jobcenter.html>

Dave Sperling Presents the ESL Job Center on the Web features ESL job links, ESL teacher profiles, and an ESL job board.

Employment Resources for Language Teachers

http://www.tcom.ohiou.edu/OU_Language/teachers-job.html

Employment Resources for Language Teachers, provided by Ohio University, contains information about ESL and other language jobs in the United States and abroad.

English as a Second Language

<http://www.rmpc.co.uk/orgs/bln/esl.html>

English as a Second Language is sponsored by the Online Bilingualism and Language Network (BLN). The site provides links to relevant ESL resources for students and teachers. You can click on The Balance: Students' Pages to take a London tour, practice your English online, and read students' stories. If you click on Teacher and Parent Support Pages, you will find classroom materials and links to ESL pages around the world.

ESL Resources for Learners

<http://schoolnet2.carleton.ca/~kwellar/esl-sne/slinks.html>

ESL Resources for Learners is presented by the Special Needs Education Network. Teachers and learners in middle school and high school can find resources for such skills as grammar, writing, listening, pronunciation, vocabulary, and reading.

Special Needs Education Network
ESL Resources for Learners

Learning English on the Web

<http://www.lang.uiuc.edu/r-li5/esl/>

Learning English on the Web is a starting point for ESL learners in grades 7–12 who want to learn English through the World Wide Web. The site includes listening, speaking, reading, and writing activities.

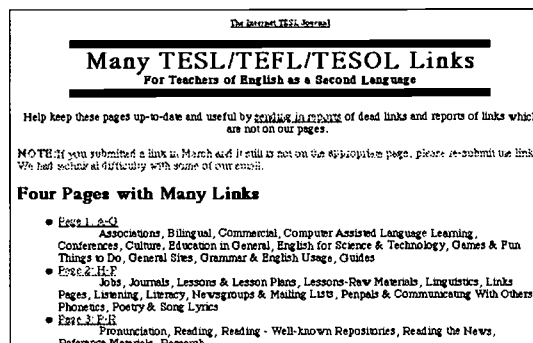

English as a Second Language Home Page

Welcome to the *English as a Second Language Home Page*. This home page is a starting point for ESL learners who want to learn English through the World Wide Web. Many people have created ESL learning materials for the Web. This home page links you to those ESL sites and other interesting places. The variety of materials will allow you to choose something appropriate for yourself.

TESL/TEFL Links

<http://www.aitech.ac.jp/~iteslj/ESL3.html>

TESL/TEFL Links, maintained by the Internet *TESL Journal*, is a large index of resources for the ESL teacher. It provides links for topics ranging from associations and computer-assisted language learning to games, poetry, and song lyrics.

Teachers of English to Speakers of Other Languages

<http://www.ncbe.gwu.edu/tesol/>

Teachers of English to Speakers of Other Languages (TESOL), the international professional association of ESL teachers, provides a Web site that includes links to publications available from TESOL as well as selected articles from *TESOL Journal* and *TESOL Quarterly*.

Foreign Language

Creative French Methods

<http://www.oise.on.ca/~hzaitlin/teacher.html>

Creative French Methods is designed specifically for the French teacher. It features links to lesson plans, teacher resource pages, and curriculum planning ideas, as well as to popular songs and activities related to international television programs.

Teaching "Survival Skills": Communicative Activities for the Foreign Language Classroom

<http://copper.ucs.indiana.edu/~jludwig/activities.html>

Teaching "Survival Skills": Communicative Activities for the Foreign Language Classroom provides sample activities for teaching listening comprehension, speaking, reading, writing, and culture. The material can be adapted to any language-learning classroom.

American Association of Teachers of French

http://www.utsa.edu/aatf/aatf_fr.html

The American Association of Teachers of French (AATF) promotes the study of French through its 75 chapters and its two official publications: *French Review* and *National Bulletin*. The What's New at AATF selection includes links to other sites of interest to teachers of French.

American Classical League

<http://www.umich.edu/~acleague/>

The American Classical League (ACL) provides its membership and other interested people with resources of importance to the teaching and study of the Classics. The ACL Web site lets you jump to Institutional Programs and select Secondary-School Programs in Classics for the e-mail addresses and Web pages of secondary school programs, or select Undergraduate Programs in Classics, where information about undergraduate course offerings may be found. There are additional links to Teaching Tools, Professional Resources, Journals and Publications, and Classics, as well as education-related links.

American Council on the Teaching of Foreign Languages

<http://www.infi.net/~actfl/>

The American Council on the Teaching of Foreign Languages (ACTFL) is the professional association that represents teachers of all languages at all educational levels. Contains information on a variety of topics, including professional development programs, national standards in foreign language education, publications, special interest groups, and related organizations.

American Association of Teachers of French Gopher Menu

<gopher://utsainfo.utsa.edu:7070/>

The American Association of Teachers of French Gopher Menu includes items of interest for classroom teachers. For example, select Guide to Online Pedagogical Activities in French, click on Minitel Activities, and you will find several interactive lesson plans.

Beginner Level Japanese Course Home Page

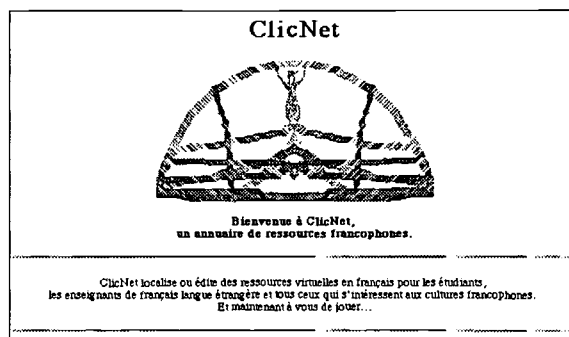

http://www.threeweb.ad.jp/threeweb/jpncntrl/bgnr_hp.html

Beginner Level Japanese Course Home Page is an interactive Japanese language course. The lessons include a variety of multisensory aids emphasizing reading, writing, speaking, and listening.

ClicNet

<http://www.swarthmore.edu/Humanities/clicnet/>

Bienvenue à **ClicNet**, un annuaire de ressources francophones. ClicNet localise ou édite des ressources virtuelles en français sur des sujets variés pour les étudiants, les enseignants de français langue étrangère et tous ceux qui aiment le français. Et maintenant à vous de jouer. No English version is available.

Coleman's Websites for Hispanists

<http://gpu.srv.ualberta.ca/~scoleman/index.html>

Coleman's Websites for Hispanists is a list of Web sites compiled by Sheryl Coleman for students and instructors of the Spanish language and for anyone wanting to know more about the Spanish-speaking world. The site includes links to learning and teaching, resources, information about programs of study, online newspapers from Spanish-speaking countries, Hispanic culture, e-mail lists, pen pal sources, and more.

Communication Connections

<http://www.widomaker.com/~ldprice/#Pelusa>

Communication Connections is a menu of Web sites designed by Lora Price, a teacher at Gloucester High School in Virginia. It is dedicated to the study, use, and enjoyment of languages. Although many cultures and languages are represented, specialized listings have been provided for French, German, Latin, Italian, Japanese, and Spanish. At this site, you can consult original sources, use a foreign language dictionary, take a language course, navigate metro systems, and read the daily news or listen to music from the country of your choice.

Creative French Teaching Methods

<http://www.acs.appstate.edu/~griffinw/fre2005/gramclass.html>

Creative French Teaching Methods is designed specifically for French teachers by Heather Zaitlin, a student at the Ontario Institute for Studies in Education, in collaboration with Rosanna Commisso. The site provides links to resources, curriculum planning ideas, lesson plans, and class activities.

Foreign Language Learning Center

<http://gwis2.circ.gwu.edu/~ed220x/Languages/>

Foreign Language Learning Center provides language teachers and language learners with access to electronic resources on the Internet. Scroll down the page and click on Teacher's Center. Topic titles include Lesson Plans, Developing Multimedia, Research and Development, Professional Organizations, Conferences, Publications, and Language Teaching on the Web.

Foreign Language Resource Center

<http://dwx.com/~tracy/fornlngz/>

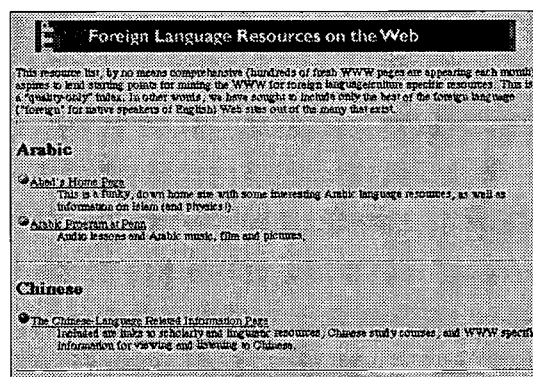

Foreign Language Resource Center features language-related resources, language-learning software, and links to other Web sites of interest to language teachers.

Foreign Language Resources on the Web

<http://www.itp.berkeley.edu/~thorne/HumanResources.html>

Foreign Language Resources on the Web seeks to include only the best of the foreign language ("foreign" for native speakers of English) Web sites.

Foreign Language Study Abroad for Teachers

<http://www.csun.edu/~hcedu013/LanguageAbroad.html>

Foreign Language Study Abroad for Teachers features links to lists of hundreds of foreign language schools in dozens of countries where teachers can upgrade their language skills. Also included is a directory of High School Foreign Exchange and Language Study Programs suitable for teenagers.

Foreign Language Study Abroad for Teachers

My name is Marty Levine and I'm a professor in the Department of Secondary Education at California State University, Northridge. One of my interests lies in preparing teachers to work in bilingual classrooms. In the picture at the left, I'm shown during a study trip visiting with pupils at Liceo Rosales in Antigua, Guatemala. I have personally used the following two organizations to study Spanish abroad and have found them to be reliable:

- Language Link: 1-800-552-2051
- Language Studies Abroad: 1-800-424-5522

Foreign Language Teaching Forum

http://www.cortland.edu/www_root/flteach/flteach.html#resources

Foreign Language Teaching Forum (FL Teach) provides resources for classroom activities, curriculum, and syllabus design. It features Web links to foreign language resources organized by language. Information is provided on subscribing to a mailing list where you can ask a question about a topic, share an idea or lesson plan, or just read what your fellow teachers say. Messages will appear in your e-mail. You can also search the FL Teach archives and read previous messages.

 **FL Teach**

Foreign Language Teaching Forum

- The March 3 Spanish Election Results can be found here. This is a very slow link.
- The Virtual Classroom table of contents may be found here. Many contributors are FLTEACH subscribers.
- Here is a photo of a group of FLTEACH SLACKERS to help us put faces with names.

Foreign Languages for Travelers

<http://www.travlang.com/languages/>

Foreign Languages for Travelers was created and is maintained by Michael C. Martin of travlang. You can select from a list of more than 25 languages and learn words and phrases by clicking on the following categories: Basic Words, Numbers, Shopping/Dining, Travel, Directions, Places, Time, and Dates.

French Page

<http://philae.sas.upenn.edu/French/french.html>

French Page presents a glimpse of French history and civilization with pictures and sounds produced by Michelle Caroly-Alter.

German Studies Trails on the Internet

<http://www2.uncg.edu/~lxlpurc/german.html>

German Studies Trails on the Internet, compiled by Andreas Lixl-Purcell, professor of German at the University of North Carolina at Greensboro, lists some of the most useful interdisciplinary German resources on the World Wide Web. You can select from a variety of topics, such as German Language and Culture (Sprache und Landeskunde), Arts and Humanities (Kunst und Wissenschaft), and Education and Research (Unterricht und Forschung).

Human-Languages Page

<http://www.willamette.edu/~tjones/Language-Page.html>

Human-Languages Page, organized by language, brings together information about the languages of the world. This site provides links to resources ranging from dictionaries to language tutorials to spoken samples of languages. The site also includes references to foreign language software and online book and text collections.

JLTC Foreign Language Resources

<http://www.aros.net/~cjensen/jltc/jltc.html>

JLTC Foreign Language Resources features links to 40 foreign languages. Click on Foreign Languages.

Kid's Window

http://kiku.stanford.edu/KIDS/kids_home.html

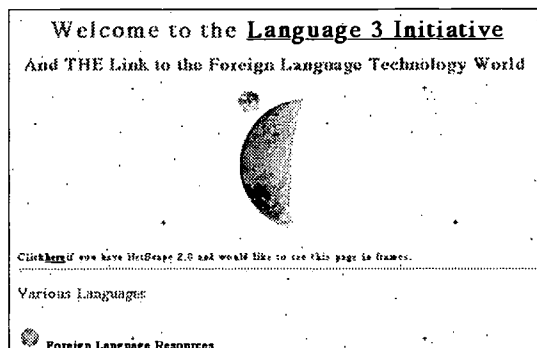

Kid's Window is a place for elementary school kids to learn about Japan and the Japanese language. They can read and hear stories in Japanese and English, see and hear words in a children's Japanese/English dictionary, or get a lesson in a language class.

Language 3 Initiative

<http://mickey.la.psu.edu/lang3/welcome.htm>

Language 3 Initiative features links to Foreign Language Resources, the Language Page (which contains links to thousands of language pages), and Intercultural E-mail Classroom Connections. Although many languages are included, the site emphasizes resources for French, German, Japanese, and Spanish.

Language Links

<http://polyglot.lss.wisc.edu/lss/lang/langlink.html>

Language Links includes a listing of multilanguage sites and places of interest to instructors and learners. If you click on So What?—A Section for Instructors, you will find ideas for using the materials found in Language Links and on the World Wide Web in your language classes.

Language Resources and Technology Information

<http://www.middlebury.edu/~herren/pages/langTech.html>

Language Resources and Technology Information provides resources for foreign language teachers and students interested in computer-assisted and technology-enhanced language learning. Also included in the site is information on foreign language software available on the Internet, online foreign language newspapers, and foreign language courses on the Web.

La Tuna

<http://tuna.upv.es/>

La Tuna is the home page of the organization of university students who study Spanish. La Tuna is dedicated to keeping alive folk music and traditions inherited from the past. You can choose selections that provide information on customs, period costumes, history, and songs. You can also listen to Spanish songs while reading the accompanying lyrics. An English version is available.

Les Misérables

<http://www.ot.com/lesmis/lesmis.html>

Les Misérables offers a selection of menu items for both the novel and the musical. Click on The Novel for material about Victor Hugo and his works or click on The Musical to find links to a Story Summary, Complete Libretto, Sounds, Graphics and Images, and Tour Dates. If you click on Links & Information, you will find additional online resources.

Les Misérables—The Complete Multilingual Libretto

<http://members.aol.com/kelsonv/les-mis/>

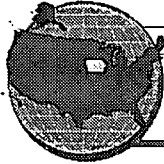

Les Misérables—The Complete Multilingual Libretto, designed and maintained by Kelson Vibber, features French, German, and English lyrics for the entire musical.

National K-12 Foreign Language Resource Center

<http://www.educ.iastate.edu/currinst/nflrc/nflrc.html>

National K-12 Foreign Language Resource Center at Iowa State University, one of six such centers funded by the U.S. Department of Education, is committed to improving foreign language education in primary and secondary schools in the United States. The site includes information about the center's institutes, workshops, and projects and provides links to useful foreign language Web resources.

National K-12 Foreign Language Resource Center, Iowa State University, Ames, Iowa

National K-12 Foreign Language Resource Center
Iowa State University
Ames, Iowa

The National K-12 Foreign Language Resource Center at Iowa State University, one of six Centers funded by the U.S. Department of Education, is committed to improving foreign language education in our nation's primary and secondary schools. To this end, the Center provides professional development for kindergarten through twelfth grade (K-12) teachers and foreign language teacher educators who serve as methods professors at institutions of higher education. All participants receive training in the use of electronic mail (e-mail) to facilitate post-institute communications.

Ohio University CALL Lab

http://www.tcom.ohiou.edu/OU_Language/

Margaret Beeks Elementary Physical Education

<http://beeks12.montgomery.k12.va.us/pe/html>

Margaret Beeks Elementary Physical Education Web site describes the physical education program available to K-5 students at Margaret Beeks Elementary School. You can print out copies of the school's physical fitness tests and visit its special events and activities clubs for ideas for your own school.

MARGARET BEEKS ELEMENTARY PHYSICAL EDUCATION

MARGARET BEEKS ELEMENTARY
Margaret Beeks Elementary is located in Elberton, Virginia and is one of thirteen elementary schools in the Montgomery County Public School system. Due to the close proximity of Gauley Bridge, Beeks has a multi-cultural population of approximately 400 students.

PHYSICAL EDUCATION PROGRAM
Physical education is provided to all students from kindergarten to fifth grade. Students participate in Physical education for thirty minutes, twice a week. Physical fitness tests are administered in the fall and spring in third, fourth, and fifth grades. Classes are taught on one of several outdoor sport fields, in the multi-purpose room, and in an open classroom.

SPARK Physical Education: "P.E. for the 21st Century"

<http://www.foundation.sdsu.edu/projects/spark/index.html>

SPARK Physical Education "P.E. for the 21st Century" is an innovative K-6 physical education curriculum and staff development program. The SPARK program offers materials and services to schools and health organizations on a nonprofit basis through San Diego State University.

SPARK Physical Education
"P.E. for the 21st Century"

SPARK is an innovative elementary (K-6) physical education curriculum and staff development program that has been validated by the Program Effectiveness Panel of the United States Department of Education. The SPARK program, which evolved from a research study supported by the National Institutes of Health, currently offers materials and services to schools and health organizations on a non-profit basis through San Diego State University.

Texas Association of Health, Physical Education, Recreation and Dance

<http://www.tahperd.sfasu.edu/TAHPERD.html>

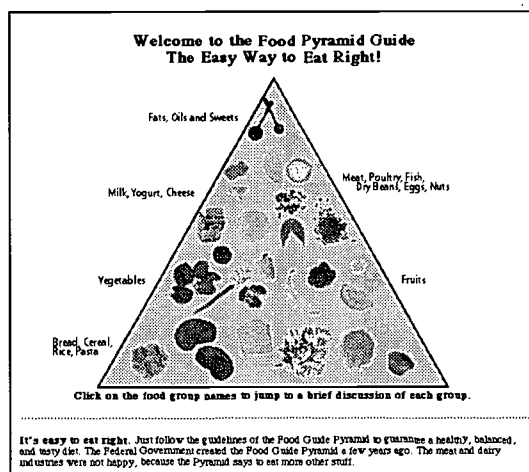

Texas Association of Health, Physical Education, Recreation and Dance (TAHPERD) is dedicated to serving the needs of teachers and students through fitness education. You can subscribe to mailing lists and exchange ideas with other teachers through e-mail. You can link to other sites for information on organizations and institutes, journals, and fitness and health.

Welcome to the Food Pyramid Guide

<http://ganesa.com/food/foodpyramid.html>

Welcome to the Food Pyramid Guide provides basic nutrition information and links to related resources.

Worldguide Health & Fitness Forum

<http://www.worldguide.com/hf.html>

Worldguide Health & Fitness Forum provides high school physical education teachers, coaches, trainers, and athletes with links to a human anatomy lesson, exercise recommendations for power and speed, ideas on how to maintain a healthy heart, and nutritional information.

Yahoo Recreation: Sports

<http://www.yahoo.com/Recreation/Sports/>

Yahoo Recreation: Sports provides teachers, coaches, and kids with links to relevant information for all sports, from air hockey and wrestling to archery and water polo. The site also includes a link to Scoreboard for up-to-the-minute scores and information. A search tool allows you to find more information about sports in the Yahoo database.

Journalism

Freedom Forum

<http://199.72.48.16/FreedomForum/>

Freedom Forum provides links to sites of interest to all who value freedom of the press. Click on High School and College and select High School Journalism for links to relevant information for kids and teachers.

High School News Web

<http://www.avnet.org/newsweb/>

High School NewsWeb is an online newswire and resource center for high school journalists. Kids can register to participate in online news conferences, learn how to get their own school newspaper online, and find lists of schools and online newspapers. The site includes other links to relevant information of interest to journalism students and their faculty advisers.

Indiana University High School Journalism Institute

<http://www.journalism.indiana.edu/HSJI/webpage.html>

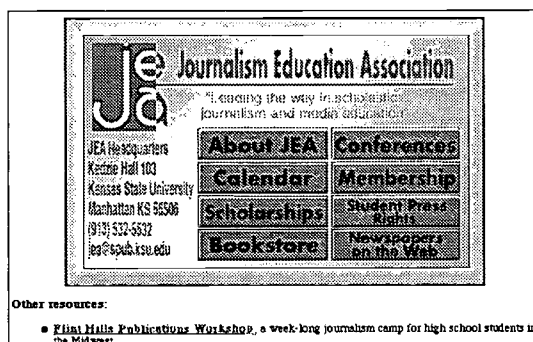

Indiana University High School Journalism Institute serves as a continuing education outreach program for secondary school students and their teachers. The Institute provides summer workshops and a number of newsletters and other publications supportive of secondary school journalism education.

Journalism Education Association

<http://www.spub.ksu.edu/~jea/>

Journalism Education Association (JEA) has among its 1,600 members journalism teachers and publications advisers, media professionals, press associations, advisers' organizations, libraries, yearbook companies, newspapers, radio stations, and journalism departments. The site includes a menu with links to information about conferences, scholarships, books, student press rights, and newspapers on the Web.

Journalism Education Association of Northern California

http://www.dcn.davis.ca.us/~aeoltcap/jeanc_home.html

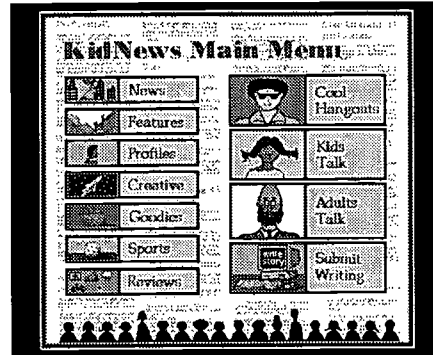

Journalism Education Association of Northern California (Jeanc) provides excellent resources for high school journalism students and their advisers, including a copy of California's Education Code regulating students' free speech rights and responsibilities and a Model Publications Code. Information about the Student Press Law Center, the Freedom Forum, and the national Journalism Education Association's position on student press rights is given. The site also includes a list of other journalism sites on the Web.

KidNews

<http://www.vsa.cape.com/~powens/Kidnews3.html>

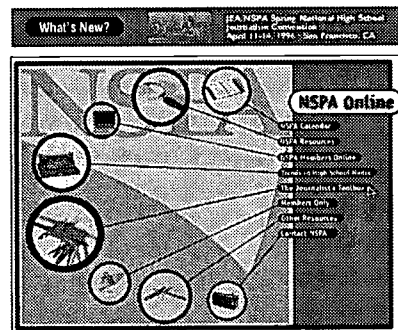

KidNews is a news and writing service for elementary school and middle school students and teachers around the world. Using this free exchange service, teachers and kids can gather news stories and ideas for their own school papers. KidNews includes news stories, feature stories, profiles, and sports stories, as well as information on other newspaper-related topics.

National Scholastic Press Association

<http://studentpress.journ.umn.edu/nspa/nspa.html>

National Scholastic Press Association is a nonprofit membership organization serving student journalists and advisers. Click on Journalist's Toolbox to find links to a variety of resources for high school journalists.

The National Scholastic Press Association is a nonprofit membership organization serving student journalists and advisers since 1921.

Scholastic Journalism

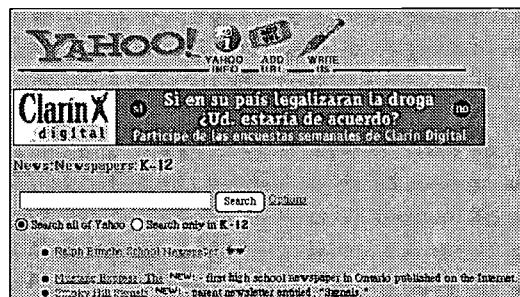

http://eb.journ.latech.edu/Schol_Journ/Schol_journ_home.html

Scholastic Journalism, maintained by Eddie Blick at Louisiana Tech, offers a list of journalism-related Web sites. It contains information about summer workshops for high school students and their advisers, as well as links to Web and gopher sites related to scholastic journalism and online student publications.

Yahoo's Index of Newspapers K-12

http://www.yahoo.com/News/Newspapers/K_12/

Yahoo's Index of Newspapers K-12 features links to student-produced online newspapers that teachers and kids can use as a guide to improving their own school's publications. The site includes a link to a resource entitled Index—High School & College Student Newspapers.

Yearbook Center

<http://www.contrib.andrew.cmu.edu/usr/dc6j/open2.html>

Yearbook Center provides information about producing yearbooks. Topics include computers, desktop publishing, photography, design, staff organization, and much more.

Language Arts

Big Sky Gopher Menu

gopher://bvsd.k12.co.us:70/11/Educational_Resources/Lesson_Plans/Big%20Sky/language_arts

The Big Sky Gopher Menu features language arts lesson plans for grades K–12. It includes a large collection for teaching a variety of topics, including reading and composition.

ERIC Gopher Menu

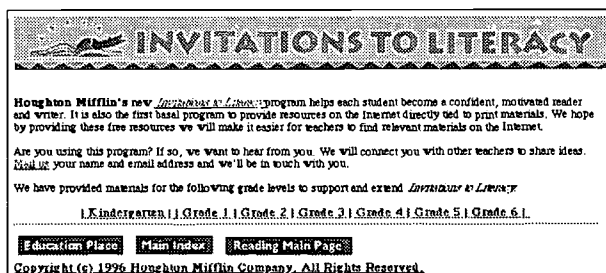

gopher://ericir.syr.edu:70/11/Lesson/Subject/LanguageArts

ERIC Gopher Menu for K–12 classes has more than 100 teacher-contributed language arts lesson plans, each of which includes an overview, purpose, objectives, activities, and resource materials.

Houghton Mifflin's Invitations to Literacy

<http://www.hmco.com/hmco/school/rdg/itl/index.html>

Houghton Mifflin's *Invitations to Literacy* is a series of hands-on, cross-curricular activities organized by grade level to supplement Houghton Mifflin's reading program. Lessons and activities can be used independently. They can be found by clicking on the following links: Kindergarten, Grade 1, Grade 2, Grade 3, Grade 4, Grade 5, Grade 6.

Language Arts Mini-Lessons, Elementary (K–5)

http://www.nptn.org:80/cyber.serv/AOneP/academy_one/teacher/cec/ceclang/ceclang-elem.html

Language Arts Mini-Lessons, Elementary (K–5), from Academy One, offers 44 lesson plans covering various language arts topics at the K–5 level.

Language Arts Mini-Lessons, Intermediate (6–8)

http://www.nptn.org:80/cyber.serv/AOneP/academy_one/teacher/cec/ceclang/ceclang-interm.html

Language Arts Mini-Lessons, Intermediate (6–8), from Academy One, offers 33 lesson plans covering various language topics for grades 6–8.

Language Arts Mini-Lessons, High School (9–12)

http://www.nptn.org/cyber.serv/AOneP/academy_one/teacher/cec/ceclang/ceclang-high.html

Language Arts Mini-Lessons, High School (9–12), from Academy One, offers 14 lesson plans covering various language arts topics for grades 9–12.

New ERIC Gopher Menu

gopher://ericir.syr.edu:70/11/Lesson/NewLesson/Language_Arts

New ERIC Gopher Menu contains more than 20 teacher-contributed language arts lesson plans for grades 4–12. Each lesson plan includes an overview, purpose, objectives, activities, and resource materials.

Teaching Children's Literature

<http://www.ucalgary.ca/~dkbrown/rteacher.html>

Teaching Children's Literature contains a collection of lesson plans and ideas for enriching the K–6 language arts curriculum.

4 Kids: Reading

<http://www.1.4kids.com/~4kids/kidread.html>

4 Kids: Reading is a catalog of online reading resources featuring interactive stories for younger readers and more than 24 individual books for adolescents, including *A Tale of Two Cities*, *Treasure Island*, and *Moby Dick*. The site also provides the complete works of William Shakespeare.

ABC Educational Games

<http://www.klsc.com/children/>

ABC Educational Games is a series of alphabet activities to help preschoolers with initial reading skills.

Aesop & Me

<http://i-site.on.ca/Isite/Education/Aesop/>

Aesop & Me features an online collection of more than 300 of Aesop's fables. You can find this collection by scrolling down the page and clicking on Fables.

Alex's Scribbles—Koala Trouble

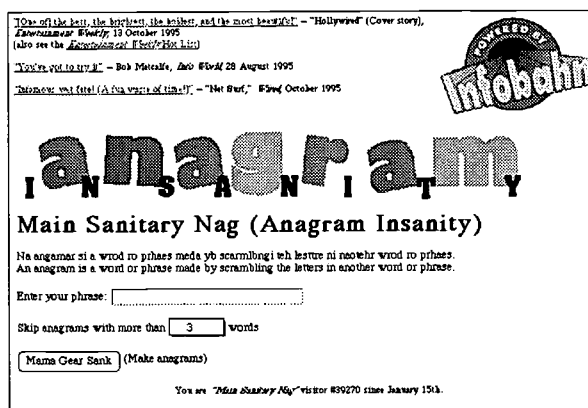

<http://www.peg.apc.org/~balson/story/>

Alex's Scribbles—Koala Trouble, written and illustrated by a father-and-son team, contains an online, interactive story for young kids. To start the story, go to Help Max Find Mummy.

Anagram Insanity

<http://Infobahn.COM/pages/anagram.html>

Anagram Insanity is an interactive word game for students in grades 4–12. Enter a word, and the computer rearranges all of the letters to create as many new words as possible.

Bill Henderson's Library

<http://www.io.org/~jgcom/library.htm>

Bill Henderson's Library is a catalog of online literary resources for grades 6–12. The catalog includes the following headings: The Magazine Rack, Stop by the Poet's Corner, My Favourite Writers and Works, The Public Library, and The Law Library.

Boggle

http://www.cs.mu.oz.au/~dnich/boggle_intro.html

Boggle is an interactive word-construction game for grades 4–12. The object is to find words in a letter grid. Players determine the grid size and the playing time. Answers are provided after each game is played.

Bonfire of Liberties Censorship of the Humanities—An Interactive Humanities Exhibition

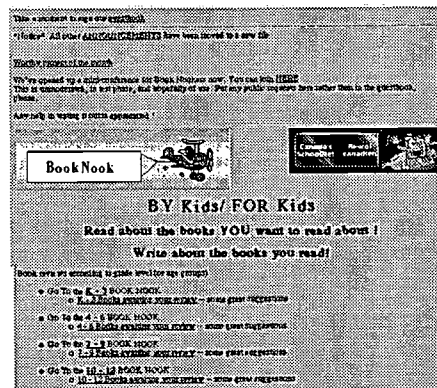

<http://www.humanities-interactive.org/>

Bonfire of Liberties Censorship of the Humanities—An Interactive Humanities Exhibition is an interactive site of banned ideas, books, plays, and images compiled by the Texas Humanities Resource Center.

Book Nook

<http://www.schoolnet.ca/english/arts/lit/booknook/>

Book Nook encourages students in grades K–12 to write book reports with the aid of a template.

British Poetry 1780–1910: A Hypertext Archive of Scholarly Editions

<http://etext.lib.virginia.edu/britpo.html>

British Poetry 1780–1910: A Hypertext Archive of Scholarly Editions is an archive of Romantic and Victorian poetry, including Thomas Hardy's *Wessex Poems & Other Verses* and William Wordsworth's *Complete Poetical Works*. Most of the texts are annotated and illustrated. For additional works of British and American literature, click on Etext Center's Modern English Collection at the bottom of the page.

19th-Century American Writers

<http://www.tiac.net/users/eldred/nh/nhow.html>

19th-Century American Writers is a chronological listing of major American authors. The list includes online versions of their works and information about their lives.

Online Thesaurus

<http://work.ucsd.edu:5141/cgi-bin/thesaurus>

Online Thesaurus is an easy-to-use reference work in which a student can enter a word to find its synonyms.

Purdue Online Writing Laboratory

<http://owl.trc.purdue.edu/>

Purdue Online Writing Laboratory (OWL) provides an inventory of student handouts to improve writing skills of students in grades 8–12. Click on the Comprehensive List of Document Titles to find these handouts, which include material related to punctuation, parts of speech, correct sentence structure, spelling, research papers, and many other topics.

Welcome to Purdue University's On-Line Writing Lab

At Purdue, students come to the Writing Lab to talk with tutors about planning and writing their papers. On-line, the Writing Lab offers other services as well, including some of our materials on topics such as common resumes, formats (such as MLA or APA) for citing sources, non-sexist language, and other information. You can also find useful links to sources of information for your research paper and other writing.

Materials on Writing Skills

We have a long list of material on writing skills, and more documents are being added as we develop this OWL (On-line Writing Lab). To help you find what's available now, we offer three different listings:

- If you want categories of the general categories of these documents, read the print version of our index.
- If you prefer to see what we have in outline form, we have an outline with the general category headings and all documents in each category.
- If you prefer to see a searchable list of document titles, try this list.

Read Aloud—A Guide to Reading Children's Books

<http://funnelweb.utcc.utk.edu/~epling/readaloud.html>

Read Aloud—A Guide to Reading Children's Books provides read-aloud books and anthologies suitable for kids from early childhood through eighth grade.

Shiki Internet Haiku Salon

<http://cc.matsuyama-u.ac.jp/~shiki/>

Shiki Internet Haiku Salon presents a new style of haiku that is popular in American schools. The site includes biographical information about the author, Shiki Masaoka, anthologies of haiku, lessons on how to write this type of poetry, and related links.

TOP 500 MAGELLAN 3 STAR SITE

The Shiki Internet Haiku Salon

Shiki Masaoka, the haiku poet, was born in Matsuyama in 1867. Shiki is well known in Japan for introducing a new style of haiku, a short poetic form, and for enhancing the art.

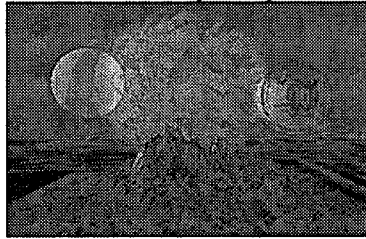

The word "shikikan" also mean "The four seasons" in Japanese. The seasons are very important in Japanese haiku, so Shiki is an appropriate name for the haiku server.

Silly Billy's World

<http://www.sillybilly.com/>

Silly Billy's World, for grades K–6, is an online collection of multicultural stories and parables written and illustrated by Bill Dallas Lewis.

Story Resources on the Web

<http://www.swarthmore.edu/~sjohnson/stories/>

Story Resources on the Web is a comprehensive collection of online multicultural stories and literature resources for grades K–6. Teachers can print out some of the material.

Story Resources available on the Web

last modified on February 23, 1996

Since I've begun reading the usenet newsgroup alt.arts.storytelling, I've noticed a need for someone to put up a reference page for the aficionados of both storytelling, and the stories told. I've always had a deep love for fairy tales, folk tales, children's stories, and anything else that engages the heart and mind so easily, and so well.

Please note that I am not a storyteller myself! I have great respect for those who can, however, I only collect the resources, and would not be a good person to ask for contacts in the storytelling world.

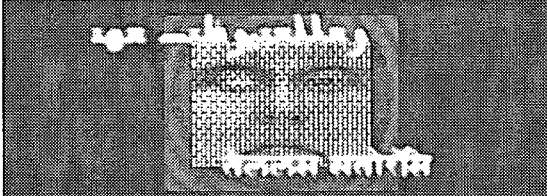

A special "thank-you" also goes to those who have taken the time to write to me and comment on this story resource page. I appreciate all the comments and advice that's been sent. I don't always have time to make changes to the pages right away, but I do my best!

Story Teller

<http://www.primenet.com/~beesley/Teller.html>

Story Teller is an online, interactive writing contest for kids. Contestants fill in the blanks to complete an online story. Winning entries are chosen weekly. To see previous stories, click on Story#1 or Story#2. To see examples of winning entries, click on the Seven Thorns of the Crown, found at the bottom of the page, and then scroll and click on Open Book.

Our storyteller needs your help. Fill in the blanks to complete the tale. Winning entries will be chosen on a weekly basis. You might want to read the story's background before you play.

Would you like to see the previous tales?

STORY#1
STORY#2

Tips: You can use up to 30 characters for each blank in the story. For speed you can hit tab to advance to the next blank. You can put more than one word in a blank, or leave the blank empty.

Tales of the Brothers Grimm

<gopher://ftp.std.com/11/obi/book/Fairy.Tales/Grimm>

Tales of the Brothers Grimm features a complete compilation of the tales of the Brothers Grimm, including "Aladdin," "Bluebeard," and "The Emperor's New Clothes."

Tales of Wonder

<http://www.ece.ucdavis.edu/~darsie/tales.html>

Tales of Wonder, for grades 3–8, contains a collection of folk and fairy tales from around the world.

Tales to Tell

<http://www.thekids.com/kids/>

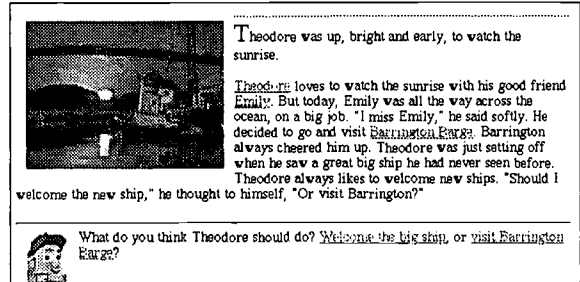

Tales to Tell, for grades K–6, presents beautifully illustrated stories from around the world. They include rhymes, fables, adventure stories, and folk and fairy tales.

Theodore Tugboat

<http://www.cochran.com/theosite/story/Begin.html>

Theodore Tugboat is an interactive online story for younger students. The story is about a friendly tugboat, and the reader decides what happens as the story progresses.

Vose Kidopedia

<http://199.2.210.97/kidopedia.html>

Vose Kidopedia is an encyclopedia written and illustrated by a fifth-grade class.

Wacky Web Tales

<http://www.hmco.com:80/hmco/school/tales/>

Wacky Web Tales is an interactive site that allows students to generate madlibs by supplying the required part of speech. Students can also submit their own madlibs by e-mail.

Web Resources for English Teachers

<http://nickel.ucs.indiana.edu/~lwolfgra/english.html>

Web Resources for English Teachers contains links to a variety of sources primarily dealing with American Literature. It includes online texts of *The Call of the Wild*, *The Invisible Man*, *The Red Badge of Courage*, *The Pit and the Pendulum*, and many others. The site also provides links to a variety of poetry sources, such as the CMU Poetry Archive, which features texts of poems from Angelou to Wordsworth.

Web Resources for English Teachers

This page is meant to be a starting point for English teachers using the Web and contains links to a variety of sources, primarily dealing with American Literature.

A word about online texts: There are two primary formats of online texts on the world wide web. Gopher texts are black-on-gray, straight-text, no-nonsense versions. With gopher texts, what you see is what you get. HTML texts may have different backgrounds, colors, or fonts. With HTML, it is possible for the viewer to adjust the window size and the text will automatically fit into the window. This is not possible with gopher texts. One definite advantage of online texts, in either form, however, is the ability of certain browsers to be able to locate certain words. Although you may not wish to read an entire book online, you can save a lot of time looking for a word or passage by using the online version. (In Netscape, use "Find" under the "Edit" menu. Other browsers will have different commands.)

Many people are looking for pages of literary criticism of specific authors on the Internet, and I have included what I have found. This is an area, however, that still seems to be undeveloped. If you have developed or know of pages of critical analyses, please let me know so I can include them on this page. Also, if you find this page useful or have comments or suggestions for its improvement, please e-mail me at lwolfgra@indiana.edu

Webster's Online Dictionary

<http://c.gp.cs.cmu.edu:5103/prog/webster>

Webster's Online Dictionary is an easy-to-use dictionary tool. Students can enter a word to find its definitions and synonyms.

Hypertext Webster Interface

Enter word here:

Look up definition

Clear entry

This hypertext Webster interface provides a point-and-click client interface (for now, limited to browsers) for accessing the various Webster's dictionary services on the Internet. First, type the word for which you want the definition in the search window and hit return. Words in the resulting definition are hypertext linked back into the dictionary, allowing you to use your mouse to access the definition of those misspelled (and unrelated) words.

Welcome to Stage Hand Puppets' Activity Page

<http://fox.nstn.ca/~puppets/activity.html>

Welcome to Stage Hand Puppets' Activity Page, for grades 3-6, includes tips and patterns for making hand puppets from paper and scrap material. The site also features short puppet plays written by kids.

Math

Big Sky Math Gopher Menu

gopher://bvsvd.k12.co.us:70/11/Educational_Resources/Lesson_Plans/Big%20Sky/math

Big Sky Gopher Menu presents math lesson plans for K–12 classes. It includes a large collection for teaching a variety of topics, including fractions, decimals, whole numbers, ratios, and story problems.

ERIC Math Gopher Menu

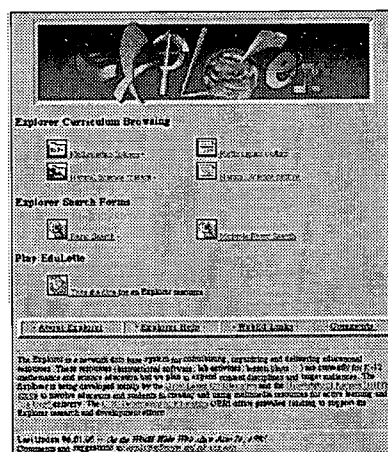

gopher://ericir.syr.edu:70/11/Lesson/Subject/Math

ERIC Gopher Menu provides more than 100 math teacher-contributed lesson plans for K–12 classes. Each lesson plan includes an overview, purpose, objectives, activities, and resource materials.

Explorer Home Page

<http://unite2.tisl.ukans.edu/>

Explorer Home Page is a mammoth collection of math lesson plans and activities for K–12 classes. Click on Mathematics Folders, and you will find a variety of plans on many topics, including problem solving and reasoning, whole numbers and numeration, geometry, algebraic ideas, and measurement.

Frank Potter's Science Gems: Mathematics

<http://www-sci.lib.uci.edu/SEP/math.html>

Frank Potter's Science Gems: Mathematics provides an exhaustive collection of K–12 lesson plans and activities placed in 23 math categories.

Good News Bears Stock Market Project

<http://www.ncsa.uiuc.edu/edu/RSE/RSEyellow/gnb.html>

Good News Bears Stock Market Project is an interdisciplinary unit specifically designed for middle school math students and teachers. It revolves around an interactive stock market competition in which students use real-time stock market data from the New York Stock Exchange and NASDAQ. The unit includes lesson plans and activities, reproducible pages, student handouts, and other related teaching materials.

Lesson Plans Using Statistics and the Internet

<http://www.ncsa.uiuc.edu:80/Edu/MSTE/meseke/plans.html>

Lesson Plans Using Statistics and the Internet is for middle school and high school teachers who would like to integrate statistics and the Internet into their math instruction. This site contains Internet-based statistics lessons on the following topics: NCAA basketball finals, earthquakes, minimum-maximum temperatures, weather plots, and temperatures.

Mathematic Strategies Lesson Plans

<http://www.dpi.state.nc.us/Curriculum/Mathematics/MathMatrix.html>

Mathematic Strategies Lesson Plans, from the North Carolina Department of Public Instruction, provides math teaching strategies for seven competencies at grade levels K–12. For example, if you click on Competency Goal 1 for Grade 2, you will find a list of math strategies that help students achieve mastery of the competency.

Grade	K	1	2	3	4	5	6	7	8	9-12
Competency Goal 1	XX	XX	XX	XX	XX	XX	XX	XX	XX	XXXXX
Competency Goal 2	XX	XX	XX	XX	XX	XX	XX	XX	XX	XXXXX
Competency Goal 3	XX	XX	XX	XX	XX	XX	XX	XX	XX	XXXXX
Competency Goal 4	XX	XX	XX	XX	XX	XX	XX	XX	XX	XXXXX
Competency Goal 5	XX	XX	XX	XX	XX	XX	XX	XX	XX	XXXXX
Competency Goal 6	XX	XX	XX	XX	XX	XX	XX	XX	XX	XXXXX
Competency Goal 7	XX	XX	XX	XX	XX	XX	XX	XX	XX	XXXXX

Math Mini-Lessons (K–5)

http://www.nptn.org:80/cyber.serv/AOneP/academy_one/teacher/cec/cecmath/math-elem.html

Math Mini-Lessons (K–5), from Academy One, offers 32 lesson plans covering math topics at the elementary school level.

Math Mini-Lessons (6–8)

http://www.nptn.org:80/cyber.serv/AOneP/academy_one/teacher/cec/cecmath/math-interm.html

Math Mini-Lessons (6–8), from Academy One, offers 13 lesson plans covering math topics at the middle school level.

Math Mini-Lessons (9–12)

http://www.nptn.org:80/cyber.serv/AOneP/academy_one/teacher/cec/cecmath/math-high.html

Math Mini-Lessons (9–12), from Academy One, offers eight lesson plans covering math topics at the high school level.

New ERIC Math Gopher Menu

<gopher://ericir.syr.edu:70/11/Lesson/NewLesson/Math>

New ERIC Math Gopher Menu features 13 teacher-contributed math lesson plans for grades K–12. Each lesson plan includes an overview, purpose, objectives, activities, and resource materials.

Pi Home Page

<http://www.ncsa.uiuc.edu:80/edu/RSE/RSEorange/buttons.html>

Pi Home Page contains various resources for teaching students in grades 6–8 all about pi. The site includes lesson plans and activities, facts and history, projects, and applications.

Susan Boone's Lesson Plans

<http://www.cs.rice.edu/~sboone/Lessons/lptitle.html>

Susan Boone's Lesson Plans provides Internet-based math lessons and activities for grades 6–12. The activities include interactive projects in which students use math to solve real-life problems related to the Indianapolis 500, census data, real estate trends, and traffic reports.

Lessons Developed by Susan Boone

GrITTECH '95 Participant
A program of the Center for Research on Parallel Computing (CRPC)

CRPC Lesson Titles

A Functional Housing Market

Students will access the Internet to search for housing prices in Houston, Texas (the location can be changed to accommodate any location) and compare the prices to the number of square feet found in the living area of a house. A linear equation will be derived from this data on a coordinate plane using the "best-fit" method. Using information from the graph of the data and the equations of the function, students will answer questions about housing prices.

Suzanne's Math Lessons

<http://forum.swarthmore.edu/alejandre/>

Suzanne's Math Lessons, for middle school students, features lessons and activities for creating designs with circles, factoring through geometry, factoring algebraically, and working with magic squares. To find additional activities and tutorials, click on Suzanne's Tessellation Lessons.

This Is MEGA Mathematics: Los Alamos National Laboratory

<http://www.c3.lanl.gov/mega-math/>

This Is MEGA Mathematics: Los Alamos National Laboratory provides seven innovative hands-on math lessons complete with activities and materials for grades 4–12. Select from among these topics: The Most Colorful Math of All, Untangling the Mathematics of Knots, and Machines That Eat Your Words.

Welcome to Sloan's Math Class

<http://web.InfoAve.net/~msloan/Ourhomepage.html>

Welcome to Sloan's Math Class is a collection of 41 online math lessons and activities involving real-life situations for high school students. To find these activities, scroll and click on Math Activities.

Activities Integrating Mathematics and Science

<http://204.161.33.100/>

Activities Integrating Mathematics and Science (AIMS) contains activities and resources for integrating math and science for grades K–8. Links for teachers include an activity archive, math history, puzzles, and places to visit.

Appetizers and Lessons for Math and Reason

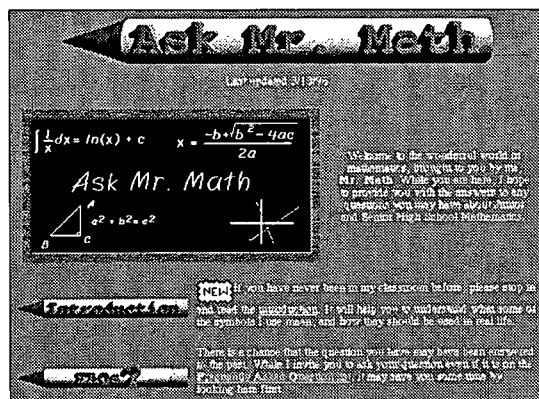

<http://www.cam.org/~aselby/lesson.html>

Appetizers and Lessons for Math and Reason, for high school math students, shows how to use rules and patterns in solving logic/math problems. Among the site's offerings are arithmetic review problems, skills for problem solving in algebra, and theorem-proving exercises.

Ask Mr. Math

http://www.localnet.com/~rseiden/mr_math/ask_mr_math.html

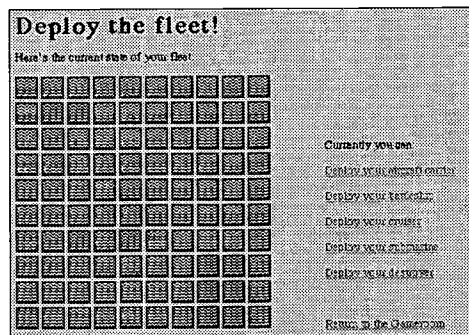

Ask Mr. Math answers math questions e-mailed by teachers and student in grades 6–12. Answers are returned within 24 hours. The site also features a link to previous questions and answers, as well as a useful glossary.

Battleship: Blow Up the World Wide Web

<http://csugrad.cs.vt.edu/htbin/battleship?>

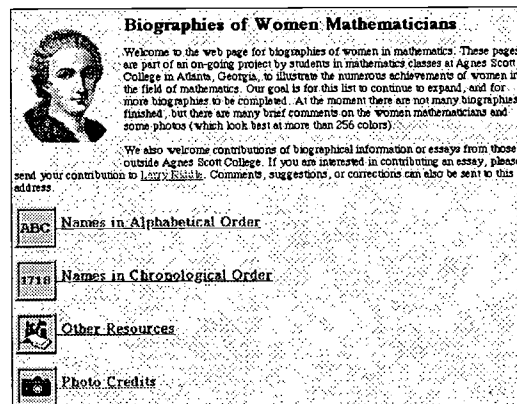

Battleship: Blow Up the World Wide Web is an online version of the well-known game Battleship, which is based on coordinate geometry. The game is played on a grid where players click on coordinates (squares) to sink the enemy's ships and keep records of their hits and misses. Before playing the game, students should read the rules and then place their ships.

Biographies of Women Mathematicians

<http://www.scottlan.edu/lriddle/women/women.html>

Biographies of Women Mathematicians is part of an ongoing project by students in mathematics classes at Agnes Scott College in Atlanta, Georgia. The project illustrates the numerous achievements of women in the field of mathematics.

Brain Teasers

<http://www.hmco.com/hmco/school/math/brain/>

Brain Teasers are provided weekly by Houghton Mifflin for students in grades 4–8. The teasers are organized by grade level, and answers appear the following week.

Join the fun and get everyone at home involved in solving our brain teasers and puzzles. You don't need to be a math whiz to solve these -- all you need is some patience and, on occasion, a different way of looking at things.

Go ahead, give it a try, and don't give up. Puzzles are meant to take more than a minute or two to solve. If you really want some help, we've provided hints for you. If you have comments about these brain teasers, or if you want to know if you have the right answer and you can't wait until we post it next week, send an email to DATA@hmco.com. Good Luck!

Why Solve Brain Teasers?

Try this week's Brain Teasers. Choose one of the following puzzles and try to solve it without using the hints. Each Thursday we'll post new puzzles and the answer to the previous week's puzzles.

Classroom Compass

<http://www.sedl.org:80/scimath/compass/cchp.html>

Classroom Compass was developed by the Southwest Educational Development Laboratory. Designed for teachers who want to integrate mathematics and science instruction in grades 3–8, the site provides a collection of ideas and resources, including such activities as howdy heart, the pendulum, mud slide, and pumpkin exploration.

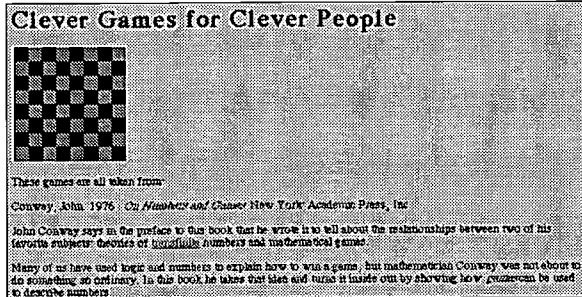

Welcoming to the Classroom Compass: a collection of ideas and resources for teachers interested in improving instruction in science and mathematics. Science and mathematics offer special challenges for teachers, and the integration of content areas is emphasized even more today than in the past. To make these subjects more accessible to more students, teachers must engage students in real problems and...

Clever Games for Clever People

<http://www.cs.uidaho.edu/~casey931/conway/games.html>

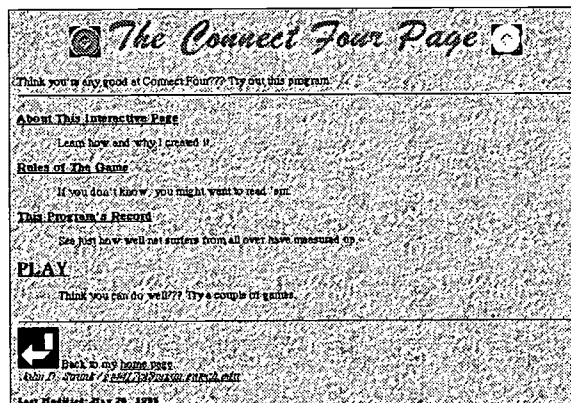

Clever Games for Clever People, adapted from John Conway's book *On Numbers and Games*, features 17 classroom logic/strategy games for improving the math abilities of middle school and high school students. Each game includes simple rules, a description of the necessary materials, and clear directions for creating the games.

Connect Four Page

<http://ulc102.residence.gatech.edu/connect4/connect.html>

Connect Four Page, for students in grades 3–8, provides easy-to-follow rules and an attractive gameboard for playing this popular logic game on the Web.

Connect the Dots

<http://204.96.11.210/jchuang/Games/Dots/dots.cgi>

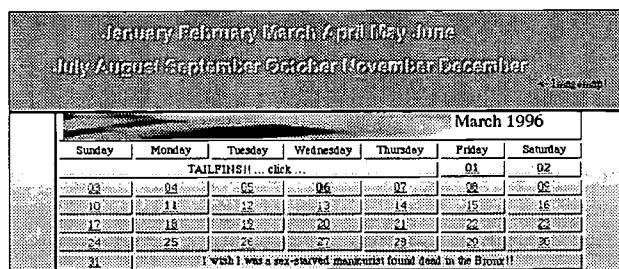

Connect the Dots is an online strategy game that allows kids in grades 3–8 to play against the computer and try to capture as many boxes as possible. Players can choose from among seven board sizes.

Daily Almanac

<http://www.eecs.uic.edu/~mmaggio/almanac2.html>

Daily Almanac provides students in grades 4–8 with a list of notable events and the birthdays of famous people. Students can select any month in the 1996 calendar and click on a day to get the lists. The activity illustrates the use of numbers.

Drake High School Math Department

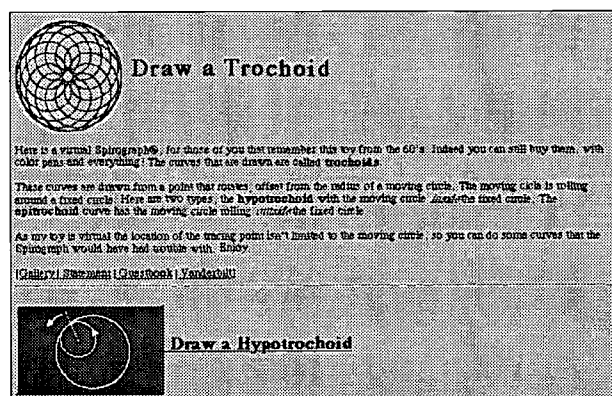

<http://marin.k12.ca.us/~sfdhs/math/math.html#topofpage>

Drake High School Math Department features information on a rich variety of high school sites, including links to math games and puzzles and links to student and teacher resources.

Draw a Trochoid

<http://www.vanderbilt.edu/VUCC/Misc/Art1/trochoid.html>

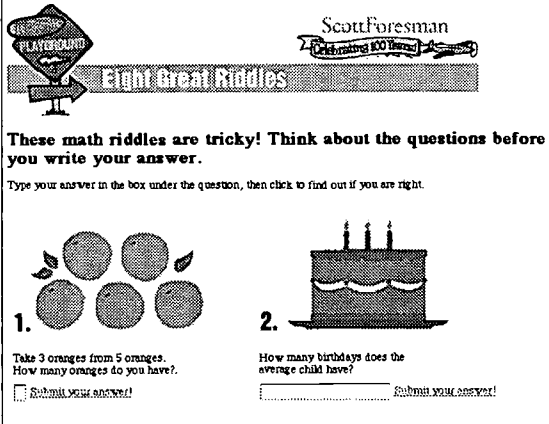

Draw a Trochoid is an online version of the spirograph. This site allows students in grades 4–12 to enter three numbers to create circular designs.

Eight Great Riddles

<http://aw.com/sf/mathrid.htm>

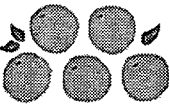

Eight Great Riddles, provided by Scott Foresman, are math riddles with accompanying answers for students in grades 4–8. Scroll and click on Next Four Riddles for more puzzles.

Scott Foresman
Celebrating 100 Years

Eight Great Riddles

These math riddles are tricky! Think about the questions before you write your answer.
Type your answer in the box under the question, then click to find out if you are right.

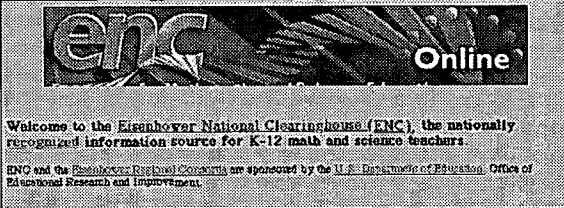

1. 
Take 3 oranges from 5 oranges.
How many oranges do you have?

2. 
How many birthdays does the average child have?

Eisenhower National Clearinghouse

<http://www.enc.org/>

Eisenhower National Clearinghouse (ENC) contains a variety of educational resources for teaching math and science in grades 4–12. The site includes lessons, online publications, and services.

enc Online

Welcome to the Eisenhower National Clearinghouse (ENC), the nationally recognized information source for K-12 math and science teachers.

ENC and the Eisenhower Regional Consortia are sponsored by the U.S. Department of Education, Office of Educational Research and Improvement.

Eric's Treasure Trove of Mathematics

<http://www.gps.caltech.edu/~eww/math/math.html>

Eric's Treasure Trove is a comprehensive index of links to topics for gifted high school math students.

Family Math Home Page

<http://theory.lcs.mit.edu:80/~emjordan/famMath.html>

Family Math Home Page, developed by the Lawrence Hall of Science at University of California, Berkeley, is a K-6 math program for underrepresented student groups. Scroll to Back Issues of the Family Math Newsletter, and click on either Issue 1, Issue 2, or Issue 3 to find 10 activities.

Fun Math

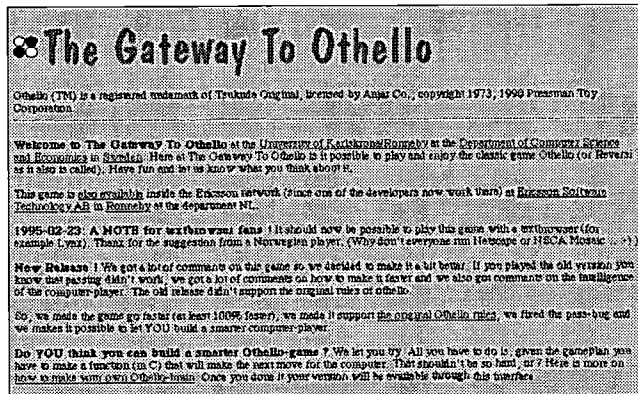

http://www.uni.uiuc.edu/departments/math/glazer/fun_math.html

Fun Math is a collection of puzzles, problems, and pictures for gifted high school math students. This site contains links to math jokes, Noel Giffen fractals, MATLAB Gallery, crystals, hyberbolics, knots, and other fractal pictures.

Gateway to Othello

<http://www.pt.hk-r.se/~roos/othello1/>

Gateway to Othello is the computer version of the classic game Reversi, which tests broad reasoning skills. Players in grades 6–12 place their discs on a board and try to outflank the computer's discs. Three levels of difficulty are available.

Geometry and the Imagination in Minneapolis

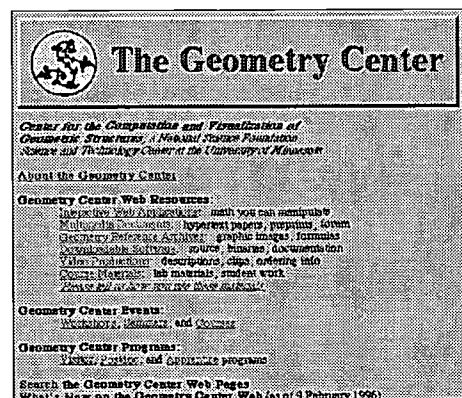

<http://www.geom.umn.edu/docs/doyle/mpis/handouts/handouts.html>

Geometry and the Imagination in Minneapolis, for high school math classes, consists of a large collection of handouts covering such topics as the gas, water, and electricity puzzle; geometry on the sphere; Descartes' formula; and numerous other topics.

Geometry Center

<http://www.geom.umn.edu/>

Geometry Center is a mathematics research and education center at the University of Minnesota. Advanced high school geometry students can click on Interactive Web Applications and enjoy 10 interactive activities. These include Build a Rainbow, Projective Conics, Orbifold Pinball, and other explorations.

Geometry Forum: Elementary Problem of the Week

<http://forum.swarthmore.edu/sum95/ruth/elem.pow.html>

Geometry Forum: Elementary Problem of the Week, for grades 3–6, provides an archive of imaginative math problems and their solutions. Elementary students who register by e-mail are assigned a high school student as a math mentor.

Geometry Forum: Constructioning Geometry on the Internet—Summer 95

<http://forum.swarthmore.edu/sum95/projects.html>

Geometry Forum: Constructioning Geometry on the Internet—Summer 95, for grades 6–12, contains a collection of math projects created by teacher-participants in Swarthmore College's 1995 Summer Institute. Scroll to Classroom Materials and click on Perspective Drawing, Moebius Strip, Polyhedra, or Spreadsheets to find excellent hands-on activities for the Moebius strip and polyhedra. Be sure to visit Find It on the Web for other polyhedra projects.

Geometry Forum: MathMagic

<http://forum.swarthmore.edu/mathmagic/>

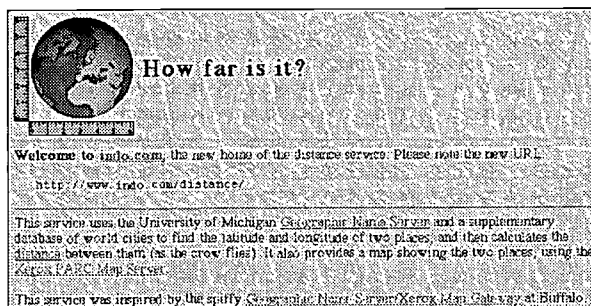

Geometry Forum: MathMagic provides an archive of K–12 math problems arranged by grade level.

How Far Is It?

<http://gs213.sp.cs.cmu.edu/prog/dist>

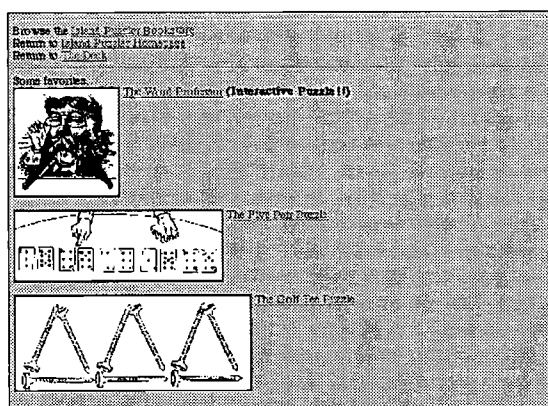

How Far Is It? is a math activity for grades 5–8. Using map coordinates, students find the distance between two major U.S. cities. This activity helps students understand linear relationships.

Island Puzzler

<http://deck.com/puzzler/sampler.html>

Island Puzzler is an assortment of math and logic puzzles with accompanying answers for students in grades 4–8.

Koblas Currency Converter

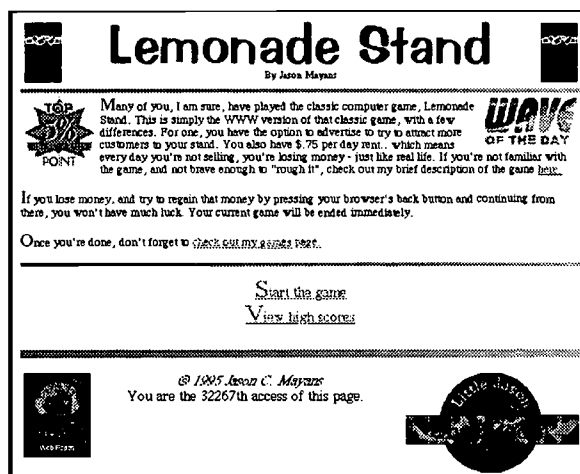

<http://bin.gnn.com/cgi-bin/gnn/currency>

Koblas Currency Converter is a world money converter in which students in grades 5–8 can easily find different currency values.

Lemonade Stand on the Web

<http://www.fn.net/~jmayans/lemonade/>

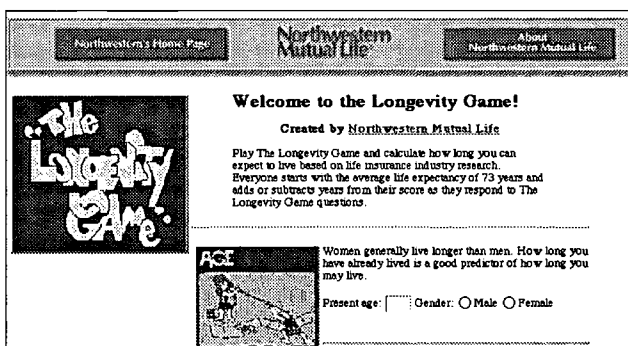

Lemonade Stand on the Web enables kids in grades 4–8 to be entrepreneurs as they try to make as much money as possible selling lemonade.

Longevity Game

<http://www.northwesternmutual.com/longevit/longevit.htm>

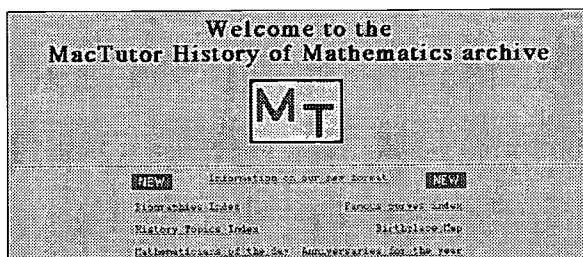

Longevity Game is an interactive site created by Northwestern Mutual Life for use with students in grades 6–12. The computer uses the company's insurance statistics to predict a student's life expectancy based on the student's answers to a series of questions.

MacTutor History of Mathematics Archive

<http://www-groups.dcs.st-and.ac.uk/~history/>

MacTutor History of Mathematics Archive, provided by University of St. Andrews, Scotland, is suitable for middle school and high school teachers and students. It contains the biographies and pictures of more than 1,100 mathematicians indexed alphabetically and chronologically. This site also features links to a Birthplace Map of mathematicians and Other Good Sources of Information, which identifies Web sites related to the history of mathematics.

Magic Cubes

<http://www.inetworld.net/~houlton/>

Magic Cubes, by Meredith Houlton, explains to high school students the math associated with magic squares and cubes.

Make That Number: Puzzle Archive

<http://www.wwa.com/math/puzzles/digitEquations/archive.html>

Make That Number: Puzzle Archive contains 239 number puzzles for students in grades 6–12. To play, students can click on the name of any puzzle. To get the answer, they click on Show.

Mankala

<http://touchstonegames.com/mankala.cgi>

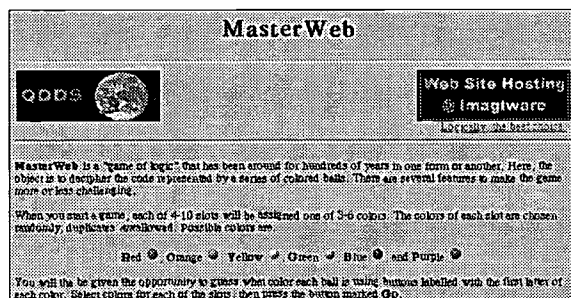

Mankala is an ancient math game (a.k.a. Kalah) involving logic and strategy. Designed for students in grades 4–12, this site provides simple rules and has a hint button that helps new players make good moves.

MasterWeb

<http://imagiware.com/masterweb.cgi>

MasterWeb is an online version of the game Mastermind. MasterWeb can be played at various levels of difficulty. It involves understanding place value and requires inferential reasoning. The game is suitable for students in grades 5–12.

Match 23

<http://www.gold.net/users/fj17/index.htm>

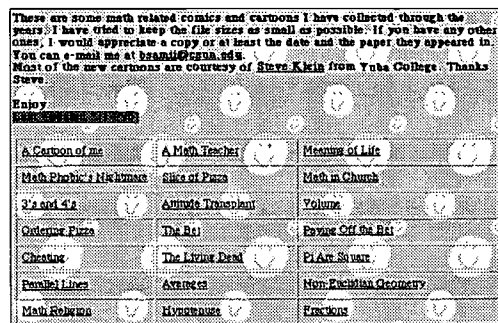

Match 23 is the Web version of the popular game of Nim, which is based on binary numeration. Players have a choice of removing one, two, or three pieces from the online board. The winner is the player who forces the opponent to make the last move.

Math Comics and Cartoons

<http://www.csun.edu/~hcmth014/comics.html>

Math Comics and Cartoons is a collection of nearly 70 cartoons involving humorous math-related situations. The site, suitable for grades 6–12, is frequently updated with new cartoons.

Math Pages

<http://www.seanet.com/~ksbrown/index.htm>

Math Pages is useful as a resource of supplementary materials for advanced placement classes. The site contains more than 300 interactive articles on a variety of topics, including number theory, combinatorics, geometry, algebra, calculus, differential equations, probability, statistics, physics, and the history of mathematics.

Mathematical Games and Recreations

http://www-groups.dcs.st-and.ac.uk/~history/HistTopics/Mathematical_games.html

Mathematical Games and Recreations, from the MacTutor History of Mathematics Archive, is for high school students. It contains a historical collection of well-known puzzles varying from simple items to complex unsolved problems. The puzzles include number games, geometrical puzzles, network problems, and combinatorial problems.

Mathematicians Throughout the Year

http://www-groups.dcs.st-and.ac.uk/~history/Day_files/Year.html

Mathematicians Throughout the Year, from MacTutor, contains biographical material and is suitable for use in grades 8–12. Click on Today or any other day in the calendar to find information about the contributions of mathematicians who were born or died on that day.

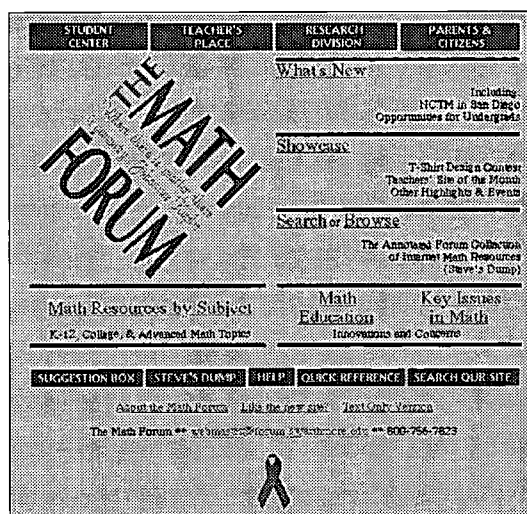

BEST COPY AVAILABLE

Math Forum

<http://forum.swarthmore.edu/>

Math Forum, sponsored by Swarthmore College, is a one-stop Internet shopping mall for all your K–12 math needs. It features lesson plans, interactive activities, materials, and Web sites related to teaching arithmetic, algebra, geometry, and advanced math topics. Visit the Student Center, Teacher's Place, and Math Resources by Subject, where you will find problems, projects, archives, puzzles, math shortcuts, many classroom materials and handouts, and online assistance from Dr. Math.

Math Magic Activities

http://www.scri.fsu.edu/~dennisl/topics/math_magic.html

Math Magic Activities, for grades 6–12, provides nine magic tricks based on simple mathematics, not on magic. The tricks involve card tricks, calculational wizardry, and geometry and topology curiosities.

Math Problem of the Day

<http://mmm.mbhs.edu/~cmiller/MPOTD>

Math Problem of the Day, developed by Carl Miller, is a collection of more than 25 algebraic problems, with solutions he wrote for use in high school math courses. The difficulty of each problem is indicated by asterisks.

Math Problems of the Week: Grades 3–6

<http://www.mbnet.mb.ca/~jfinch/math.html>

Math Problems of the Week: Grades 3–6 features two problems posted each Sunday. Answers to the previous week's problems also appear.

Math Problem Solving Task Centres

<http://www.srl.rmit.edu.au/mav/PSTC/index.html>

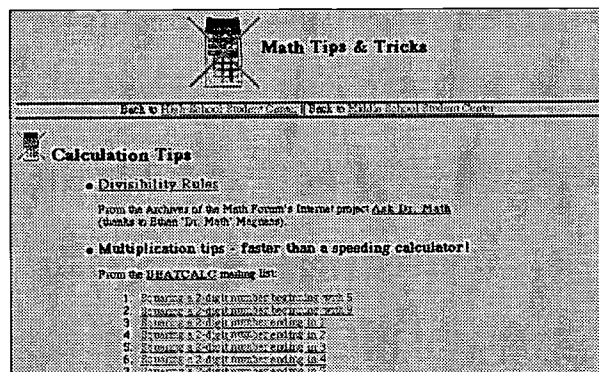

Math Problem Solving Task Centres offers monthly math problems for students in grades 4–12. The problems are arranged according to difficulty level. This site also includes previously listed problems, a task problem bank, a challenging problem-of-the-month contributed by a famous mathematician, and problem-solving strategies.

Math Forum: Math Tips & Tricks

<http://forum.swarthmore.edu/k12/mathtips/index.html>

Math Forum: Math Tips & Tricks provides step-by-step instructions for 24 calculation shortcuts that enable students to multiply faster in their heads than they can by calculator. These shortcuts for students in grades 5–9 include multiplying two selected two-digit numbers, squaring a two-digit number beginning with 5, and multiplying a two-digit number by 55. This site also includes calculation tips for the Divisibility Rules.

BEST COPY AVAILABLE

Mazes

<http://ericir.syr.edu/Projects/Newton/11/mazes.html>

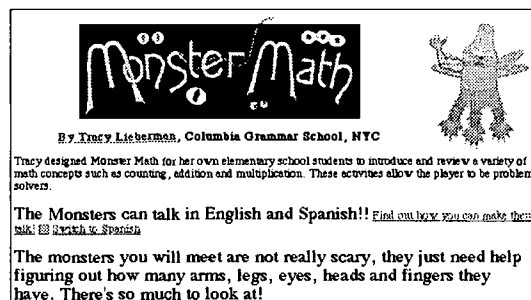

Mazes, from the Newton's Apple television show, provides classroom math activities for teaching students in grades 6–8 about mazes and topology.

Monster Math

<http://www.lifelong.com/CarnivalWorld/MonsterMath/MonMathHP.html>

Monster Math, for grades K–3, is an interactive online story in English and Spanish in which students answer the math questions to advance in the story. To begin, click on Let's Join the Monster Math Surprise Party!

Mortgage Calculator

http://www.hsh.com/mort_calc.html

Mortgage Calculator shows high school students how mortgage rates for loans are determined. Students enter the principal, interest, term, and beginning month and year. The mortgage calculator then calculates the monthly payment and the remaining loan balance.

National Budget Simulation

<http://garnet.berkeley.edu:3333/budget/budget.html>

National Budget Simulation, for high school students, is a project sponsored by the University of California, Berkeley, Center for Community Economic Research. The object of the simulation is to balance the current national budget using the data provided in the pop-up menus.

National Council of Teachers of Mathematics

<http://www.pbs.org/mathline/nctmhome.html>

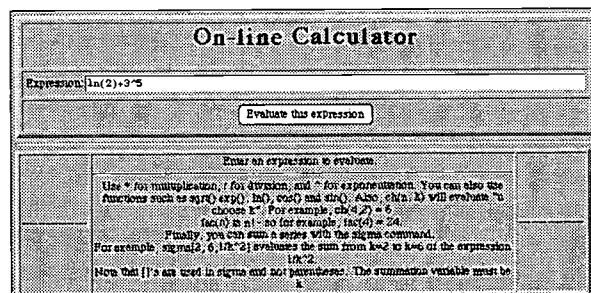

The **National Council of Teachers of Mathematics (NCTM)** is the largest professional organization for improving the teaching of mathematics at the K–12 grade levels.

On-Line Calculator

<http://www.math.sc Carolina.edu/cgi-bin/sumcgi/calculator.pl>

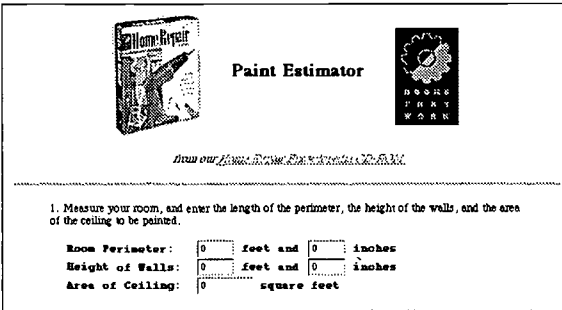

On-Line Calculator, for grades 4–12, is useful for basic operations in arithmetic and for advanced math calculations in geometry and trigonometry. Students can enter an expression they want to evaluate.

Paint Estimator

http://www.btw.com/applets/paint_calc.html

Paint Estimator, for grades 5–8, is adapted from the Home Repair Encyclopedia CD-ROM. The estimator calculates the exact amount of paint required to paint a room. Students first determine the area and perimeter of a room, adjusting for the number of doors and windows. The Paint Estimator then provides the correct answer.

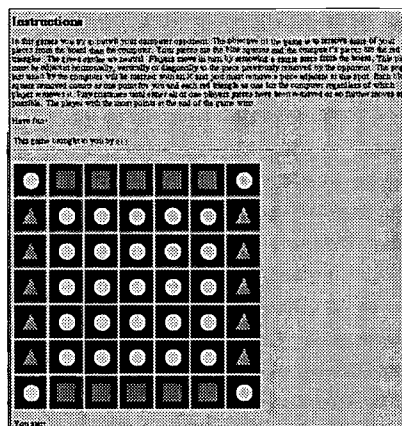

The applet interface for the Paint Estimator. It features a title bar with a paintbrush icon and the text "Paint Estimator". Below the title bar is a instruction box that reads: "1. Measure your room, and enter the length of the perimeter, the height of the walls, and the area of the ceiling to be painted." Below this are three input fields: "Room Perimeter:" with a value of 0, "Height of Walls:" with a value of 0, and "Area of Ceiling:" with a value of 0. Each field has a unit label: "feet and inches" for perimeter and height, and "square feet" for area.

Pegs

<http://www.bu.edu/htbin/pegs>

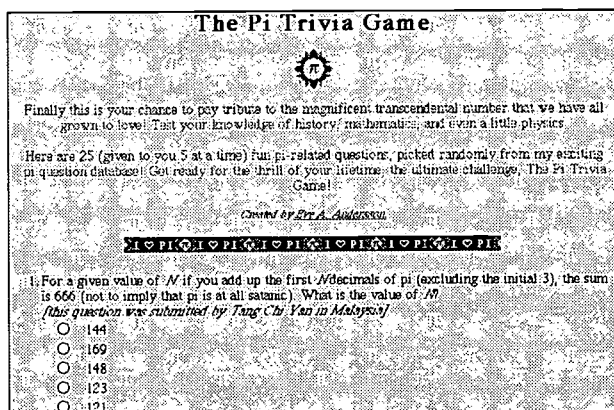

Pegs is an online game for students in grades 6–12. Students use their math reasoning skills to outwit their opponent, the computer. They win the game by removing more of their pieces from the board than the computer does.

Pi Trivia Game

<http://cid.com/~eveander/trivia/index.cgi>

Pi Trivia Game, for advanced placement classes, tests a student's knowledge of pi through an interactive format. There are 25 fun, pi-related multiple-choice questions accompanied by answers and explanations.

Pi-Search Page

http://www.aros.net/~angio/pi_stuff/piquery.html

Pi-Search Page, suitable for grades 8–12, helps students unravel the mystery of irrational numbers. Students can enter any number and determine its location in pi. For example, by choosing July 4, 1776, and entering 070476, students can find out where that set of numbers is in pi's unending sequence of digits.

BEST COPY AVAILABLE

Planet Earth Home Page

http://www.nosc.mil/planet_earth/info.html

Planet Earth Home Page is a virtual library of useful links to sites for math teachers and students in grades 9–12. Among these sites are World Population, Date and Time, and World Numbers.

Prime Page

<http://www.utm.edu/research/primes/>

Prime Page is a large collection of material about prime numbers, including the sieve of Eratosthenes, lists of prime numbers and factorizations, the Mersenne primes, and a general historical introduction to primes. The site is suitable for grades 8–12.

PTV Families (November/December 1995)

<http://www.pbs.org/rtl/nov-dec95/newsletter.html>

PTV Families (November/December 1995) provides a list of links containing K–3 math activities that can be used independently of the PBS television show. The activities include getting ready for numbers, math jobs, shapes, number puzzles, and others.

Puzzle Archive

<http://www.nova.edu/Inter-Links/puzzles.html>

Puzzle Archive, for middle school and high school math students, is an index of 24 categories of puzzles and brain teasers with answers categorized by subject. Some of the categories are arithmetic, cryptography, probability, and geometry.

Puzzle Corner

<http://204.161.33.100/Puzzle/puzzleList.html>

Puzzle Corner, from AIMS, is a list of monthly math puzzles for grades K–6. Students can request solutions by e-mail.

Puzzle of the Week

<http://www.wam.umd.edu/~panthera/pow.html>

Puzzle of the Week enables kids in grades 4–8 to e-mail their solutions to the puzzle. Correct answers are posted weekly.

Puzzle Page

<http://www.ditell.com/~ericward/puzzle.html>

Puzzle Page is a collection of math puzzles and riddles for students in grades 4–8. Kids can request the answers by e-mail.

Puzzles and Mind Teasers

<http://www.folkart.com/puzzle/puzzle.htm>

Puzzles and Mind Teasers features a monthly mind teaser for kids in grades 4–8. Answers can be submitted by e-mail. The previous month's puzzle and solution is provided. Students are also invited to submit their own brain teasers.

Quick and Easy Math Games

<http://www.hmco.com/hmco/school/math/res/parentbk/phs3.html>

Quick and Easy Math Games, developed by Houghton Mifflin for grades 3–6, contains more than a dozen simple and fun activities that can be used to develop younger students' enthusiasm for math. Some activities titles are: Guess My Number, Pattern Time, Pairs of 10, and Subtract From 100.

Refrigerator Math

<http://www.hmco.com/hmco/school/math/res/parentbk/phs5.html>

Refrigerator Math, provided by Houghton Mifflin for grades K–6, is a collection of math puzzles organized by grade level.

Refrigerator Math

Here are some puzzles you might like to do at home with your child. Try displaying the puzzles on the refrigerator so all family members can join in finding the solutions. (Cut off or cover the answers before you use the pages.) Show off your child's math accomplishments by hanging them prominently on the refrigerator.

Grade K

What is the pattern? Fill in the missing beads.

You can color them to show the pattern, too.

Resources and Ideas for Working With Your Child

<http://www.hmco.com/hmco/school/math/res/parentbk/phs2.html>

Resources and Ideas for Working With Your Child, from Houghton Mifflin, provides elementary teachers with a useful resource guide that contains instructional ideas and 11 math activities.

Saxon Publishers' Math Challenge

http://www.saxonpub.com/Math_Challenge.html

Saxon Publishers' Math Challenge is a series of weekly math problems for grades 6–12. Kids can click on either Math Teaser or Math Stumper to retrieve the problem. Solutions and an archive of previous problems are included.

Saxon Publishers'

Math Challenge

Welcome to the Saxon Publishers, Inc. Math Challenge area. We have made a few changes and are now offering two separate challenge problems. The first is called the Math Teaser, just to get you warmed up; and then for all of you Math Challenge veterans out there we now have the Math Stumper. Simply click on either icon below to try your luck!

Sphinx

<http://stud1.tuwien.ac.at/~e9226344/Themes/Puzzles/sphinx.html>

Sphinx offers a variety of math/logic puzzles sorted by category and levels of difficulty for grades 8–12. Some solutions are provided. Students can also contribute their own puzzles by e-mail.

Sprott's Fractal Gallery

<http://sprott.physics.wisc.edu/fractals.htm>

Sprott's Fractal Gallery is suitable for grades 6–12. Every day, it presents a new fractal that is automatically generated by the author, Julien C. Sprott. The site contains an archive of previous fractals and links to thousands of fractal patterns from other sources.

Synergetics on the Web: 3-D Geometry and the Visual Arts

<http://www.teleport.com/~pdx4d/synhome.html>

Synergetics on the Web: 3-D Geometry and the Visual Arts is an online presentation of Buckminster Fuller's creations, including the geodesic dome. The site is a useful resource for teachers and students in high school advanced placement math classes.

Tessellations Project

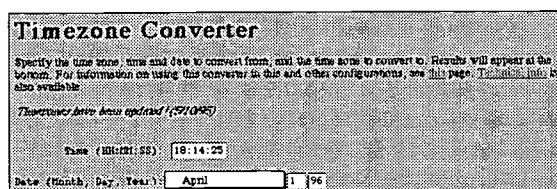

http://www.inform.umd.edu:8080/UMS+State/UMD-Projects/MCTP/Technology/School_WWW_Pages/Tessellations/TessellationHomePage.html

Tessellations Project is an index of geometric pattern drawings created by Carol Sulik's fifth-grade math students at Fairland Elementary School in Maryland.

Timezone Converter

<http://hibp.ecse.rpi.edu/cgi-bin/tzconvert>

Timezone Converter finds the local time in different places around the world. Students can enter the current date and time and select two time zones. The site integrates math and social studies and is useful in grades 8–12.

Tower of Brahma

<http://touchstonegames.com/brahma.cgi>

Tower of Brahma, for grades 3–12, is an ancient game (a.k.a., Tower of Hanoi) that requires math reasoning. Students choose from three to seven disks and follow the game's two simple playing rules: move one disk at a time and always place a larger disk underneath a smaller one.

http://www.touchstonegames.com." data-bbox="468 530 848 673"/>

21st-Century Problem Solving

<http://www2.hawaii.edu/suremath/home.shtml>

21st-Century Problem Solving, for high school math classes, contains a step-by-step procedure for solving math problems in algebra, physics, and chemistry. To find these problems, students scroll to an encyclopedia of solved problems and then click on Solved. The page includes links to sites related to teaching problem solving.

Universal Currency Converter

<http://www.xe.net/currency/>

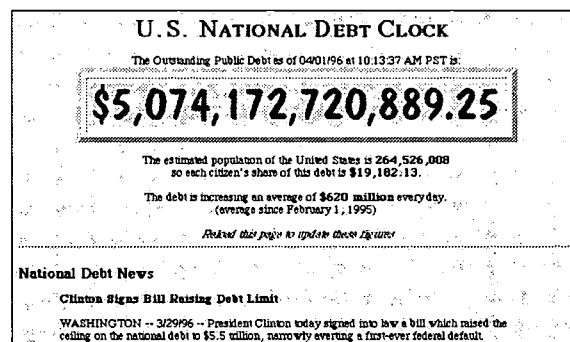

Universal Currency Converter includes simple instructions that allow middle school students to perform interactive foreign-exchange-rate conversions on the Internet.

U.S. National Debt Clock

http://www.brillig.com/debt_clock/

U.S. National Debt Clock displays the enormity of our national debt, which is increasing almost \$620 million every day. This site helps students in grades 9–12 understand the significance of gigantic numbers. There are links to other sites that discuss the national debt.

U.S. Naval Directorate of Time

<http://tycho.usno.navy.mil/time.html>

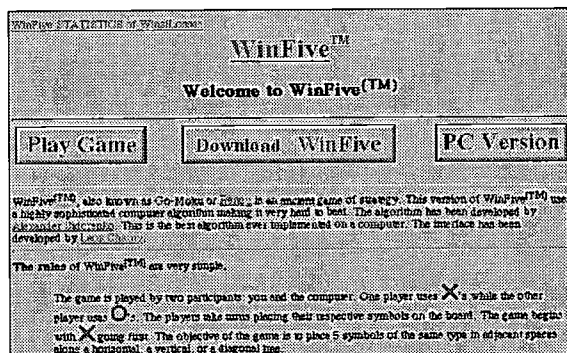

U.S. Naval Directorate of Time helps middle school students learn about the world's different time zones and how to convert time from one zone to another.

WinFive

<http://cad.bu.edu/personal/leon/winfive/index.html>

WinFive is an online version of the ancient game of strategy known as Go-Moku. It follows the same rules as tic-tac-toe but has a larger gameboard and requires five marks in a row to win. The activities are suitable for students in grades 3–12.

World Clock

<http://www.stud.unit.no/USERBIN/steffent/verdensur.pl?e>

World Clock contains a table where students can find the local time (updated every minute) for more than 100 places worldwide. Designed for students in grades 4–12, the site integrates social studies and math.

World of Escher

<http://www.texas.net/escher>

World of Escher contains a gallery of repeating geometric patterns of the more familiar Escher tessellations. The materials are useful for math teachers in grades 6–12.

Zini's Activity Page

<http://www.autobaun.com/~kbshaw/Zini/Zini.html>

Zini's Activity Page, from Zini Creations, provides more than 20 fun math activities for early childhood education.

Multisubjects

Academy One

<http://www.nptn.org/cyber.serv/AOneP/internet.html>

Academy One is an international online educational resource for teachers. It contains more than 500 lesson plans organized by subject and grade level. To find lesson plans for language arts, math, science, and social studies, click on Teacher at the top of the page and then select Curriculum Exchange.

AskERIC Virtual Library

<http://ericir.syr.edu/Virtual/>

AskERIC Virtual Library is an excellent source for hundreds of lesson plans covering all grade levels and subject areas. To find the lessons, click on AskERIC Lesson Plans.

Big Sky Lesson Plans

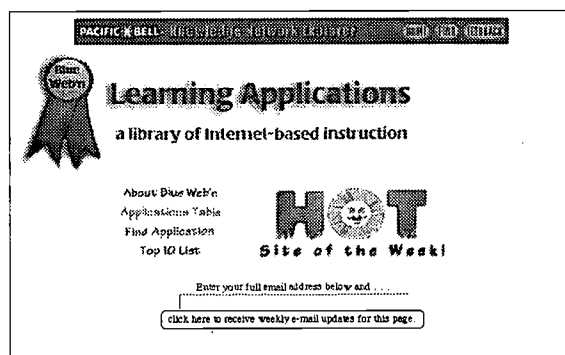

http://libfind.unLedu:2020/alpha/Big_Sky_Lesson_Plans.html

Big Sky Lesson Plans features a gopher menu from which to select a multitude of K-12 lesson plans for language arts, math, science, and social studies. To find the gopher menu, click on Big Sky Lesson Plans.

Blue Web'n Learning Applications

<http://www.kn.pacbell.com/wired/bluewebn/>

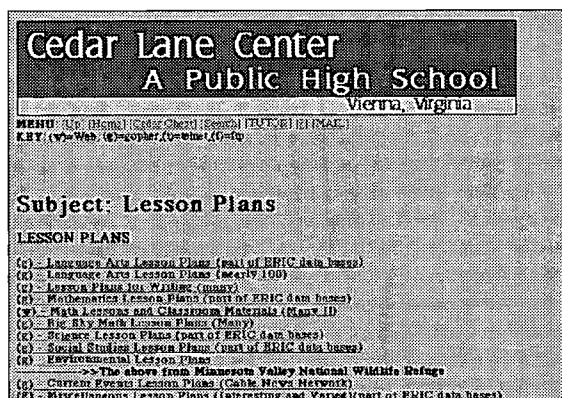

Blue Web'n Learning Applications, sponsored by Pacific Bell, presents a multitude of Web sites for students, teachers, and librarians. To find lesson plans and other teaching resources in the Blue Web'n Library, scroll to the Find Applications, select the appropriate entries from the pull-down menu, and click on the Search button. To find lessons, activities, projects, resources, references, and tools for many K-12 curriculum areas, scroll and click on relevant underlined words in the Applications Table.

Cedar Lane Center

<http://www.usgs.gov/cedar/lesson.html>

Cedar Lane Center, a public high school in Virginia, has compiled an assortment of lesson plans for language arts, math, science, the environment, social studies, current events, and other subject areas.

McRel Lesson Plans and Activities

<http://mcrel.org/connect/lesson.html>

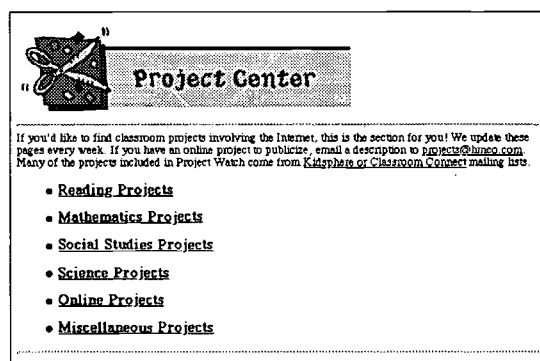

McRel Lesson Plans and Activities features a collection of lessons and activities for a variety of subject areas, including language arts, math, science, and social studies.

Project Center

<http://www.hmco.com/hmco/school/projects/index.html>

Project Center from Houghton Mifflin features various curricular activities involving the Internet. Many of these are from the Kidsphere or Classroom Connect mailing lists. The page is updated every week. You can post your own projects at projects@hmco.com.

Teachers Helping Teachers

<http://pacificnet.net/~mandel/index.html>

Teachers Helping Teachers is a source for lesson plans and suggestions contributed by teachers. It is updated weekly. To find the lessons, scroll to Teaching Ideas & Tips and select from topics that include Classroom Management, Language Arts, Science, Social Studies, the Arts, and Special Education.

Teacher Resource Center

<http://www.infi.net/~chazmo/tecn.htm>

Teacher Resource Center offers numerous sites containing lesson plans for a variety of subject areas. For example, scroll and click on Stephanie's Page of Lesson Plans to find K-12 plans for the environment, language arts, math, science, and social studies. Other lesson plan pages are available.

U.S. Department of Education

<http://www.ed.gov/>

U.S. Department of Education provides a variety of lesson plans for teachers and parents. Scroll and click on Publications and Products and select Publications for Parents to find a series of publications (lesson plans) for math, reading, history, school readiness, test taking, writing, library skills, and geography. A guide for homework is also available. Selected lesson plans are written in Spanish.

Welcome to Canadisk Online

<http://schoolnet.carleton.ca/cdisk/english.html>

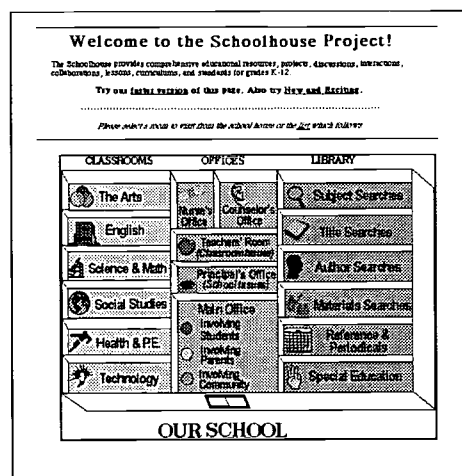

Welcome to Canadisk Online contains more than 25 lesson plans for teaching social studies, science, and language arts. Although the lesson plans were designed for Canadian studies, they can be easily adapted for use in any classroom. To find the lesson plans, click on Canadisk Lesson Plans and Class Projects. Click on Francais for the French version.

Welcome to the Schoolhouse Project

http://www.nwrel.org/school_house/

Welcome to the Schoolhouse Project provides comprehensive educational resources including lesson plans in language arts, science, math, and social studies for grades K-12.

Music

Cable in the Classroom

<http://www.muchmusic.com/events/cable/cable.html>

Cable in the Classroom is based on telecasts produced for high school students to encourage critical thinking as it relates to music. To find a series of lesson plans that can be used independently of the telecasts, scroll to MuchMusic Lesson Plans.

ERIC Music Gopher Menu

<gopher://ericir.syr.edu:70/11/Lesson/SLMAM/Curriculum/Music>

ERIC Music Gopher Menu contains lesson plans for students in grades 7–12. Topics include ethnic folk dancing, rock and roll, and St. Patrick's sing-a-long.

Music Educator's Home Page

<http://www.athenet.net/~wslow/>

Music Educator's Home Page is an Internet resource where teachers can find music curriculum materials and links to other relevant sites. Scroll and select Curriculum Resources. Then click on Curriculum Documents and Lesson Plans to find links to documents from the Kaukauna (Wisconsin) Area School District Music Department. These documents can be downloaded and used with students in grades 5–12.

Music Educators' Lesson Plan Resources

<http://www.gnatnet.net/~jjbrenan/MusicLessons.html>

Music Educators' Lesson Plan Resources is a forum where music educators can share lesson plans and ideas.

"It may not be as large as you think"

"This the mother of THEM all"

Classical Music

<http://weber.u.washington.edu/~sbode/classical.html>

Classical Music contains links to biographical information on and pictures of classical composers. The site is suitable for music students in grades 6–12.

ClassicalNet Home Page

<http://www.webcom.com/~music/welcome.html>

ClassicalNet Home Page for grades 5–12 provides a wide array of resources about classical music. The site includes a list of recommended CDs, biographical data about famous composers, and related Web links.

Classics World

<http://www.classical.net1/>

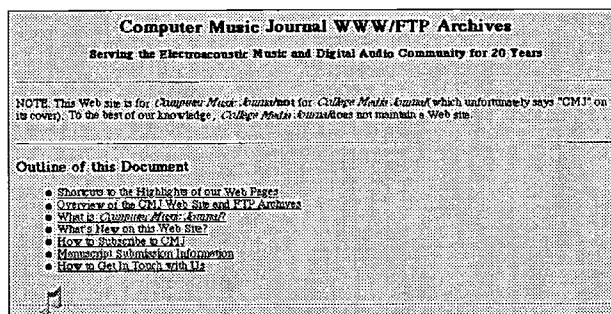

Classics World is a comprehensive guide to information on classical music. The site, appropriate for grades 5–12, features biographies of renowned performers and composers, synopses of famous operas, and the RCA Victor Beginner's Guide, which contains the top 50 classical pieces.

Computer Music Journal

<http://www.mitpress.mit.edu/Computer-Music-Journal/>

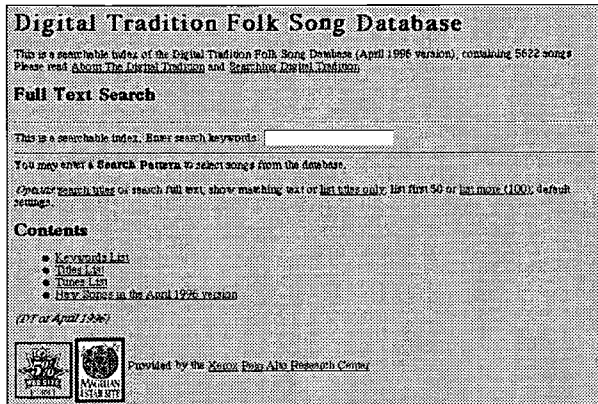

Computer Music Journal contains information on music-related books, documents, and resources. Scroll to the table under Shortcuts to find links to current issues of the journal and to Web sites on music, sound archives, and miscellaneous documents.

Digital Tradition Folk Song Database

<http://pubweb.parc.xerox.com/digitrad/>

Digital Tradition Folk Song Database, appropriate for grades K–12, provides the largest online collection of words and music for thousands of folk songs. You can search by title, full text, or keyword for your favorite American folk songs. For example, enter Yankee Doodle for the keyword, and you will find the song title Yankee Doodle 13th on the list. Select it and click on Audio to hear the tune.

Franklin Institute Music Hotlist

<http://sln.fi.edu/tfi/hotlists/music.html>

Franklin Institute Music Hotlist includes links to a series of music topics for grades K–12. These include opera, classical, jazz, reggae, instruments, string instruments, Gregorian chant, teacher resources, and more.

Internet Music Resource Guide

<http://www.teleport.com/~celinec/music.shtml>

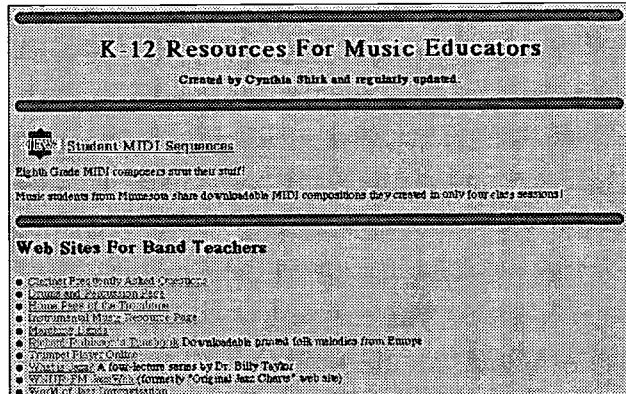

Internet Music Resource Guide features links to a variety of music resources, including bands and artists, magazines, and search sites. For an extensive list of everything musical on the Web, click on General Sites.

K-12 Resources for Music Educators

<http://www.isd77.k12.mn.us/resources/staffpages/shirk/cindys.page.k12.link.html>

K-12 Resources for Music Educators provides links to Web sites for band, orchestra, choral, and classroom teachers. The page also includes information on MIDI resources, music newsgroups, and commercial materials, as well as links to sites with biographies and works of composers such as Bach, Beethoven, and Mozart.

Looney Tunes Karaoke

<http://www.kids.warnerbros.com/karaoke/>

Looney Tunes Karaoke, from Warner Brothers, contains 10 popular songs that kids in grades K-3 can sing, hear, and read.

Mammoth Music Meta-List

<http://pathfinder.com/@@0JMkM4O69QEAQJ24/vibe/mmm/music.html>

Mammoth Music Meta-List contains a list of more than 40 categories with links to more than 500 music-related Web sites.

Mark Corey's Music Stuff

<http://www.mcs.net/~mcorey/mustuf.htm>

Mark Corey's Music Stuff is a large collection of information on Web sites for band, orchestra, and choir directors, as well as musicians and music educators.

Marsalis on Music

<http://www.wnet.org/mom/homepage.html>

Marsalis on Music is a television series on PBS funded by the Texaco and Sony Corporations. The site introduces students in grades 6–12 to the fundamental elements of music. To find activities that accompany four of the TV programs, scroll and click on the Music Educator's Guide.

Music Education Online

<http://www.geocities.com/Athens/2405/index.html>

Music Education Online is a guide to music for students in grades K–12. It is designed to help music educators connect to different educational resources on the Internet and to interactive bulletin boards. Scroll and click on Music Education Links to find links to Instrumental Music, Choral, General, Music Education, Music Institutes, and Music Products.

National Coalition for Music Education

http://www.electricti.com/namm/opus/save_music_education.html

National Coalition for Music Education, sponsored by four major music organizations, undertakes the responsibility of preserving K-12 music education in the United States. For links to music resources, scroll to Related Links.

Online Music Instruction

<http://orathost.cfa.ilstu.edu/public/KenFansler/onlinemusicpage.htm>

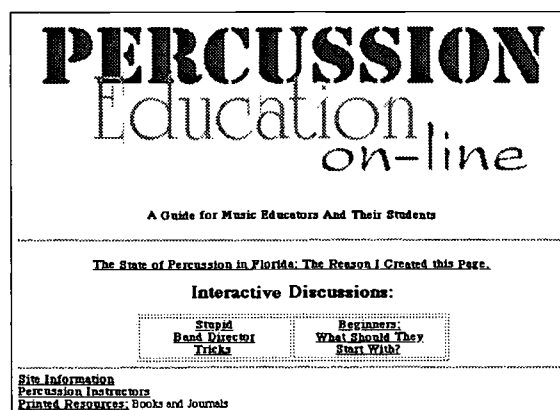

Online Music Instruction is an interactive resource for high school students. It covers notation and harmonic theory, with links to other music resources.

Percussion Education Online

http://otto.cmr.fsu.edu/~bula_jo/percussion/

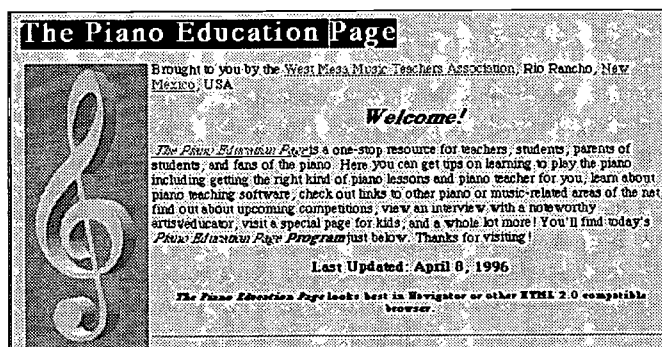

Percussion Education Online is a guide for high school music educators and students. It contains practical information on learning the basics of playing nonpitched and pitched concert instruments.

Piano Education Page

<http://www.unm.edu/~loritaf/pnoedmn.html>

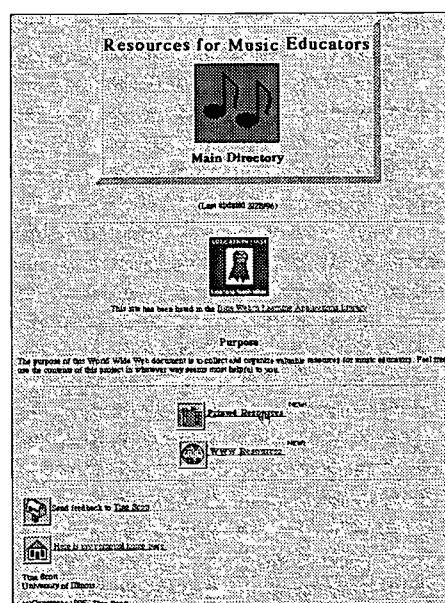

Piano Education Page is a resource for teachers, students, parents, and others interested in the piano. This page contains tips on learning to play the piano, finding the right piano teacher, and getting information on music software. Links to other music-related sites are provided. A list of piano competitions and interviews with noteworthy artists is also included.

Resources for Music Educators

<http://www.ed.uiuc.edu/music-ed/home.html>

Resources for Music Educators lists resources useful for teachers. Scroll and click on Printed Resources to access a bibliography of print materials for subjects including music teacher preparation, vocal music, music for special learners, early childhood music instruction, and general music. To find additional music education resources for grades K-12, click on WWW Resources.

BEST COPY AVAILABLE

School House Rock

<http://hera.life.uiuc.edu/rock.html>

School House Rock features rock lyrics about school subjects typically taught in grades 3–6. From these lyrics, students can learn about grammar rules, history, governments, multiplication tables, and science. Videotapes and CDs that accompany the lyrics are available for purchase.

Sibelius Academy Music Resources

<http://www.siba.fi/Kulttuuripalvelut/music.html>

Sibelius Academy Music Resources is a vast reservoir of links to music Web sites that include information on jazz, famous composers, gospel, instruments, libraries, and archives.

Welcome to the American Music Conference Internet Service

<http://tmn.com/Oh/Artswire/www/AMC/AMC.html>

Welcome to the American Music Conference (AMC) Internet Service is a site sponsored by the AMC, a national organization dedicated to the promotion of music, music education, and music-making. The site is intended for the general public. Scroll and click on AMC Music Links to find a wide variety of music education resources on the Internet.

Welcome to the World's Greatest Music

<http://www.worldsgreatestmusic.com/>

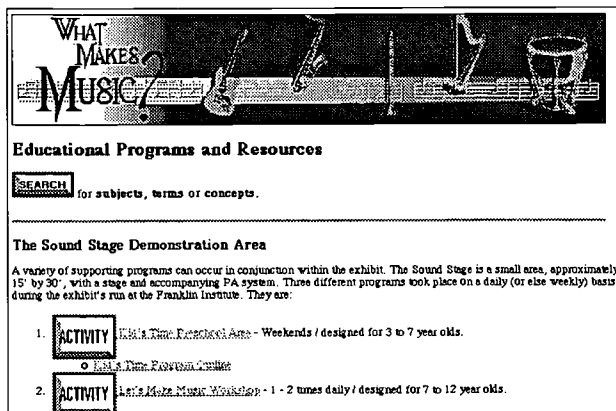

Welcome to the World's Greatest Music, for grades 6–12, offers 30 short biographical notes on and sketches of famous composers, including samples of their music.

What Makes Music? Educational Programs and Resources

<http://sln.fi.edu/~helfrich/music/programs.html>

What Makes Music? Educational Programs and Resources, from the Franklin Institute Science Museum, contains online activities and resources for grades K–8. Scroll to Educational Resources and click on What Makes Music? Exhibit Teacher's Guide to find 14 classroom activities. Click on Classroom Music-Related Lessons for additional lessons from the ERIC gopher server.

WHAT MAKES MUSIC?

Educational Programs and Resources

SEARCH for subjects, terms or concepts.

The Sound Stage Demonstration Area

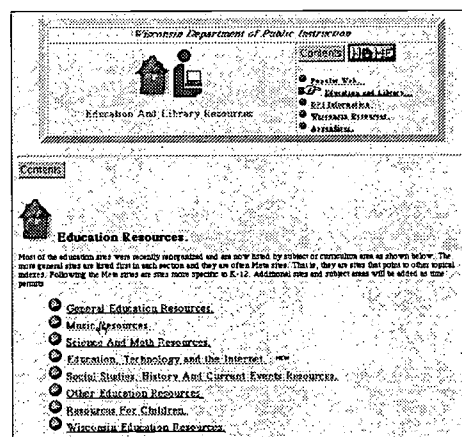

A variety of supporting programs can occur in conjunction within the exhibit. The Sound Stage is a small area, approximately 15' by 30', with a stage and accompanying PA system. Three different programs took place on a daily (or else weekly) basis during the exhibit's run at the Franklin Institute. They are:

- ACTIVITY** **What's The Rhythm Game** - Weekends / designed for 3 to 7 year olds.
- ACTIVITY** **Let's Make Music Workshop** - 1 - 2 times daily / designed for 7 to 12 year olds.

Wisconsin Education and Library Resources

http://badger.state.wi.us/agencies/dpi/www/ed_lib.html#music

Wisconsin Education and Library Resources contains educational Web sites listed by subject and curriculum area. They are meta-sites that link to other topical indexes of material suitable for grades K–12. To find these links, scroll and click on Music Resources and Selected Music Resources.

Wisconsin Department of Public Instruction

Education And Library Resources

Contents

- Public Web
- Education and Library
- ELI Index
- Wisconsin Resources
- Resources

Education Resources

Most of the education sites were recently integrated and are now listed by subject or curriculum area as shown below. The more general sites are listed first in each section and they are often more sites. That is, they are sites that point to other topical subjects. Following the more general sites are sites more specific to K-12. Additional sites and subject areas will be added as time permits.

- General Education Resources
- Music Resources
- Science And Math Resources
- Education, Technology, and the Internet
- Social Studies, History And Current Events Resources
- Other Education Resources
- Resources For Children
- Wisconsin Education Resources

World Band

<http://co-nect.bbn.com/WorldBand/CoNECTMusic.html>

World Band, a Co-NECT music project for grades 6–12, consists of participant schools around the world, each equipped with a MIDI synthesizer studio that enables each school to transmit musical compositions to the other school sites. Using the Internet, students collaborate on such topics as music composition, sequencing, improvisation, and ear training.

Worldwide Internet Music Resources

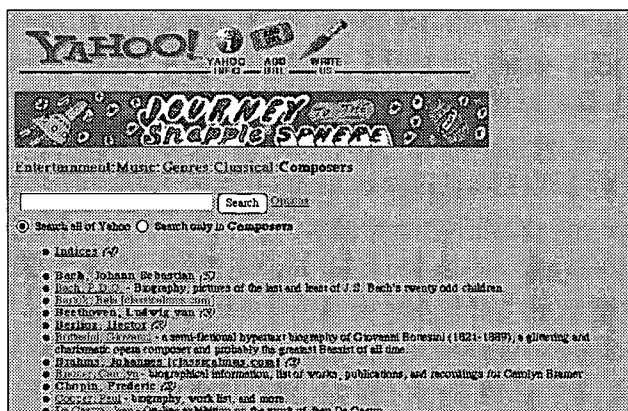

http://www.music.indiana.edu:80/music_resources

Worldwide Internet Music Resources includes links to a variety of music-related topics, including individual musicians, groups and ensembles, composers and composition, genres and types of music, research and study, the music industry, and electronic journals and magazines.

Yahoo Classical Composers

<http://www.yahoo.com/Entertainment/Music/Genres/Classical/Composers/>

Yahoo Classical Composers introduces students in grades 5–12 to numerous composers, including Bach and Mozart. Click on a composer's name to find biographical information, pictures, and descriptions of the composer's work.

Science

Access Excellence Activities Exchange

<http://outcast.gene.com/ae/AE/AEC/AEF/>

Access Excellence Activities Exchange is an archive containing more than 120 favorite classroom activities submitted by high school biology and life sciences teachers participating in the program.

Beakman's Electric Motor

<http://fly.hiwaay.net:80/~palmer/motor.html>

Beakman's Electric Motor provides simple illustrated directions for showing kids in grades 4–8 how to make an electric motor from ordinary household items.

Big Sky Science Gopher Menu

gopher://bvsd.k12.co.us:70/11/Educational_Resources/Lesson_Plans/Big%20Sky/science

Big Sky Science Gopher Menu provides more than 200 science lesson plans for grades K–12. Among its topics are color mixing, orbital paths, soil erosion, blood circulation, bird study, and crystals.

BEST COPY AVAILABLE

Bill Nye, the Science Guy

<http://nyelabs.kcts.org/>

Bill Nye, the Science Guy, provides a series of hands-on science activities and experiments for grades 4–8. Find the experiments by clicking on Demo of the Day.

Center of Excellence for Science and Mathematics Education

<http://192.239.146.18/>

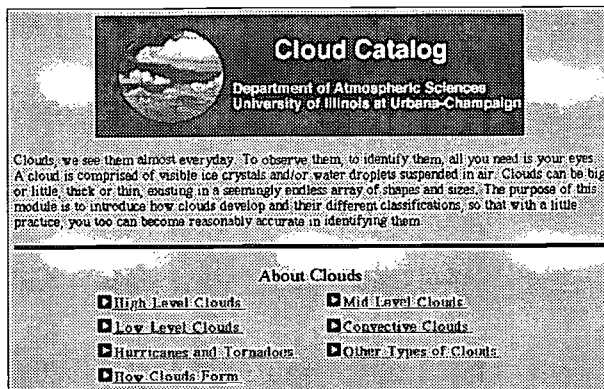

The Center of Excellence for Science and Mathematics Education (CESME), located at the University of Tennessee in Martin, has developed a physical science guide that contains 34 experiments and activities for teachers in grades 4–8. To open the science guide, scroll and click on the Activity Manual for Physical Science Teachers. Topics include the learning cycle, density, physical and chemical properties, Newton's three Laws, and air pressure.

Cloud Catalog

<http://covis.atmos.uiuc.edu/guide/clouds/html/cloud.home.html>

Cloud Catalog, from the University of Illinois Department of Atmospheric Sciences, features classroom activities, background information, pictures, and descriptions of the different cloud formations. The resources are suitable for grades 3–8.

Dem Dry Bones

<http://www.cs.brown.edu/people/oa/Bin/skeleton.html>

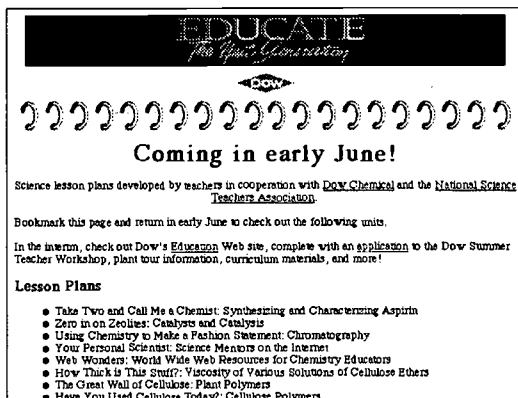

Dem Dry Bones is an interactive skeleton that helps kids in grades K–12 learn the names of the major bones and find out where they are connected. To hear a seven-year-old girl say “metatarsal bones,” click on the skeleton’s left foot. When an enlargement of the foot appears, click again on the foot.

EDUCATE: The Next Generation

<http://thechalkboard.com/NSTA.html>

EDUCATE: The Next Generation provides science lesson plans for grades 9–12. The plans were developed by teachers in cooperation with Dow Chemical and the National Science Teachers Association.

EDUCATE
The Next Generation

Coming in early June!

Science lesson plans developed by teachers in cooperation with Dow Chemical and the National Science Teachers Association.

Bookmark this page and return in early June to check out the following units.

In the interim, check out Dow's [Education](#) Web site, complete with an [application](#) to the Dow Summer Teacher Workshop, plant tour information, curriculum materials, and more!

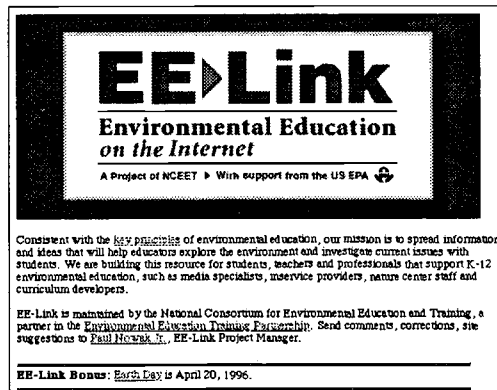

Lesson Plans

- Take Two and Call Me a Chemist: Synthesizing and Characterizing Aspirin
- Zero in on Zeolites: Cashmere and Catalysts
- Using Chemistry to Make a Fashion Statement: Chromatography
- Your Personal Scientist: Science Meets on the Internet
- Web Wonders: World Wide Web Resources for Chemistry Educators
- How Thick is This Stuff: Viscosity of Various Solutions of Cellulose Ethers
- The Great Wall of Cellulose: Plant Polymers
- Have You Used Cellulose Today?: Cellulose Polymers

EE Link: Environmental Education on the Internet

<http://nceet.snre.umich.edu/>

EE Link: Environmental Education on the Internet is an online project created by the National Consortium for Environmental Education and Training. It is appropriate for students in grades K–12. Scroll to Classroom Resources and click on Activities to find links to an assortment of lesson plans, ideas, and activities, including air quality and climate change, toxics and waste management, and online animal tracks.

EE▶Link
Environmental Education
on the Internet

A Project of NCEET ▶ With support from the US EPA 

Consistent with the key principles of environmental education, our mission is to spread information and ideas that will help educators explore the environment and investigate current issues with students. We are building this resource for students, teachers and professionals that support K-12 environmental education, such as media specialists, inservice providers, nature center staff and curriculum developers.

EE-Link is maintained by the National Consortium for Environmental Education and Training, a partner in the [Environmental Education Training Partnership](#). Send comments, corrections, site suggestions to [Paul Horvath, Jr.](#), EE-Link Project Manager.

EE-Link Bonus: [Earth Day](#) is April 20, 1996.

BEST COPY AVAILABLE

Elementary Science This Month

<http://lmewww.mankato.msus.edu/ci/elem.sci.html>

Elementary Science This Month, published by the Mankato State University College of Education in Minnesota, is a monthly online magazine containing science activities and experiments for K–6 students.

Energy Quest

<http://www.energy.ca.gov/energy/education/eduhome.html>

Energy Quest, from the California Energy Commission, provides a sizeable collection of activities, organized by difficulty levels, for teaching about energy in grades K–12. To find these activities, scroll and click on Energy Science Projects, Percy's Puzzles, and Poor Richard's Energy Almanac. Other topics are also available.

ERIC Science Gopher Menu

[gopher://eric.syr.edu:70/11/Lesson/Subject/Science](http://eric.syr.edu:70/11/Lesson/Subject/Science)

ERIC Science Gopher Menu contains more than 100 teacher-contributed lesson plans for grades K–12. Each lesson plan includes an overview, purpose, objectives, activities, and resource materials.

Exploratorium Science Snackbook

<http://www.exploratorium.edu/publications/Snackbook/Snackbook.html>

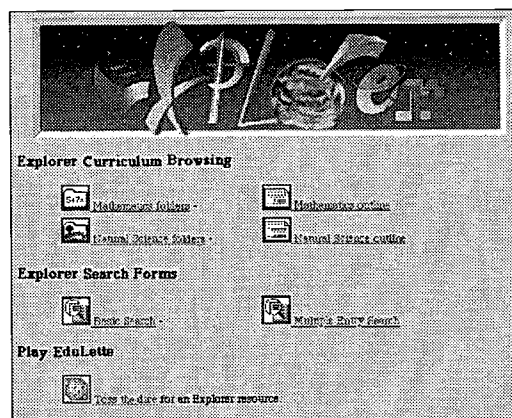

Exploratorium Science Snackbook contains 20 sample online activities and experiments designed by science teachers for grades 4–12. The activities, adapted from a science book published by the Exploratorium Museum in San Francisco, include blue sky, charge and carry, Doppler effect, and electroscope.

Explorer Home Page

<http://unite2.tisl.ukans.edu/>

Explorer Home Page is a large collection of science lesson plans and activities for grades K–12. The lesson plans include material on general science, natural science, life science, physical science, earth science, and other common science themes. To find the plans, click on the Natural Science folders.

Florida Aquarium

<http://www.sptimes.com/aquarium/default.html>

Florida Aquarium is an online interactive exhibit about marine life for grades K–12. Select Hands On to find related lessons and activities.

Galileo

<http://www-hpcc.astro.washington.edu/scied/galileo.html>

Galileo is an extensive collection of more than 100 science lesson plans for grades K–12. Topics include ball bounce, potential and kinetic energy discoveries, animals and their habitats, mining a chocolate chip cookie, wind activities, and many others.

Heart Preview Gallery

<http://sln2.fi.edu/biosci/preview/heartpreview.html>

Heart Preview Gallery, created by the Franklin Institute Science Museum, presents an online interactive tour showing how the heart works. It is accompanied by activities suitable for grades 4–8. To find the lesson plans and activities, click on Learn and Do in the picture of the heart. To start the online tour, click on Begin Your Tour of the Heart.

How Light Works

http://curry.edschool.Virginia.EDU/murray/Light/How_Light_Works.html

How Light Works contains six activities that explain the major concepts and properties of light. It is suitable for grades 4–5. The activities include white light, light spectrum, rainbow, and refraction.

Hurricane: Storm Science

<http://www.miamisci.org/hurricane/>

Hurricane: Storm Science, from the Miami Museum of Science, is an online bilingual (English/Spanish) exhibit. Suitable for students in grades K–6, it contains activities about hurricanes.

Impact of Shoemaker-Levi 9 Lesson Plan

<http://www.smplanet.com/science/science.html>

Impact of Shoemaker-Levi 9 Lesson Plan contains an online unit of space and astronomy activities for middle school students.

 **SMALL PLANET COMMUNICATIONS**

Lesson Plan: The Impact of Shoemaker-Levy 9

 In July 1994 twenty-one fragments of Comet Shoemaker-Levy 9 smashed violently into the planet Jupiter. Astronomers, both professional and amateur, eagerly anticipated and prepared for the event for months in advance, and the data gathered from the impact continues to be analyzed. The following lesson plan outlines a guided research activity in which your students can use the Internet to learn about the Shoemaker-Levy 9 event. Astronomy and space exploration are topics about which there is an enormous amount of information available on the Internet. As your students work through this activity, they will be introduced to a few of these resources and gain a starting point for future research.

John Muir Day Study Guide

http://www.sierraclub.org/john_muir_exhibit/john_muir_day_study_guide/

John Muir Day Study Guide contains K-12 lessons and activities about conservation and John Muir. To find these lessons, scroll to Contents.

John Muir Exhibit

John Muir Day Study Guide

"When we try to push out anything by itself, we find it hatched to everything else in the universe."
— John Muir, 1838-1914

John Muir Day - April 21

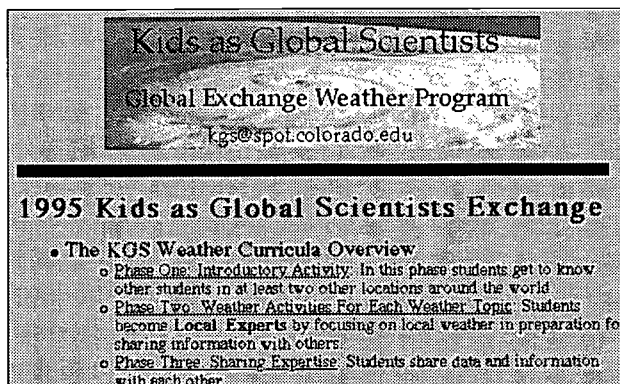

Celebrating a Lifetime of Conservation

"The Conservation movement shall proclaim April 21st to be 'John Muir Day'."

Kids as Global Scientists

http://stripe.colorado.edu/~kgshtml/KGS_Cur.html

Kids as Global Scientists contains classroom lessons and activities appropriate for grades 3–6. Students can exchange weather information online.

Kids as Global Scientists
Global Exchange Weather Program
kgs@spot.colorado.edu

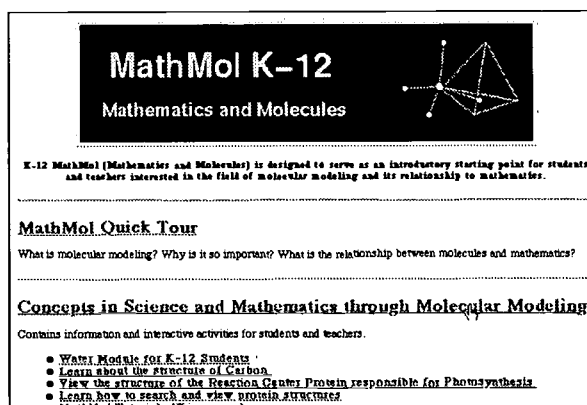

1995 Kids as Global Scientists Exchange

- **The KGS Weather Curricula Overview**
 - **Phase One: Introductory Activity:** In this phase students get to know other students in at least two other locations around the world.
 - **Phase Two: Weather Activities For Each Weather Topic:** Students become **Local Experts** by focusing on local weather in preparation for sharing information with others.
 - **Phase Three: Sharing Expertise:** Students share data and information with each other.

MathMol K–12: Mathematics and Molecules

http://cwis.nyu.edu/pages/mathmol/K_12.html

MathMol K–12: Mathematics and Molecules serves as an starting point for grade K–12 students and teachers interested in learning about the field of molecular modeling and its relationship to mathematics. Click on Concepts in Science and Mathematics Through Molecular Modeling to find interactive online activities, including ones related to the properties of water, the chemistry of carbon, and photosynthesis.

MathMol K–12
Mathematics and Molecules

K-12 MathMol (Mathematics and Molecules) is designed to serve as an introductory starting point for students and teachers interested in the field of molecular modeling and its relationship to mathematics.

MathMol Quick Tour
What is molecular modeling? Why is it so important? What is the relationship between molecules and mathematics?

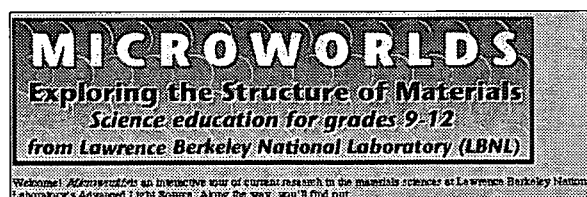

Concepts in Science and Mathematics through Molecular Modeling
Contains information and interactive activities for students and teachers.

- [Water: Module for K-12 Students](#)
- [Learn about the Structure of Carbon](#)
- [View the Structure of the Reaction Center Protein responsible for Photosynthesis](#)
- [Learn how to search and view protein structures](#)
- [MathMol Tutorials \(K-12 version\)](#)

Microworlds: Exploring the Structure of Materials

<http://www.lbl.gov/MicroWorlds/index.html>

Microworlds: Exploring the Structure of Materials is an interactive tour of current research in the materials sciences at Lawrence Berkeley National Laboratory's Advanced Light Source. To start your tour, scroll and click on Contents to find online lessons appropriate for students at the high school level.

MICROWORLDS
Exploring the Structure of Materials
Science education for grades 9-12
from Lawrence Berkeley National Laboratory (LBNL)

Welcome! *Admission:* An interactive tour of current research in the materials sciences at Lawrence Berkeley National Laboratory's Advanced Light Source. Along the way, you'll find out:

Missouri Botanical Garden

<http://cissus.mobot.org/MBGnet/>

Missouri Botanical Garden (MBG) is a rich source of classroom lessons, activities, and projects for grades 2–8. The site includes kids' HyperStudio presentations and online collaborations.

Mrs. Greene's Science Page

<http://linchome.sw2.k12.wy.us/ShirleyG/GreenePage.html>

Mrs. Greene's Science Page, created by Shirley Greene, a seventh-grade science teacher, includes activities and demonstrations for middle school students. To find these activities, click on Mrs. Greene's Favorite Science Activities.

NASA and the California Institute of Technology Jet Propulsion Laboratory

<http://www.jpl.nasa.gov/>

NASA and the California Institute of Technology Jet Propulsion Laboratory (JPL) offers classroom resources suitable for use in grades K–12. To find lesson plans for earth and space science, scroll and click on Where to Find It, which takes you to the JPL Web Index. Then select the letter T in the Index and click on Teacher Resources.

NASA Goddard Space Flight Center (GSFC)

<http://pao.gsfc.nasa.gov/gsf.html>

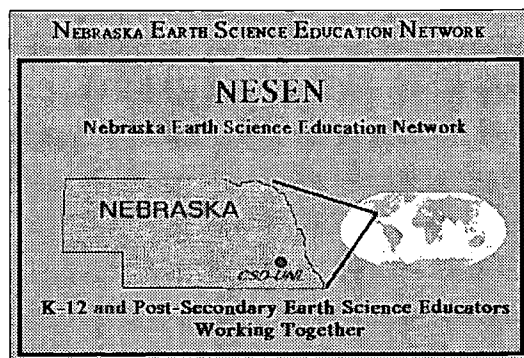

NASA Goddard Space Flight Center (GSFC) contains a collection of space-related lesson plans and activities for teaching kids at all grade levels. Select Education Programs and click on Programs for K–12 for lesson materials and on Science Question of the Week for a question-and-answer forum.

Nebraska Earth Science Education Network

<http://nesen.unl.edu/>

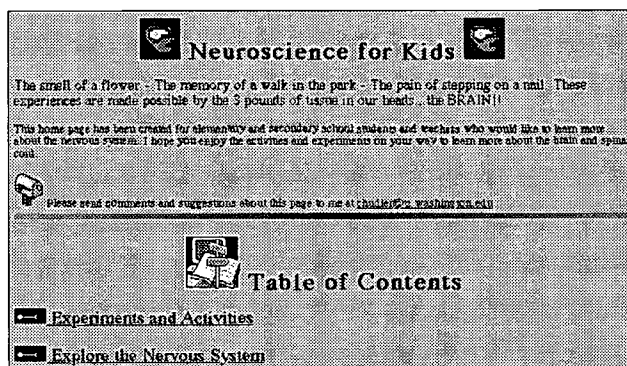

Nebraska Earth Science Education Network (NESEN) provides lesson plans and activities contributed by K-12 preservice teachers. To find the material, scroll and click on Earth Science Activities and Lesson Plans, which are organized by topic. To find 63 experiments, click on Science Methods (UNL) Demos/Activities.

Neuroscience for Kids

<http://weber.u.washington.edu/~chudler/neurok.html>

Neuroscience for Kids is created for elementary and secondary school students and teachers. It is designed to help students learn more about the nervous system. Click on Experiments and Activities to find eight topic categories, each of which contains numerous experiments and activities. This site also includes information on Internet neuroscience resources that provide more classroom experiments and list neuroscience books for kids and teachers.

New ERIC Science Gopher Menu

<gopher://ericir.syr.edu:70/11/Lesson/NewLesson/Science>

New ERIC Science Gopher Menu, for grades K-12, contains 25 teacher-contributed lesson plans. Each lesson plan includes an overview, purpose, objectives, activities, and resource materials.

Newton's Apple

<http://ericir.syr.edu/Projects/Newton/13/>

Newton's Apple contains an educational materials packet for grades 5–8. The material is based on the television series of the same name. Click on Season 13 Lesson Plans to find 25 science lessons on a variety of topics ranging from reflexes to jungle survival. For an additional 75 lesson plans, click on Past Three Seasons. For classroom and home experiments, select Science Try It. Lesson plans and experiments can be used independently of the television program.

Welcome to the NEWTON'S APPLE Educational Materials packet.

These materials were developed to help you use the 13th season of NEWTON'S APPLE in your classroom.

NSTA's Scope, Sequence, & Coordination Project

http://www.gsh.org/nsta_ssandc/

NSTA's Scope, Sequence, & Coordination (SS&C) Project contains more than 80 science microunits for grades 9–12. The units cover biology, chemistry, earth/space, and physics. To find the microunits, click on Explore the SS&C.

NSTA's Scope, Sequence & Coordination Project

A PROJECT OF THE NATIONAL SCIENCE TEACHERS ASSOCIATION

Explore the SS&C
site and the National Science Education Standards with detailed explanations of the Content Standards, listings of applicable concepts, laws, and theories, and materials presented as Micro-Units designed to achieve the NSE. Standards offered for download and free use in your science class.

Browse the SS&C
site and preview the individual science Micro-Units arranged within grade level by Content Standards and sub-topics of the NSE.

Search the SS&C
site using a simple keyword search to quickly locate specific Micro-Units.

Optics for Kids

<http://www.opticalres.com/kidoptx.html#StartKidOptx1>

Optics for Kids contains activities, experiments, and a selected bibliography for understanding the basics of light and lasers. The materials are appropriate for students in grades 5–8.

Project Galileo: Bringing Jupiter to Earth

<http://www.jpl.nasa.gov/galileo/>

Project Galileo: Bringing Jupiter to Earth is sponsored by NASA and managed by the Jet Propulsion Laboratory in Pasadena, California. The development and operations of the Galileo probe are the responsibility of NASA's Ames Research Center in Mountain View, California. To find an assortment of lessons and activities on the spacecraft probe, scroll and select Online From Jupiter and click on Featured Activities, Resources for Learning and Photo Gallery. These resources are suitable for use in grades 5–12.

Questacon

<http://sunsite.anu.edu.au/Questacon/index.html>

Questacon, the world's leading hands-on science and technology museum, is located in Canberra, Australia. Click on Hands-on Zone for K-6 online science activities, and click on Kidspace to find K-3 interactive dinosaur activities.

Science Activities

<http://sln.fi.edu/tfi/activity/act-summ.html>

Science Activities, from the Franklin Institute, is a collection of nearly 30 K-8 science activities arranged by subject and grade level. Activity topics include heartbeat, the earth bowl, ocean in a bottle, clear as crystal, and spinning satellites.

Science Gopher Menu From ERIC

[gopher://ericir.syr.edu:70/11/Lesson/Subject/Astronomy](http://ericir.syr.edu:70/11/Lesson/Subject/Astronomy)

Science Gopher Menu From ERIC contains a six-week, online astronomy unit with 30 lesson plans for grades 4-6.

Science Mini-Lessons (K-5)

http://www.nptn.org:80/cyber.serv/AOneP/academy_one/teacher/cec/cecsai/sci-elem.html

Science Mini-Lessons (K-5), from Academy One, provides 130 science lesson plans for elementary school students. Lessons cover a variety of topics, including microscope use, constellation mapping, water pollution, owl pellets, and the transformation of caterpillars into butterflies.

Science Mini-Lessons (6–8)

http://www.nptn.org:80/cyber.serv/AOneP/academy_one/teacher/cec/cecsci/sci-interm.html

Science Mini-Lessons (6–8), from Academy One, features 60 science lesson plans for many science topics covered in middle schools. Among these are weather forecasting, photosynthesis, building a psychrometer, and ph and solvent activities.

Science Mini-Lessons (9–12)

http://www.nptn.org:80/cyber.serv/AOneP/academy_one/teacher/cec/cecsci/sci-high.html

Science Mini-Lessons (9–12), from Academy One, offers 22 science lesson plans suitable for the high school level. The plans include chemistry magic, a parallax experiment with candles, and a magnetic fields activity.

Science Teacher's Resources

<http://198.110.10.57/Chem/EastSciRes.html>

Science Teacher's Resources provides high school science teachers with demonstrations, laboratory investigations, and teaching tips. The site includes resources for chemistry, biology, life science, and physics.

Smithsonian Office of Elementary and Secondary Education Home Page

<http://educate.si.edu/intro.html>

Smithsonian Office of Elementary and Secondary Education Home Page (OESE) provides lesson plans integrating science, language arts, and other subjects in the curriculum. To find the online science lessons, click on Curriculum Materials, scroll, and select Art to Zoo Library. The Teacher's Resources link features the Smithsonian Resource Guide for Teachers, which contains more than 500 educational materials from the Smithsonian Museum Collection.

Southeast Regional Climate Center

<http://sercc.dnr.state.sc.us/education.html>

Southeast Regional Climate Center (SERCC) provides numerous classroom weather activities for grades 4–6. The site features lesson plans, a wind chill calculator, graphics, an interactive weather quiz, and links to related resources.

Spaceborne Imaging Radar-C Education

<http://ericir.syr.edu/Projects/NASA/nasa.html>

Spaceborne Imaging Radar-C Education (SIR-CED) is the latest generation of imaging radars produced by JPL for NASA. This site offers a Teacher's Resource Guide and a Lesson Guide for middle school and high school students and teachers.

SpaceLink Instructional Materials

<http://spacelink.msfc.nasa.gov/html/Instructional.Materials.html>

SpaceLink Instructional Materials, from NASA, contains a variety of space-related K–12 lesson plans and activities. To find the lesson plans, click on Interdisciplinary Materials or Curriculum Materials.

STEM~Net Gopher Menu

[gopher://info.stemnet.nf.ca:70/11/k-12/prim/
Lesson%20Plans%20and%20Curriculum%20Units/Science](http://gopher://info.stemnet.nf.ca:70/11/k-12/prim/Lesson%20Plans%20and%20Curriculum%20Units/Science)

STEM~Net Gopher Menu contains cross-curriculum science lesson plans for the primary grades. Topics include animal coverings, butterflies, senses, and the solar system.

Strategies for Equitable Science Education: Unmixed Messages

<http://www.etc.bc.ca/apase/unmixed/unhome.html>

Strategies for Equitable Science Education: Unmixed Messages contains more than a dozen hands-on science lesson plans for elementary school kids. To find the plans, scroll to the activities and click on Chemistry, Music, and Science Skills.

Teacher's Guides

<http://www.bev.net/education/Sea World/teacherguides.html>

Teacher's Guides provides 13 K-12 cross-curricular lesson plans and hands-on activities taken from Sea World's education publications. The lessons focus on marine life and the ocean environment.

Teacher Resource Center Activities Catalog

http://www.lerc.nasa.gov/Other_Groups/K-12/TRC_activities.html

Teacher Resource Center (TRC) Activities Catalog contains 11 hands-on classroom activities on rockets for use in grades 7–12. Among these are the Soda Pop Can Hero Engine and the Antacid Tablet Race experiments. The site also includes an alphabetically arranged glossary of space terms.

Theater of Electricity

<http://www.mos.org/sln/toe/toe.html>

Theater of Electricity, created by the Boston Museum of Science, presents many online activities for teaching static and current electricity to kids in grades 3–6. Scroll below the picture and click on Sparks to find an example of an online activity. Click on Teachers Resources for classroom experiments dealing with electricity.

Thinking Fountain

<http://www.sci.mus.mn.us/sln/>

University of California at Irvine Science Education Programs

<http://chem.ps.uci.edu/~mtaagepe/SciEd/SEPmain.html>

University of California at Irvine Science Education Programs (SEP) contains a collection of more than 1,500 science lesson plans and activities suitable for grades K–12. To find the lesson plans, scroll and click on Frank Potter's Science Gems. Then select Physical Science (Part I), Earth Science, or Life Science. Many lessons also include links to related sites.

University of California at San Diego InternNet Lesson Plans

http://ec.sdcs.k12.ca.us:70/11/lessons/UCSD_InternNet_Lessons

University of California at San Diego (UCSD) InternNet Lesson Plans is a collection of science experiments for use in grades 7–12. Click on Physical Science and Chemistry to find more than 25 experiments.

Virtual Frog Dissection Kit

<http://george.lbl.gov/vfrog/>

Virtual Frog Dissection Kit, designed by the Lawrence Berkeley National Laboratory, provides an interactive dissection of a frog for students in high school biology classes. To learn how to use this kit, scroll and click on Tutorial. Students can test their knowledge of frog anatomy by clicking on the Virtual Frog Builder Game. The kit is available in a number of languages, including Spanish.

Volcano World

<http://volcano.und.nodak.edu/>

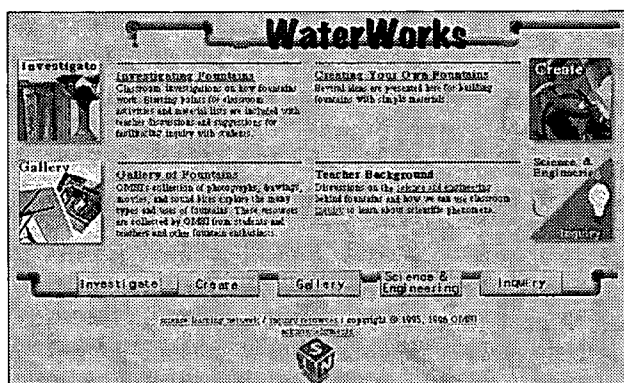

Volcano World contains classroom volcano-related lessons and activities for grades 4–12. Scroll and click on Learning About Volcanoes to find these resources.

WaterWorks

<http://www.oms.edu/sln/ww/waterworks.html>

WaterWorks, from the Oregon Museum of Science and Technology, features a resource entitled Investigating Fountains for use in grades 5–8. The site contains activities for teaching about water pumps, siphons, and the operation of fountains. It also provides information and ideas for building fountains with simple materials.

Weather Here and There

<http://www.ncsa.uiuc.edu/edu/RSE/RSEred/WeatherHome.html>

Weather Here and There is an interactive weather unit incorporating hands-on, collaborative problem-solving activities for students in grades 4–6.

Weather Unit

http://faldo.atmos.uiuc.edu/w_unit/weather.html

Weather Unit is a collection of thematic lesson plans for grades 2–4. It integrates the study of weather into all curricular areas. Click on Science to find 14 science lessons, including ones entitled Water Cycle, Rain Game, and Light and Heat.

Welcome to the Bug Club

<http://www.ex.ac.uk/bugclub/welcome.html>

Welcome to the Bug Club, organized and maintained by biology students at the University of Exeter in England, is designed for students in grades K–8. To find an online quarterly newsletter containing articles on invertebrates, puzzles, and other interactive, fun things to do and make, scroll to the heading To Find Out More About the Bug Club. Then click on Newsletter.

Welcome to the Monarch Watch

<http://monarch.bio.ukans.edu/>

Welcome to the Monarch Watch was developed by the Department of Entomology at the University of Kansas. It is an outreach program to promote conservation of monarch butterflies and to involve students and adults in a cooperative study of the butterfly's fall migration. Scroll to Curriculum Development and click on Migration Game for a K–6 activity, and on Conservation Dilemmas for a problem-solving exercise for grades 4–8.

Welcome to the Rainforest Workshop

http://164.116.102.2/mms/rainforest_home_page.html

Welcome to the Rainforest Workshop provides numerous classroom lessons and activities about temperate and tropical rainforests for middle school students. To find these materials, click on Educational Resources and scroll to lesson plans and activities.

Whales: A Thematic Web Unit

<http://curry.edschool.Virginia.EDU:80/~kpj5e/Whales/>

Whales: A Thematic Web Unit is an integrated curriculum unit for use in grades 4–8. It provides cooperative lesson plans, teacher resources, and interactive student activities and projects. Links to related sites are also included.

Wildlife Discovery Program

<http://www.rice.edu/armadillo/Schools/Hisdzoo/>

Wildlife Discovery Program, for students in grades 3–6, is a partnership between the Houston Zoo and the Houston Independent School District. Scroll and click on Activity Sheets to find activities and lessons for teaching about endangered animals. These activities can be used independently of the program. Click on Online Activities for an interactive online quiz and related information. The site also contains a bilingual glossary of zoo terms.

Wind: Our Fierce Friend

<http://sln.fi.edu/tfi/units/energy/wind.html>

Wind: Our Fierce Friend, developed at the Franklin Institute Science Museum, is an interactive collaborative unit that investigates the science of wind energy. It contains lessons and activities for grades 4–6 and includes student contributions from online schools.

A gentle breeze cools the home on a hot summer day. A colorful kite flies high above the heads of a picnicking family at play. The tinkling of chimes beneath a baby's bedroom window eases the infant's sleep. With billows unfurled, a sailboat races toward the horizon.

The wind is friend.

A hurricane roars inland, destroying homes and communities. Without warning, a thunderstorm rolls into town, drenching picnic plans. The slamming of shutters outside a baby's bedroom window shatters the infant's sleep. Surf's up, and the waves pound wickedly, whipping the sailboat toward the rocks.

The wind is fierce.

Enemy or ally? Friend or foe? Our relationship with the wind is filled with mixed emotions. Learn more about our fierce friend by exploring the science of wind energy.

WonderScience on the Internet

<http://www.acs.org/edugen/education/ws/ws.htm>

WonderScience on the Internet features a series of Internet activities provided by *WonderScience*, an online science activity magazine published by the American Chemical Society (ACS) for elementary school students. Current WonderScience activities are entitled Acid/Base Indicators, Liquids to Lumps, and Say Cheese. ACS plans to update the site monthly.

Year-Long Projects Exemplary Mini-Units, Fall 1994

<http://www.ed.uiuc.edu/YLP94-95/Mini-units/>

Year-Long Projects (YLP) Exemplary Mini-Units, Fall 1994 contains 11 cross-curricular science mini-units developed by University of Illinois elementary-school student teachers. Topics include insects, dinosaurs, bears, vertebrates, and ecosystems.

You Can

<http://www.nbn.com:80/youcan/>

You Can, by Jok R. Church, presents a humorous approach to science teaching. It provides numerous activities for grades K–8. Scroll and click on 50 Terrifics to find 35 questions and answers with accompanying science activities. Questions include: “How does a lever make you stronger?” “Why do I hear weird sounds at night?” “How does yeast make bread rise?” and “What is thunder made out of?”

Yuckiest Site on the Internet

<http://www.nj.com/yucky/>

Yuckiest Site on the Internet, presented by New Jersey Online, features the worlds of worms and coachroachs. K–8 students and teachers can use this site to find activities, information, and illustrations related to these creatures.

Access Excellence

<http://www.gene.com/ae/>

Access Excellence is a national educational program, sponsored by Genentech, Inc., that puts high school biology teachers in touch with colleagues, scientists, and critical sources of new scientific information through an online network.

Welcome to Access Excellence

Access Excellence is a national educational program sponsored by the biotechnology industry pioneer, Genentech, Inc., that puts high school biology teachers in touch with their colleagues, scientists and critical sources of new scientific information through an online network. It's a virtual beehive of activity!

Albert Einstein Online

<http://www.sas.upenn.edu/~smfriedm/einstein.html>

Albert Einstein Online, for grades 6–12, is a site that honors one of the world's greatest thinkers. It includes historical information, famous quotes, photos, and related links.

Animals Hotlist

<http://sln.fi.edu/tfi/hotlists/animals.html>

Animals Hotlist, prepared by the Franklin Institute, provides students in grades K–8 with more than 75 links to resources containing information, facts, and pictures about animals.

Apollo 13

http://www.mca.com/universal_pictures/apollo13/

Apollo 13 is the story of the heroic roundtrip spaceflight to the moon as portrayed in the movie *Apollo 13*. The site is appropriate for students in grades 4–12.

Ask the Astronomer

<http://www2.ari.net/home/odenwald/qadir/qanda.html>

Ask the Astronomer is a place where astrophysicist Sten Odenwald answers astronomy and space-science questions submitted by users. Click on Recent Questions, Archive Bi-Monthly Archive, and Master Topic Index to find hundreds of previously asked questions and their answers. The site is appropriate for grades 6–12.

Astronomy

<http://zebu.uoregon.edu/galaxy.html>

Astronomy, from the University of Oregon Observatory, brings the electronic universe to students in grades 9–12 by presenting information on and photos of our solar system and galaxies.

About Our Observatory:

General Information:

- [Cosmology and the Origin of Life Class](#)
- [Comet Hyakutake](#)
- [Images from the Hubble Deep Field](#)
- [Newly Discovered Planets Page](#)
- [Newly Discovered Planet 51 Page](#)
- [Pine Mountain Observatory](#)
- [Internet Connectivity Project](#)

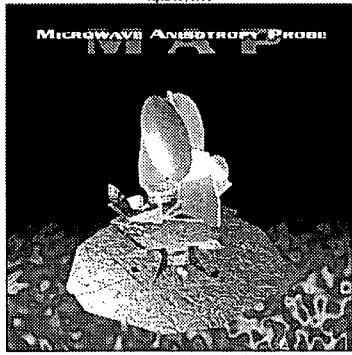

Astronomy Picture of the Day

<http://antwarp.gsfc.nasa.gov/apod/astropix.html>

Astronomy Picture of the Day, for grades K–12, features a different image or photograph of our fascinating universe each day, along with a brief explanation written by a professional astronomer. The site also includes related resources.

Astronomy Picture of the Day
REVEAL THE UNIVERSE! Each day a different image or photograph of our fascinating universe is featured, along with a brief explanation written by a professional astronomer.

April 15, 1996

NASA Mission to MAP the Universe
Credit: MAP Team, NASA

Explanation: What is our universe made of? How rapidly is our universe expanding? When did galaxies form? These questions, among the most important and baffling to astronomers since the beginning of the modern astronomical era, might well be answered by a new space satellite mission. The **Microwave Anisotropy Probe (MAP)** is being designed to probe the universe's **structure and evolution** in more detail than ever before. MAP will record the frequency, size and temperature of bumps, 20 times smaller than COBE. Astronomers have computed what bumps would be expected from several models of our universe, and comparing these results to MAP's data may yield a new understanding of the **composition and structure** of our universe. MAP has just won approval as a NASA **science** class satellite, and is **currently scheduled to launch** in the year 2000.

Athena

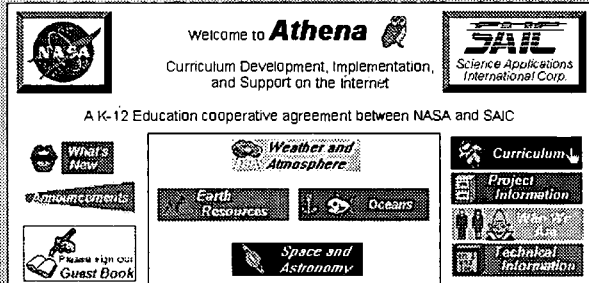

<http://athena.wednet.edu/>

Athena is a joint project of NASA and SAIC. Its purpose is to enhance the K–12 science curriculum and to facilitate use of powerful computational tools in classrooms networked to the World Wide Web. Click on Curriculum to find resources and instructional materials by subject area.

Athena

Welcome to **Athena**
Curriculum Development, Implementation, and Support on the Internet

Partners:

Bad Science

<http://www.ems.psu.edu/~fraser/BadScience.html>

Bad Science, maintained by Alistair B. Fraser, provides links to sites that attempt to sensitize teachers and students to examples of the "bad science" often taught in schools and universities and offered in popular articles and some textbooks. To find additional sites useful to science teachers in grades K-12, scroll to Bad Physics and click on Recurring Science Misconceptions.

Beverly Lynds' Homepage

<http://www.unidata.ucar.edu/staff/blynds/homepage.html>

Beverly Lynds' Homepage contains two online science tutorials, Rainbows and Temperature, which are suitable for middle school and high school students.

Biological Sciences Resources

<http://137.142.42.95/Biosciences.html>

Biological Sciences Resources is a comprehensive collection of resources for high school biology teachers. To view its contents, click on any letter to see subjects and associated titles beginning with that letter.

Bob's Rock Shop

<http://www.rtd.com/~bkeller/rockshop/rockshop.html>

Bob's Rock Shop, for students in grades 3–12, advertises itself as the first Internet online magazine for rockhounds. It contains displays of rocks and minerals. Scroll to the bottom of the page and click on Table of Contents Scenic Route for a slide show of colorful specimens.

Center for Earth and Planetary Studies

<http://ceps.nasm.edu:2020/homepage.html>

Center for Earth and Planetary Studies (CEPS), from the National Air and Space Museum, contains hundreds of brilliant photos of planets as well as other photos from NASA's space program. It is appropriate for grades K–12.

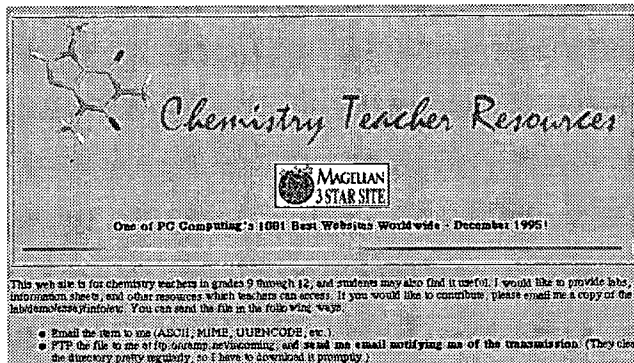

- [What's New at CEPS?](#)
- [Center for Earth and Planetary Studies \(CEPS\)](#)
- [Research at CEPS](#)
- [Regional Planetary Image Facility](#)
- [Space Shuttle Photographs](#)
- [Apollo Manned Space Program](#)
- [National Air and Space Museum](#)

Chemistry Teaching Resources

<http://rampages.onramp.net/~jaldr/chemtchr.html>

Chemistry Teaching Resources contains useful links for high school teachers to such topics as Chemistry I, AP Chemistry, Internet Chemistry Resources, Things We're Looking For, and ChemNotes.

Comet Shoemaker-Levy Collision With Jupiter

<http://www.jpl.nasa.gov/sl9/>

Comet Shoemaker-Levy Collision With Jupiter, from the Jet Propulsion Laboratory, provides information on and photos of the first observed collision of two heavenly bodies and their explosive and spectacular impact on the Jovian atmosphere. The site, for grades 6–12, includes more than 1,400 images, media coverage, and spacecraft and ground-based observations of the impacts.

Comet Shoemaker-Levy Collision with Jupiter

From July 16 through July 22, 1994, pieces of an object designated as Comet P/Shoemaker-Levy 9 collided with Jupiter. This is the first collision of two solar system bodies ever to be observed, and the effects of the comet impacts on Jupiter's atmosphere have been simply spectacular and beyond expectations. Comet Shoemaker-Levy 9 consisted of at least 21 discernable fragments with diameters estimated at up to 2 kilometers.

News Flash (Last Updated March 20, 1996)

- [Chain of Impact Craters Suggests by Shoemaker-Levy Impact \(NASA - March 20, 1996\)](#)
- [Comet Shoemaker-Levy 9: A New Chapter in the History of the Solar System \(March 1, 1996\)](#)

Comets and Meteor Showers

<http://medicine.wustl.edu/~kronkg/>

Comets and Meteor Showers, for students in grades 4–12, contains information on and pictures of comets and meteors.

Constellations and Their Stars

<http://www.astro.wisc.edu/~dolan/constellations/>

Constellations and Their Stars, for grades 5–12, provides a compendium of astronomy sites. The sites include information on constellations and stars, as well as photos of the Milky Way.

BEST COPY AVAILABLE

Dante II Frame Walking Robot

<http://maas-neotek.arc.nasa.gov/Dante/dante.html>

Dante II Frame Walking Robot is a cooperative project between the Carnegie Mellon University and NASA's Ames Research Center. The goal was to build a frame walking robot named Dante II that could explore and take pictures of the active Mt. Spurr volcano in Alaska. The site contains hundreds of spectacular aerial photos.

Dr. Bob's Interesting Science Stuff

<http://ny.frontiercomm.net/~bjenkin/science.htm>

Dr. Bob's Interesting Science Stuff, suitable for grades 4–12, provides facts and explanations about science phenomena, including topics involving the death of our sun, a hole in the head, and amazing ice.

Earth & Sky Radio Series

<http://www.earthsky.com/>

Earth & Sky Radio Series is a daily two-minute radio science program for students in grades 6–12. It can be heard via RealAudio and features popular science topics, including climate and earthquakes. The site also has links related to each topic.

Earth & Sky
RADIO SERIES

The daily science radio series **Earth & Sky** is heard by millions of listeners on over 525 commercial and public stations throughout the United States. It can also be heard in Canada, the South Pacific and on a variety of international networks, including Armed Forces Radio, World Radio Network and Voice of America.

Each day, Deborah Byrd and Joel Block discuss popular science subjects that affect our everyday lives. Each program is a snapshot of current scientific knowledge, progress and questions, presented in language you can understand and appreciate. Some programs also guide you to your own scientific experiences, such as that of identifying a type of rock or a planet in the night sky.

Earthwatch

<http://www.earthwatch.org/>

Earthwatch, a nonprofit organization that sponsors cultural and environmental research, provides resources on animal lives, endangered species, and coral reefs. To find resources for teachers and students in grades 6–12, scroll and click on Global Classroom and Hotlist.

EARTHWATCH

LINKING BUSINESS, SCIENCE,
AND COMMUNITY IN SEARCH OF
ENVIRONMENTAL SOLUTIONS.

Earthwatch sponsors important cultural and environmental research by inviting concerned citizens like you to travel in the future of our planet. A nonprofit membership organization founded in 1972, Earthwatch has mobilized over 40,000 people to spend from one to three weeks assisting noted scientists and scholars on projects that range from coral reef surveys to public health studies.

Eisenhower National Clearinghouse

<http://www.enc.org/>

Eisenhower National Clearinghouse (ENC) contains a variety of educational resources for teaching K–12 math and math/science. Resources include lessons, online publications, and services.

Welcome to the **Eisenhower National Clearinghouse (ENC)**, the nationally recognized information source for K–12 math and science teachers.

ENC and the **Eisenhower Regional Consortia** are sponsored by the U.S. Department of Education, Office of Educational Research and Improvement.

Resource Finder
Search here for all kinds of classroom and teaching materials. Virtually everything!

The Digital Dozen
Check out this month's goldmine of electronic resources, and don't forget to visit again next month.

Online Documents
Browse previously published documents, in electronic format, regarding curriculum issues in math and science education.

BEST COPY AVAILABLE

Electronic Zoo

<http://netvet.wustl.edu/e-zoo.htm>

The **Electronic Zoo**, for grades K–12, is a comprehensive catalog of pictures and information about animals. Scroll and click on Animals to find hundreds of animal resources placed in 22 categories, including zoo animals and wildlife animals.

EnviroLink

<http://www.envirolink.org/envirohome.html>

EnviroLink is the largest nonprofit organization dedicated to providing the most comprehensive, up-to-date, online environmental resources. Click on Search EnviroLink to find a search engine that allows users to enter any word, series of words, or phrases they might use when speaking or writing about the environment. For example, they can enter the keyword “rainforest” and find many highly rated resources, including EcoLink Aug 95 and Colors of the Rainforest. The site also includes the EnviroLink Library, which contains numerous classroom activities and resources for grades K–12.

Eric's Physics Forum

<http://www.eden.rutgers.edu/~md2020/>

Eric's Physics Forum, for grades 7–12, features practical physics activities, educational television links, fun physics stuff, an interactive hologram generator, and links to other science sites.

Everest Assault '96: Summit of Dreams and Despair

<http://www.nbc.com/everest/>

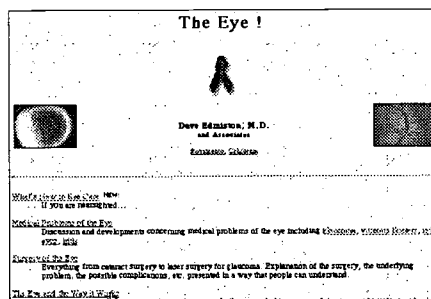

Everest Assault '96: Summit of Dreams and Despair, developed by NBC for middle school and high school students, presents the story of the scientific expedition to Mount Everest. Among its many links are A Tribute to Scott Fischer, The Latest News, Digital Daily (containing a photo scrapbook), The Journey, The Mountain, and Resources. To find classroom activities related to these links, select Kidspeak and then click on Global SchoolNet Foundation.

The Eye

<http://www.eyefinfo.com/>

The Eye, by Dr. Dave Edmiston (M.D.) and Associates, features a variety of topics dealing with the human eye. It is suitable for grades 7–12. Click on The Eye and the Way It Works to find a graphical explanation about the nature of vision and the way the eye functions. Click on Ask Dr. Dave! for “non-doctor-talk” answers to questions about personal eye care.

Faces of Science: African Americans in Science

<http://www.lib.lsu.edu/lib/chem/display/faces.html>

Faces of Science: African Americans in Science, prepared by Louisiana State University, presents more than 50 profiles of African Americans who have contributed to the advancement of science and engineering. Profiles are grouped by academic discipline and arranged in an alphabetical list. The site is appropriate for students in grades 5–12.

Father of Light

<http://userwww.sfsu.edu/~markd/TheFatherofLight.html>

The Father of Light, for students in grades 4–8, takes an interesting look at Thomas A. Edison's invention of the incandescent light bulb. The site includes images and commentary.

BEST COPY AVAILABLE

Fish Information Service

<http://www.actwin.com/fish/>

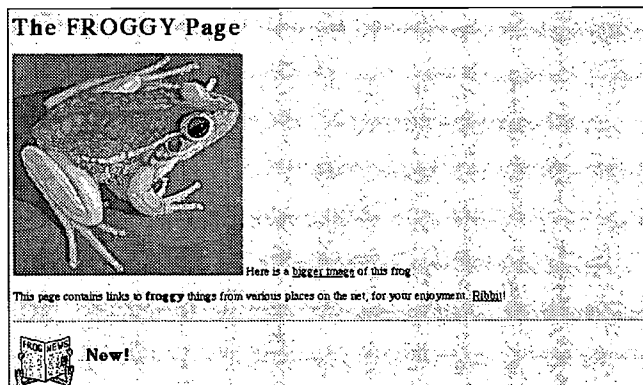

Fish Information Service (FINS), for students in grades K–12, is an archive of information about aquariums. It covers several types of aquariums, including freshwater, marine, tropical, and temperate.

Froggy Page

<http://www.cs.yale.edu/homes/sjl/froggy.html>

The Froggy Page, for grades K–12, is a comprehensive collection of resources about frogs. It includes pictures, sounds, tales, and songs. To find two online dissection projects, scroll to the Scientific Amphibian section of the page, locate Anatomy and Dissection, and click on Whole Frog Project and Frog Dissection Tutorial.

Geology Hotlist

<http://sln.fi.edu/tfi/hotlists/geology.html>

Geology Hotlist, prepared by the Franklin Institute, provides more than 50 links to geology resources suitable for students in grades 4–12. The hotlist includes links to a variety of topics, including general geology, volcanoes, earthquakes, rocks and minerals, images, and teacher resources.

Henrietta Leavitt Flat Screen Space Theater

<http://ucsu.colorado.edu/~peterscc/Home.html>

Henrietta Leavitt Flat Screen Space Theater presents the first online planetarium. It offers a virtual space show for students in grades 5–12. To begin the presentation, scroll and click on Planetarium Show.

Historical Archive

<http://www.ksc.nasa.gov/history/history.html>

Historical Archive, from the Kennedy Space Center, is an online collection of space resources, including information on space history and manned missions. The site is suitable for students in grades 8–12.

Historical Archive

Space History

- [NASA Space Act of 1958](#)
- [Rocket History](#)
- [Early Astronauts](#)
- [Astronautics History](#)
- [Chronology of Aeronautics and Astronautics](#)
- [Mission Patches](#)
- [Moonport: A History of Apollo Launch Facilities and Operations](#)

Hubble Space Telescope Public Pictures

<http://www.stsci.edu/EPA/Pictures.html>

Hubble Space Telescope (HST) Public Pictures, for grades K–12, contains collections of spectacular pictures of celestial objects, each accompanied by brief descriptions. The site includes pictures organized by subject, 1996 releases, and HST's Greatest Hits 1990–1995 Picture Gallery.

Human Anatomy

<http://rpi.sun1.mda.uth.tmc.edu/sc/anatomy/>

Human Anatomy, developed by the Levit Radiologic-Pathologic Institute at the University of Texas, displays a model of the human body. Click on selected parts of the model and see x-ray-like anatomical enlargements. The site is suitable for students in grades 5–12.

Images of Insects and Their Relatives

<http://www.colostate.edu/Depts/Entomology/images.html>

Images of Insects and Their Relatives offers K–12 students a large collection of insect photos. For two additional sites with excellent insect images, scroll and click on Smithsonian Institution and On-Line Insect Database, which is provided by the University of Delaware.

Inquirer's Guide to the Universe

<http://sln.fi.edu/planets/planets.html>

Inquirer's Guide to the Universe, developed by the Franklin Institute, contains a guide to online astronomy resources for grades 4–8. The site also includes Inquiry Tips for the classroom teacher.

The universe is expanding. Maybe. Our understanding of the universe is expanding. Definitely.

Practically every month, new theories about the origin and age of the universe are being announced. In just the past year, scientists have identified three new planets.

The universe is expanding. Maybe. Our understanding of the universe is expanding. Definitely.

Practically every month, new theories about the origin and age of the universe are being announced. In just the past year, scientists have identified three new planets.

Inhabitants of planet Earth have begun to wonder if the newly discovered planets may have their own inhabitants. Might the new planets support life? For the time being, we can only imagine.

How To Use The Guide

An "Inquirer" can begin by thinking about and investigating what we already know about planets and the universe. Use the list of "Space Science Fact" resources to help you inquire. Then, consider some of the "Space Science Fiction" resources.

When you're ready, visit the "Imaginary Planet Gallery." The imaginary planets are waiting for your exploration. Enter the "Space Story Studio" when you're ready to write a story about the imaginary planet you choose to visit. Consult the "Space Story Portfolio" to read other stories about the imaginary universe you've visited.

If you're a classroom teacher, consult [Inquiry Tips](#) for one possible strategy for using the guide in a classroom setting.

Insects Hotlist

<http://sln.fi.edu/tfi/hotlists/insects.html>

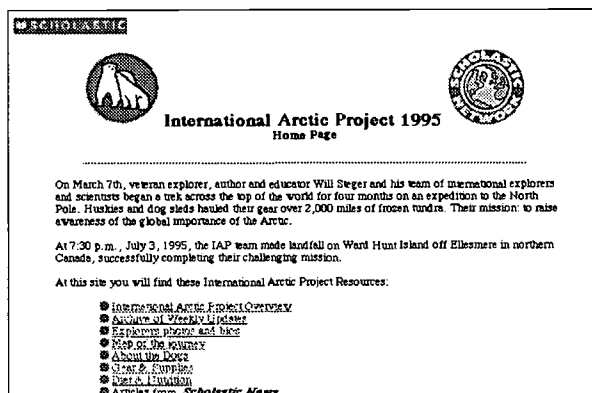

Insects Hotlist, from the Franklin Institute, contains a variety of resources for teaching about insects. The site provides classroom lessons, activities, images, and background information for K–12 teachers.

BEST COPY AVAILABLE

International Arctic Project, 1995

<http://www.scholastic.com/public/Network/IAP/IAP-Home.html>

International Arctic Project (IAP), 1995, sponsored by Scholastic, takes students in grades 4–8 to the top of the world to learn about the Arctic through resources gathered by a team of international explorers and scientists. Resources include Map of the Journey, About the Dogs, Diet & Nutrition, Life at the Top of the World, and IAP Scrapbook.

Iowa State's Entomology Image Gallery

<http://www.ent.iastate.edu/imagegallery.html>

Iowa State's Entomology Image Gallery, for kids in grades 5–12, contains a collection of images and movies about beetles, mosquitoes, and ticks. To view a sequence of still images, click on Dissection of a Tick (*Ixodes scapularis*).

Just for Kids

<http://www.nsf.gov/od/lpa/nstw/kids/start.htm>

Just for Kids, appropriate for grades 4–8, is sponsored by the National Science Foundation. It includes links to Science Star Cards, Ask a Scientist or Engineer, and Other Science Web Links for Kids.

BEST COPY AVAILABLE

Liftoff

<http://liftoff.msfc.nasa.gov/>

Liftoff is sponsored by the Marshall Space Flight Center in Huntsville, Alabama, one of the largest NASA centers. The site, suitable for grades 5–12, includes links to Mission Information pages and the JPL Space Calendar, which provides updated launch schedules. Click on Helpful at the bottom of the page for a site layout map that helps teachers and students find their way around the pages of information.

Lighthouse

<http://the-tech.mit.edu/Weather/>

Lighthouse, from MIT, provides online regional, national, and international weather information, including current weather reports and forecasts for more than 250 U.S. cities. The site is suitable for students in grades 5–12.

LlamaWeb

<http://www.webcom.com/~degraham/>

LlamaWeb, for students in grades K-12, contains information, pictures, and fun facts related to llamas.

Mineral Gallery

<http://mineral.galleries.com/>

Mineral Gallery is a constantly growing collection of mineral descriptions and images for students in grades K-12. Minerals are listed by name, class, and grouping (gemstones, birthstones, and so forth).

Mission to Planet Earth

<http://www.hq.nasa.gov/office/mtpe/>

Mission to Planet Earth (MTPE) presents the research contributions of several NASA centers that help increase our understanding of how the global environment is changing. The site, appropriate for high school students, includes links to Missions, Science of the Earth System, and Publications and Education Programs.

Mt. Wilson Observatory Constellation Quiz

<http://www.mtwilson.edu/Services/conquiz/>

Mt. Wilson Observatory (MWO) Constellation Quiz features a multiple-choice, interactive quiz on 15 major constellations. The quiz is appropriate for students in grades 4–12. When a correct answer to a question about a constellation is entered, background information is presented.

NASA Space Shuttle Web Archives

<http://shuttle.nasa.gov/>

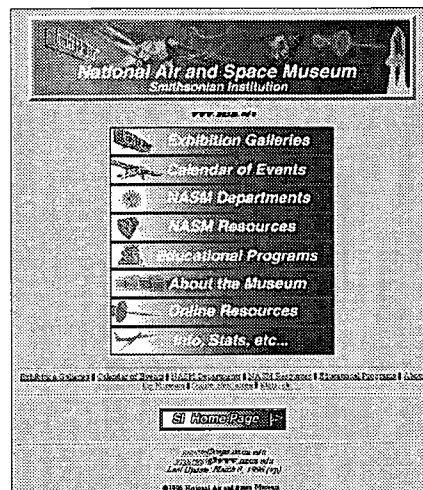

NASA Space Shuttle Web Archives contains information on past, present, and future space shuttle missions. Photos are also included. The site is suitable for students in grades 8–12.

BEST COPY AVAILABLE

National Aeronautics and Space Administration Homepage

<http://www.nasa.gov/>

National Aeronautics and Space Administration (NASA) Homepage contains a compendium of resources appropriate for middle school and high school students. The site includes links to 12 NASA centers, a picture gallery, space-science resources, the latest NASA news, and other related information.

National Marine Fisheries Service

<http://www.wh.who.edu/noaa.html>

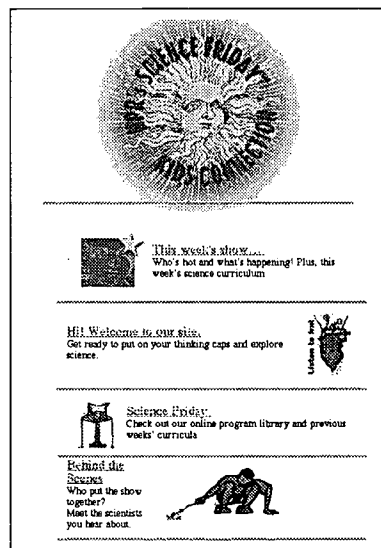

National Marine Fisheries Service (NMFS), for students in grades 4–12, answers more than 125 questions about fish. To find the questions and answers, scroll down the window pane on the left side of the monitor screen and click on A Bouillabaisse of Fascinating Facts About Fish. The site also contains archives of thousands of photos from the late 1800s to the present, including fisheries scenes from Woods Hole, New Bedford, and Boston.

National Public Radio's Science Friday—Kids Connection

<http://www.npr.org/sfkids/>

National Public Radio's (NPR) Science Friday—Kids Connection, sponsored by NPR's Outreach and Kidsnet Program, is an online science program where kids in grades 4–8 can explore all kinds of science-related topics. Scroll and click on This Week's Show to listen to a one-hour program via RealAudio. For an online library of previous programs, click on Science Friday. Each show is accompanied by classroom materials that include a synopsis, selected references, student questions, a class project, and links to related sites.

National Science Teachers Association

<http://www.nsta.org/>

National Science Teachers Association (NSTA) is the leading professional organization for improving the teaching of science in grades K–12. The site features information about sponsored publications, programs, and projects. It also provides links to other online resources.

BEST COPY AVAILABLE

National Space Science Data Center Photo Gallery

http://nssdc.gsfc.nasa.gov/photo_gallery/

National Space Science Data Center (NSSDC) Photo Gallery contains hundreds of spectacular and popular photos of planetary, astronomical, and related objects for students in grades 4–12. The site also includes indexes of images of the solar system, objects taken by the Galileo spacecraft, the Hubble Space Telescope, and the Voyager 1 and 2 spacecrafts.

National Space Society

<http://www.nss.org/>

National Space Society (NSS), for grades 6–12, provides numerous resources for the study of space, including one entitled S.P.A.C.E.

New Illustrated Dinosaur Dictionary

<http://www.autobaun.com/~kbshaw/Dinosaur/DinoDict.html>

New Illustrated Dinosaur Dictionary is suitable for grades K–6. Kids can click on the name of a dinosaur to see its picture, hear its name pronounced, and read facts about it.

Night of the Comet

<http://www.comet.arc.nasa.gov/comet/>

Night of the Comet, sponsored by the NASA Ames Research Center, is a virtual star party for students in grades 5–12. The site is devoted to the appearance of Comet Hyakutake and contains images of the comet, activities, comet facts, and instructions for participating in the project.

BEST COPY AVAILABLE

Online Educational Resources

<http://quest.arc.nasa.gov/OER/>

Online Educational Resources (OER), from the NASA High Performance Computing and Communications (HPCC) Office, features a repository of programs for K–12 students. Among the links included are Spotlighted WWW Sites and NASA Internet Educational Resources.

Online Guide to Meteorology

<http://covis.atmos.uiuc.edu/guide/>

Online Guide to Meteorology, developed by the CoVis group at the University of Illinois, provides interactive multimedia instructional modules that introduce students in grades 2–12 to selected topics in atmospheric science. Topics include forces, wind, weather analysis, clouds, thunderstorms, and tornadoes.

Optical Illusions

<http://www.lainet.com/~ausbourn/>

Optical Illusions is a large collection of online optical illusions for students in grades 4–12. Illusions include the Zöllner Illusion, Necker Cube, and several others. The scientific basis for each illusion is discussed. Click on Illusionary and Other Links for additional related resources.

Periodic Table of Elements on the Internet

<http://www.cetlink.net/~yinon/>

Periodic Table of Elements on the Internet was developed by an eighth-grade student, Yinon Bentor. Click on an element in the table to get more information about it.

Rainforest Action Network

<http://www.ran.org/ran/>

Rainforest Action Network (RAN) has been working since 1985 to protect the earth's rainforests and support the rights of their inhabitants. The site provides many online science-education resources. Click on Kids' Corner to find classroom activities for use in grades K–8 and on Quiz for an interactive quiz on rainforests.

Safari Touch Tank

<http://oberon.educ.sfu.ca/splash/tank.htm>

Safari Touch Tank, for grades 4–8, is an online hands-on aquarium where kids click on an item to learn its name, see it enlarged, and view a short movie about it.

Safari Touch Tank

Click the mouse over an object.

See the scene enlarged (Quicktime: 533K) if you have QuickTime installed, or go to the Safari Touch Tank.

Science Activities Manual: K–8

<http://www.utm.edu/departments/ed/cece/SAMK8.shtml>

Science Activities Manual (SAM): K–8, developed by the Center for Environmental and Conservation Education at the University of Tennessee, Martin, is a listing of science topics and concepts organized by grade level.

Science and the Environment

<http://www.voyagepub.com/publish/voyage.htm>

Science and the Environment, provided by Voyage Publishing Company, is a free electronic news magazine for high school science teachers and students. Each issue features 80 of the most interesting and relevant news stories on important environmental topics. All stories can be photocopied for classroom distribution.

Science Hobbyist

<http://www.eskimo.com/~billb/>

Science Hobbyist, for students in grades K–12, provides a collection of sites for doing and understanding science. To find many useful links to science activities, scroll and click on Amateur Science. Under Shortcut Links, click on Kids' Science Projects and Other Websites for Kid's Science Projects.

SCIENCE HOBBYIST

THESE PAGES HAVE BEEN TURNED BLACK IN PROTEST OF PRES. CLINTON'S SIGNING OF THE TELECOMMUNICATIONS BILL. THIS BILL ALLOWS FOR GOVERNMENT CENSORSHIP OF THE INTERNET.

Science Questions

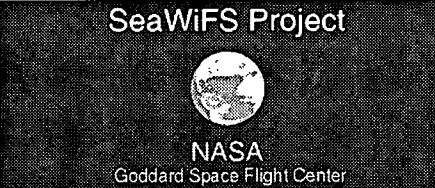

<http://xenon.chem.uidaho.edu/~inter103/sciquest/questans.html>

Science Questions, from the University of Idaho, is a list of questions on a variety of science topics, all of which are answered by experts.

SeaWiFS Project

<http://seawifs.gsfc.nasa.gov/SEAWIFS.html>

SeaWiFS Project (Sea-Viewing Wide Field-of-View Sensor), from the NASA Goddard Space Flight Center, provides data on global ocean bio-optical properties to the earth science community. Scroll and click on the Teacher's Guide to find online activities that students in high school can use for studying ocean color as it appears from space. For additional online lessons, scroll to the bottom and click on Ocean Color Viewed From Space.

The page provides access to the background, data and documentation for the NASA's upcoming global ocean monitoring mission called **SEAWiFS**.

What's New on the SeaWiFS Project Home Page

 ANALYSTS	 DATA	 PRODUCTS	 ABOUT SEAWiFS
 TECHNICAL	 TECHNICAL	 TECHNICAL	 TECHNICAL

Sea World-Busch Gardens Home Page

<http://www.bev.net/education/SeaWorld/homepage.html>

Sea World-Busch Gardens Home Page provides a large collection of useful animal resources for the K-6 classroom. Scroll to Animal Information to find links to a photo index, detailed animal information, quizzes, and fast facts about animals.

Seeds of Life

<http://www.next.com/~jmh/SeedsOfLife/home.html>

Seeds of Life, suitable for grades 5-12, provides botany information and pictures about plant reproduction.

Shuttle Amateur Radio Experiment

http://www.nasa.gov/sarex/sarex_mainpage.html

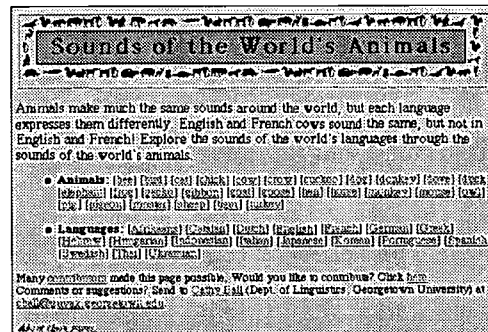

Shuttle Amateur Radio Experiment (SAREX) involves middle school students in asking questions and receiving answers from astronauts in orbit.

Sounds of the World's Animals

<http://www.georgetown.edu/cball/animals/animals.html>

Sounds of the World's Animals is a site that allows kids in grades 4–8 to explore the sounds of the world's languages through the sounds of the world's animals. Animals make much the same sounds around the world, but each human language expresses the animal sounds differently. For example, English and French cows sound the same, but not in English and French! Click on a favorite animal to see how people in different parts of the world communicate the sounds they hear.

Space Educators' Handbook Home Page

<http://tommy.jsc.nasa.gov/~woodfill/SPACEED/SEHTML/seh.html>

Space Educators' Handbook Home Page, from the NASA Johnson Space Center, contains numerous multimedia documents for grades 8–12, including science fiction, space movies, space comics, space mathematics, and space social studies.

Space Science Education

http://www.gsfc.nasa.gov/education/education_home.html

Space Science Education, from the NASA Goddard Space Flight Center, contains pictures, information, and facts about the solar system. For additional resources, click on Lessons, NASA Missions, Student Activities, and Curricula Materials. The site is appropriate for grades 9–12.

Space Science Hotlist

<http://sln.fi.edu/tfi/hotlists/space.html>

Space Science Hotlist, from the Franklin Institute, provides a catalog of space science listings, including links to NASA, the solar system, space pictures, and teacher resources for grades K–12.

Space Shuttle

<http://seds.lpl.arizona.edu/ssa/space.shuttle/docs/homepage.html>

Space Shuttle, for grades 4–8, displays a large interactive drawing of a NASA space shuttle. Students click on the different parts to learn how it operates.

SpaceLink

<http://spacelink.msfc.nasa.gov/>

SpaceLink, for grades K–12, contains a large collection of online NASA resources and materials related to the space program.

BEST COPY AVAILABLE

Star Child

<http://heasarc.gsfc.nasa.gov/docs/StarChild/StarChild.html>

Star Child, created by the NASA Goddard Space Flight Center for K-8 teachers and kids, is the premiere astronomy resource. It contains pictures and information about our solar system, galaxies, space, the universe, astronomy, and more.

Stars and Galaxies

<http://www.cia.brad.ac.uk/btl/sg.html>

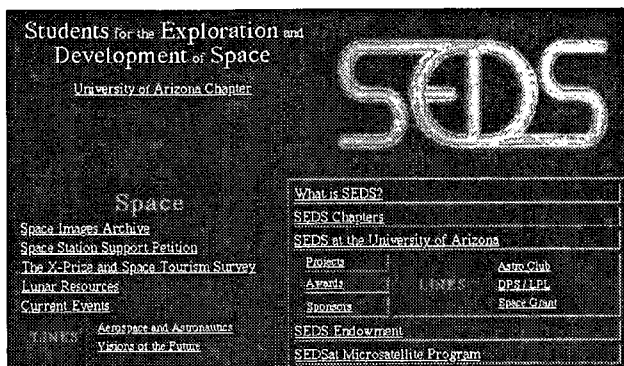

Stars and Galaxies provides students in grades 6-12 with information and pictures related to the origin and life cycle of stars, how they behave, and how their energy is generated. The site also includes pictures of galaxies and related phenomena.

Students for the Exploration and Development of Space

<http://www.seds.org/>

Students for the Exploration and Development of Space (SEDS), contains many space resources for grades 5–12. They include a space images archive, a galaxy of images and information, and a space chat room. To find a multimedia tour of our solar system, click on Nine Planets: Solar System Tour. To start the tour, scroll to Table of Contents and click on Overview of the Solar System. For a useful astronomy index of technical terms, scroll and click on Glossary.

Super Science Site

<http://www.superscience.com/>

Super Science Site is designed to encourage kids and teachers in grades 4–6 to do scientific experiments. The site includes ideas, advice on performing and presenting experiments, an online contest, and information for teachers on applying for a new science grant.

BEST COPY AVAILABLE

TerraQuest

<http://www.terraquest.com/>

TerraQuest offers virtual expeditions to the Galápagos Islands and Antarctica. The site, for grades 4–12, contains information and photos.

Turtle Trax

<http://www.io.org/~bunrab/>

Turtle Trax, for kids in grades K–8, is about sea turtles and their conservation.

24 "Canoe Plants" of Ancient Hawai'i

<http://hawaii-nation.org/nation/canoe/canoe.html>

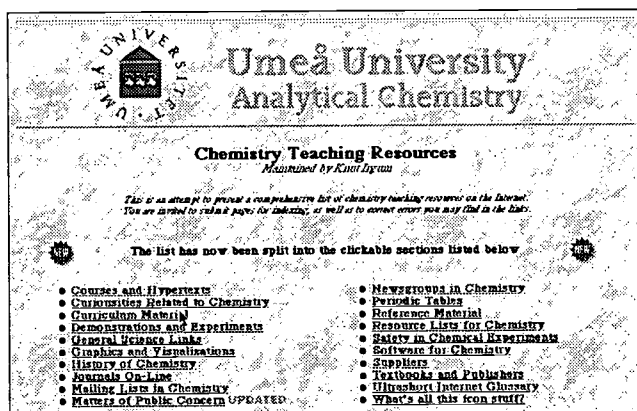

24 "Canoe Plants" of Ancient Hawai'i is a botany resource appropriate for students in grades 8–12. Scroll to Canoe Plants Contents to find a list of 24 plants with accompanying information and pictures for each one.

Umea University Chemistry Teaching Resources

<http://www.anachem.umu.se/eks/pointers.htm>

Umea University Chemistry Teaching Resources contains a multitude of resources for K–12 classrooms. To find these resources, click on Curriculum Material and Demonstrations and Experiments.

BEST COPY AVAILABLE

Underwater World

<http://pathfinder.com/pathfinder/kidstuff/underwater/>

Underwater World, created by Pathfinder, is appropriate for students in grades K–6. It contains information on and pictures of marine animals and life. The site also includes an online visit to the Monterey Bay Aquarium.

Universe at Our Doorstep

<http://www.oanet.com/homepage/eric/index.htm>

Universe at Our Doorstep, for grades 9–12, provides links to a variety of resources on space topics, including the Galileo mission, NASA space shuttles, general astronomy, and comet sites.

University of Michigan Weather Underground

<http://groundhog.spri.umich.edu/>

University of Michigan Weather Underground features weather imagery, current conditions, forecasts, and curriculum activities for K-12 classrooms.

The Weather Underground University of Michigan

Welcome to the **University of Michigan Weather Underground**. Here you will find access to weather imagery, current conditions, forecasts, and curriculum activities aimed at K-12 classrooms

WEATHERMET	CURRICULUM	CLIMATE	WORLD-OF-WEATHER	CONTACT
------------	------------	---------	------------------	---------

LOOK WHAT'S NEW!

 **WE CAN TEE-SHIRT**, check out our outrageous new tee-shirt, designed exclusively for The Weather Underground by Bybee Arts, Austin, Texas.

 **STORMWATCH ONLINE**, a K-12 writing activity centered around weather experiences and observations is beginning. Your classroom can join this activity at any point this spring.

University of Tennessee Science Bytes

<http://loki.ur.utk.edu/ut2Kids/science.html>

University of Tennessee Science Bytes is a series of online articles about science topics suitable for students in grades K-12. Among the articles are Mad About Marmosets! and Rhinos and Tigers and Bears—Oh My!

UT Science Bytes

The University of Tennessee announces the premiere edition of Science Bytes.

Science Bytes is designed for elementary and secondary school students and teachers. Each installment describes the work being done by scientists at the University of Tennessee. We hope not only to educate our users about current science questions and issues—we want to inspire you to pursue all-new questions and projects! Users, please send us feedback on this pilot project! What do you like most? What can be improved? Are there topics you would especially like to know about?

Please send your comments and suggestions to tina@novell.ur.utk.edu or vicki@novell.ur.utk.edu.

BEST COPY AVAILABLE

USA Today Weather

<http://web.usatoday.com/weather/wfront.htm>

USA Today Weather, for grades 4–12, displays five-day forecasts for most U.S. cities and major cities worldwide. To find a list of resources and classroom activities about the weather, scroll to Top Weather News and click on For Teachers.

Views of the Solar System

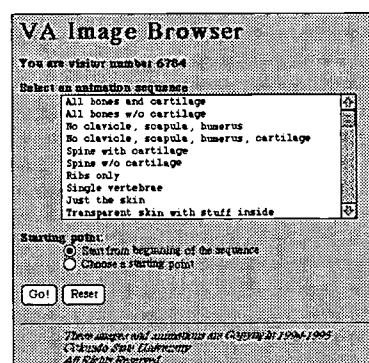

<http://bang.lanl.gov/solarsys/>

Views of the Solar System, for grades 3–12, is an educational tour of the solar system. It contains more than 950 images and more than 220 pages of information about the sun, planets, moons, asteroids, comets, and meteoroids found within the solar system.

Virtual Anatomy Image Browser

<http://www.vis.colostate.edu/cgi-bin/gva/gvaview/>

Virtual Anatomy (VA) Image Browser, created by Colorado State University, lets students view images and movies of 27 parts of the human body. The site is suitable for grades 4–12.

Virtual Science and Mathematics Fair

http://134.121.112.29/fair_95/gym/index.elem.html

Virtual Science and Mathematics Fair, organized by the College of Education at Washington State University, presents abstracts and examples of award-winning science fair projects created by students in grades 2–6.

Weather Channel on the Web

<http://www.weather.com/>

Weather Channel on the Web, provided by the Weather Channel on cable television, features numerous resources for K–12 teachers. To find current conditions and five-day forecasts for more than 900 U.S. cities, click on Weather, and to find classroom activities, click on Cool Stuff.

Weather Dude

<http://www.nwlink.com/~wxdude/>

Weather Dude, prepared by Seattle's television weatherman Nick Walker, offers a catalog of many useful K–6 sites for the study of weather.

BEST COPY AVAILABLE

Weekly Science News Hotlist

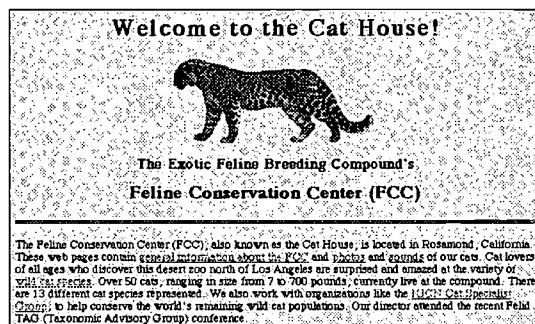

<http://sln.fi.edu/tfi/hotlists/sciencenews.html>

Weekly Science News Hotlist, from the Franklin Institute, contains nearly two dozen links to sites that contain the latest science and technology news for students in grades 7–12. Click on Science Daily to read the article *Rice Healthier Than Wheat Diet?* or scroll and click on Sky & Telescope's Weekly News Bulletin to learn about the return of the comet Hyakutake.

Welcome to the Cat House

<http://www.cathouse-fcc.org/welcome.html>

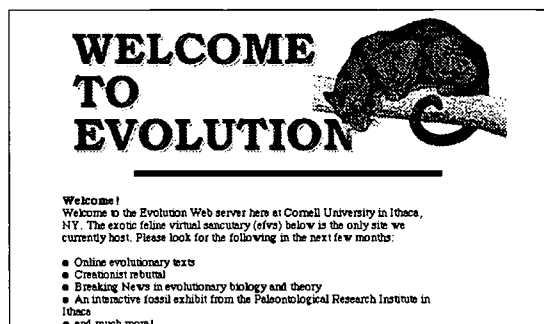

Welcome to the Cat House, founded by the Feline Conservation Center in Rosamond, California, contains more than 50 photos and sounds of wild cats. The site is appropriate for students in grades K–12.

Welcome to Evolution

<http://evolution.bio.cornell.edu/>

Welcome to Evolution contains a large and varied photo collection of wild cats. To find these photos, scroll and click on Visit the Exotic Feline Virtual Sanctuary.

BEST COPY AVAILABLE

Welcome to the 1996 Earth Day Groceries Project

<http://www.halcyon.com/arborhts/earthday.html>

Welcome to the 1996 Earth Day Groceries Project allows thousands of elementary school students to decorate grocery bags and join together to celebrate Earth Day. Click on the FAQ to find out how classes can participate in this environmental-awareness project.

Welcome to the Planets

<http://stardust.jpl.nasa.gov/planets/>

Welcome to the Planets, from the Jet Propulsion Laboratory of the California Institute of Technology, offers students in grades 4–12 a guided tour of the solar system's planets, asteroids, and comets. The site includes images, facts, and figures.

Welcome to the Planetary Society

<http://wea.Mankato.MN.US:80/tps/>

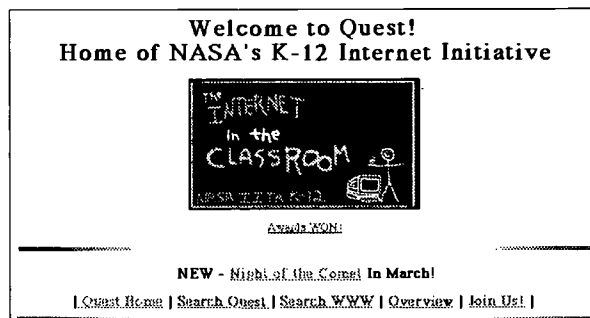

Welcome to the Planetary Society contains several astronomy and space sites of interest to K–12 teachers and kids. To find some of these resources, scroll and click on The Great Space Place and Kids Warp.

Welcome to Quest: Home of NASA's K-12 Internet Initiative

<http://quest.arc.nasa.gov/>

Welcome to Quest: Home of NASA's K-12 Internet Initiative provides support and services to schools, teachers, and students in utilizing the Internet as a basic learning tool. Scroll and click on (IITA) for science education resources, including study guides. Click on K-12 Internet Initiative Projects for an extensive list from the various NASA centers, including K-12 classroom activities. Click on Online Interactive Projects and Grant Information for additional resources and funding information.

Welcome to WhaleNet

<http://whale.simmons.edu/>

Welcome to WhaleNet, suitable for grades K-12, contains a compendium of resources about whales and other marine mammals. Scroll and click on Educational Resources and WhaleNet Start-Up Activities, and on Internet Marine Mammal Resource, for useful classroom materials and resources.

WhaleTimes

<http://www.whaletimes.org/>

WhaleTimes is an online ocean adventure where students in grades K–12 can learn about whales, seals, sharks, and penguins.

What to Do If You Are Attacked by a Sea Creature

<http://www.woodwind.com/mtlake/CyberKids/Issue4/Issue4TOC.html>

What to Do If You Are Attacked by a Sea Creature is an online article from the electronic magazine *CyberKids*. It contains links to information about sea creatures and an interactive touch tank in which kids in grades 3–8 try to recognize venomous fish.

Windows to the Universe

<http://windows.engin.umich.edu:80/>

Windows to the Universe, sponsored by NASA for grades 4–12, is an interactive presentation of earth and space sciences. The site contains numerous resources that students can explore.

Wolves on the Web

<http://www.scs.unr.edu/~timb/desertm.html>

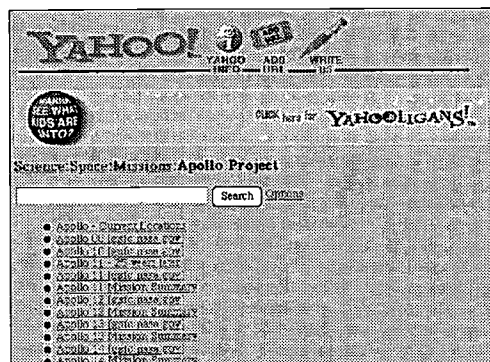

Wolves on the Web contains resources related to wolves and the preservation of our wildlife environment. Scroll down the page and click on List of Wolf and Wolf-Related Web Sites for classroom materials and projects suitable for grades K–12.

Yahoo's Apollo Index

http://www.yahoo.com/Science/Space/Missions/Apollo_Project/

Yahoo's Apollo Index contains pictures and information for all 17 Apollo missions. The site is appropriate for students in grades 6–12.

Yahoo Weather

<http://www.wni.com/yahoo/>

Yahoo Weather lets users find the five-day weather forecast for many cities around the world by entering the name of the city or its airport code. It is appropriate for students in grades 4–12.

ZooNet

<http://www.mindspring.com/~zoonet/>

ZooNet, for students in grades K–12, is dedicated to animal conservation. The site provides links to animal pages, animal pictures, zoo pages, and information on endangered species at zoos.

BEST COPY AVAILABLE

Exploratorium

<http://www.exploratorium.edu/>

Exploratorium provides a collection of online interactive exhibits and resources for teachers and students in grades K–12. To visit the exhibits, select The Learning Studio and click on Online Exhibits.

Field Museum

<http://www.bvis.uic.edu:80/museum/>

Field Museum, appropriate for grades K–8, provides a collection of online exhibits about dinosaurs. Click on Exhibits to find Life Over Time, which includes links to Life Before Dinosaurs, Dinosaurs, and Teeth, Tusks, and Tarpits.

4-H Farm at the University of California, Irvine

<http://www.ics.uci.edu/~pazzani/4H/InfoDirtRoad.html>

4-H Farm at the University of California, Irvine, teaches young children how to feed and care for animals. The site provides an online farm where kids can see and hear farm animals.

Franklin Institute Science Museum

<http://sln.fi.edu/>

Franklin Institute Science Museum offers a wide variety of online exhibits, educational activities, and resources for grades K–12. Find out what's new at the institute by reading *inQuiry Almanack*, its monthly online magazine for "inQuiring" minds.

Hands-On Science Centers Worldwide

<http://www.cs.cmu.edu/~mwm/sci.html>

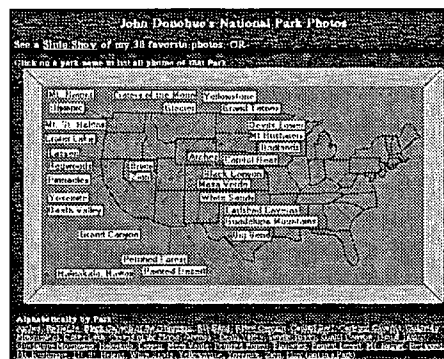

Hands-On Science Centers Worldwide is a collection of interactive public science museums from five continents. The site is appropriate for students in grades K–12.

BEST COPY AVAILABLE

John Donohue's National Park Photos

<http://anansi.panix.com:80/~wizjd/cgi-bin/getphoto.cgi>

John Donohue's National Park Photos, for grades K–12, is a collection of photos of America's favorite national parks. Click on Slide Show to view 30 of Donohue's favorite photos. To find links to additional resources, scroll to Other Park and Great Outdoors Pages and click on U.S. National Park Service and LL Bean's Park Search.

Museum of Science and Industry

<http://www.msichicago.org/>

Museum of Science and Industry offers online exhibits and educational resources. To find teachers' guides containing sample science lessons for grades 4–8, click on Education.

National Air and Space Museum

<http://www.nasm.edu/>

National Air and Space Museum, for grades K–12, features a collection of exhibits and online resources about aviation and space science.

Natural History Museum of Los Angeles County

<http://www.lam.mus.ca.us/lacmnh/>

Natural History Museum of Los Angeles County contains an impressive array of online exhibits. To find resources for grades K–12, click on Kid's Stuff. To find other Internet museums, scroll to Other Places to Visit on the Web and click on Guide to Museums and Cultural Resources.

New Mexico Museum of Natural History and Science

<http://www.aps.edu/HTMLPages/NMMNH.html>

New Mexico Museum of Natural History and Science contains a wide variety of resources for students in grades K–12. Click on Surfing the Net to find links to other online museums. To find the online exhibit Dinosaurs in the Museum, scroll and click on Dinosaurs and Other Exhibits, which features science classroom activities.

Niagara Falls Page

<http://www.moran.com/falls/nfhome.html>

Niagara Falls Page presents online movies of spectacular Niagara Falls.

BEST COPY AVAILABLE

Ocean Planet

http://seawifs.gsfc.nasa.gov/ocean_planet.html

Ocean Planet, from the Smithsonian Institution's Natural History Museum, provides hundreds of exhibits and resources for the study of oceanography in grades 5–12. Click on Educational Materials to find topics such as Teacher Materials, Fact Sheets, Family Activities, Children's Books, Film Guides, Theatre Scripts, and CD-ROMs.

Science Learning Network

<http://www.sln.org/>

Science Learning Network (SLN) is an online collaboration providing hands-on science activities for K–8 students. Click on Explore Our Resources for interactive exhibits, including Cow's Eye and Bob Miller's Light Walk. Using a form at the bottom of the page, you can also search for science activities by grade level or topic.

BEST COPY AVAILABLE

Smithsonian Gem & Mineral Collection

<http://galaxy.einet.net/images/gems/gems-icons.html>

Smithsonian Gem & Mineral Collection, for use in grades K–12, contains pictures of gems and minerals.

To Fly Is Everything

<http://hawaii.cogsci.uiuc.edu/invent/airplanes.html>

To Fly Is Everything is a virtual museum describing in detail the invention of the airplane. The site, for grades 5–12, contains almost 500 photos, original articles written by the Wright brothers, and other supporting material.

Welcome to the University of California Museum of Paleontology

<http://ucmp1.berkeley.edu/>

Welcome to the the University of California Museum of Paleontology (UCMP), for grades 8–12, contains online exhibits about paleontology and related fields. Click on On-Line Exhibits to find information and pictures related to dinosaurs, phylogeny, geology, and evolution. Click on The Subway to explore related Web sites, particularly science and museum sites.

Yahoo Science Museums and Exhibits

http://www.yahoo.com/Science/Museums_and_Exhibits/

Yahoo Science Museums and Exhibits is a directory of online science museums and exhibits, including aquariums and zoos.

Zoary

<http://www.poly.edu/~duane/zoo.html>

Zoary is an online interactive zoo for grades K–6. It includes animal photos, a quiz, and classroom lessons and activities.

Social Studies

Big Sky Social Studies Gopher Menu

gopher://bvsd.k12.co.us:70/11/Educational_Resources/Lesson_Plans/Big%20Sky/social_studies

Big Sky Social Studies Gopher Menu presents K–12 social studies lesson plans. It includes a large collection for teaching a variety of subjects, including American history, geography, economics, and government.

Celebrating Our Nation's Diversity

<http://www.census.gov/ftp/pub/edu/diversity/>

Celebrating Our Nation's Diversity, from the U.S. Census Bureau, offers a series of lesson plans focusing on the theme of diversity. Lesson plans for all grade levels are accompanied by pupil worksheets and handouts.

Center for Civic Education Lesson Plans

<http://www.primenet.com/~cce/lesson-plans.html>

Center for Civic Education Lesson Plans provides sample lessons for upper elementary, middle school, and high school students. The plans can be used in U.S. history and government classes for teaching about the Constitutional Period.

BEST COPY AVAILABLE

Chinese Historical and Cultural Project

<http://ericir.syr.edu/Projects/CHCP/>

Chinese Historical and Cultural Project (CHCP) brings cultural diversity into the classroom by providing three sample lesson plans from its Golden Legacy Curriculum. The plans, designed for grades 3–5, include Bound Feet, Abacus, and Lunar Calendar.

CNN Lesson Plans and Multimedia Resources

<http://www.nmis.org/NewsInteractive/CNN/Newsroom/contents.html>

CNN Lesson Plans and Multimedia Resources presents lesson plans for use with CNN's TV Newsroom Program. You can videotape the program while you sleep (1:30 a.m.–2 a.m., Monday-Friday). The show usually presents five or six brief news stories with no commercials.

C-Span Lesson Plans

<http://www.c-span.org/classroom/lessons.html>

C-Span Lesson Plans provides weekly lesson plans for C-Span broadcasts.

Curriculum of U.S. Labor History for Teachers

<http://www.kentlaw.edu/ilhs/labor-1.htm>

Curriculum of U.S. Labor History for Teachers, sponsored by the Illinois Labor History Society, features 13 lesson plans that integrate labor history into the U.S. history curriculum from the Colonial period to the present.

Distinguished Women of Past and Present

<http://www.netsrq.com/~dbois/>

Distinguished Women of Past and Present presents brief biographies of famous women from a variety of fields.

EcEdWeb

<http://ecedweb.unomaha.edu/teach.htm>

EcEdWeb provides lesson plans and curriculum materials from the Economic Education Web site. The site's goal is to provide support for economics education from kindergarten through the college level. Teacher's guides, lesson plans, and activities are featured.

ERIC Social Studies Gopher Menu

gopher://ericir.syr.edu:70/11/Lesson/Subject/SocialStudies

ERIC Social Studies Gopher Menu provides more than 100 teacher-contributed social studies lesson plans for grades K–12. Each lesson plan includes an overview, purpose, objectives, activities, and resource materials.

National Clearinghouse for U.S.–Japan Studies

<http://www.indiana.edu/~japan/>

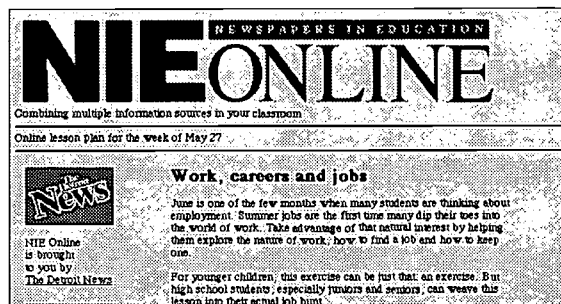

National Clearinghouse for U.S.–Japan Studies offers a series of lesson plans for the K–12 curriculum. Scroll down, click on K–12 Lessons on Japan, and then select the Browse button to see all the plans. Be sure to visit Treasures 3: Stories & Artwork From Students in Japan & Oregon, and the Virtual Japan Kit.

NIE Online: Newspapers in Education

<http://detnews.com/nie/index.html>

NIE Online: Newspapers in Education, sponsored by the *Detroit News*, provides links to Daily Lesson Plans and an Index of Weekly Lesson Plans for teaching current events in grades 7–12.

Social Science Resources Home Page

<http://nde4.nde.state.ne.us/SS/ss.html>

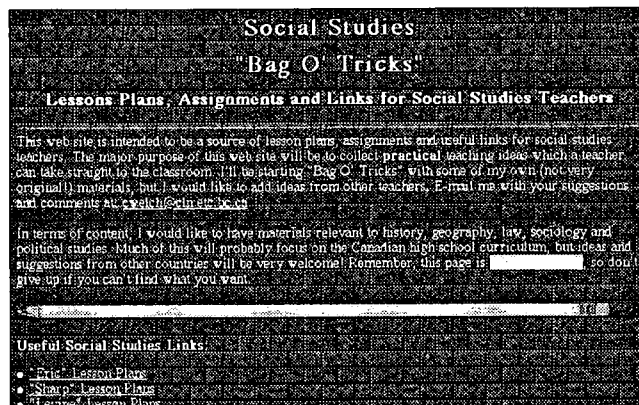

Social Science Resources Home Page, sponsored by the Nebraska Department of Education, provides teachers with a range of useful materials and references. Scroll to March 18–22, 1996, to find links to K–12 Lesson Plans written by Nebraska teachers for a variety of social studies themes.

Social Studies "Bag O' Tricks"

<http://142.28.12.69/Schools/SSS/socials/homepage.htm>

Social Studies "Bag O' Tricks," maintained by Colin Welch, features lesson plans, assignments, and useful links for social studies teachers. To find lesson plans about law-related education for the elementary school, middle school, and high school levels, as well as information about mock trial competition, click on Mock Trials. To find role-playing and other activities, including a Napoleon mock trial, scroll to "Bag o' Tricks" Resources.

Social Studies Mini-Lessons, Elementary (K-5)

http://www.nptn.org/cyber.serv/AOneP/academy_one/teacher/cec/cecsst/sst-elem.html

Social Studies Mini-Lessons, Elementary (K-5), from Academy One, offers 50 lesson plans covering various social studies topics at the elementary school level.

Social Studies Mini-Lessons, Intermediate (6-8)

http://www.nptn.org/cyber.serv/AOneP/academy_one/teacher/cec/cecsst/sst-interm.html

Social Studies Mini-Lessons, Intermediate (6-8), from Academy One, offers 80 lesson plans covering various social studies topics at the middle school level.

Social Studies Mini-Lessons, High School (9-12)

http://www.nptn.org/cyber.serv/AOneP/academy_one/teacher/cec/cecsst/sst-high.html

Social Studies Mini-Lessons, High School (9-12), from Academy One, offers 94 lesson plans covering various social studies topics at the high school level.

South Carolina ETV's Learning Link

<http://www.state.sc.us/scetv/welcome.html>

South Carolina ETV's Learning Link has created a forum on the Holocaust. It provides teachers of students in grades 7–12 with access to a variety of resources for teaching about this tragic chapter from human history. To find 11 lesson plans, 34 student handouts, two series of taped interviews, a bibliography, and related sites to other curriculum resources, click on South Carolina: Lessons From the Holocaust.

Teacher Talk

<http://education.indiana.edu/cas/tt/tthmpg.html>

Teacher Talk, published by Indiana University, is an electronic journal that includes lesson plans for secondary school teachers. Click on Topics and scroll until you reach Great Ideas: Teacher-Tested Unit and Lesson Plans. There you will find a collection of lesson plans focusing on the needs of adolescents.

What Do Maps Show?

<http://info.er.usgs.gov/education/teacher/what-do-maps-show/index.html>

What Do Maps Show? is a site that offers lesson plans for four geography and map-reading lessons suitable for upper elementary and junior high school levels. Each lesson contains step-by-step procedures, hands-on student activity sheets, and reproducible maps. There is also a List of Materials, which contains maps useful for teaching geography.

Abraham Lincoln's Assassination

<http://www.netcom.com/~rnorton1/Lincoln.html>

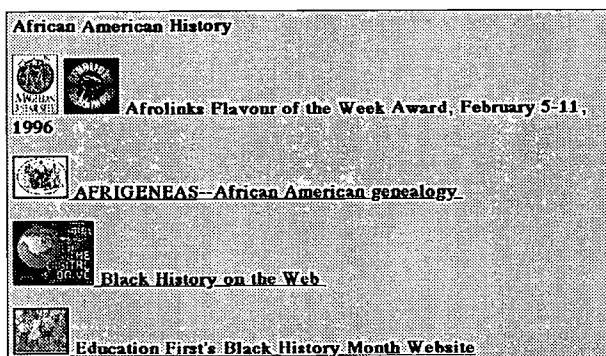

Abraham Lincoln's Assassination, a site organized by a U.S. history teacher, is appropriate for students in grades 6–12. The site features links to Ford's Theatre, the Mary Surratt House Museum, reproductions of newspapers reporting the assassination of Lincoln in 1865, Dr. Mudd, the life of John Wilkes Booth, and other interesting facts about Lincoln's assassination.

African American History

<http://www.msstate.edu/Archives/History/USA/Afro-Amer/afro.html>

African American History is a site with links to museums, newspapers, events, and people in black history, as well as numerous related links that celebrate the African American experience.

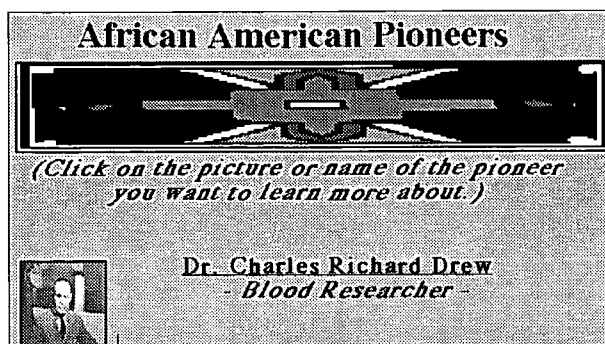

BEST COPY AVAILABLE

African American Pioneers

<http://www.localnet.com/~adonis/pioall.htm>

African American Pioneers allows students to select the pictures or names of important African Americans and learn more about their contributions to our lives.

Alexander the Great

<http://wso.williams.edu/~junterek/>

Alexander the Great is a source of pictures and text about the life of Alexander the Great. It offers other related links.

American Civil War Home Page

<http://funnelweb.utcc.utk.edu/~hoemann/cwarhp.html>

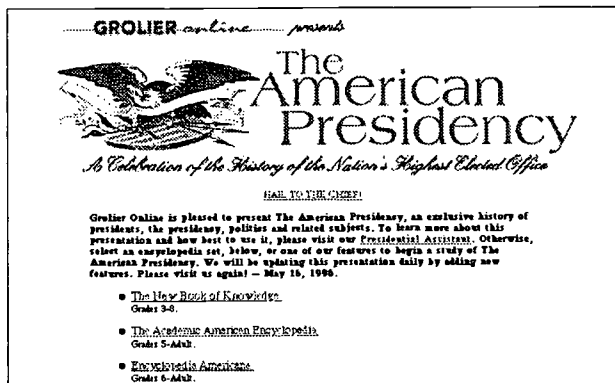

American Civil War Home Page contains general resources, graphic images, letters, diaries, and links to other reference sites.

American Presidency (Grolier Online)

<http://www.grolier.com/presidents/preshome.html>

American Presidency (Grolier Online) presents an exclusive history of presidents, the presidency, politics, and related subjects. The site includes encyclopedias, sound bytes, flip cards, and presidential quizzes. It is suitable for grades 6–12.

American President

<http://AmericanPresident.com/home.html>

American President allows students to explore the White House, cast their votes in an online poll, participate in a virtual press conference, fill in a crossword puzzle, and take a Constitution quiz.

American Thanksgiving on the Internet

<http://www.night.net/thanksgiving/>

American Thanksgiving on the Internet, a site devoted to the Thanksgiving holiday, has links for teachers, kids, and families. Users can take a virtual tour, view Colonial pictures, complete a word search puzzle, sing a song, read a poem, and print out a lesson plan.

BEST COPY AVAILABLE

Ancient Egypt: Digital Mummies

<http://www.desk.nl/~pdenijs/>

Ancient Egypt: Digital Mummies presents photo re-creations of famous Egyptian pharaohs. The photos are based on the pharaoh's mummies. The site includes a link where students can create their own ideal mummy.

Ancient World Web: Meta Index

<http://atlantic.evsc.virginia.edu/julia/AW/meta.html>

Ancient World Web: Meta Index is a comprehensive collection of links to a variety of sites dealing with the ancient world. The articles, photographs, virtual tours, and primary source materials found here offer the teacher rich resources for teaching the contributions of the ancient peoples of Africa, Asia, Europe, and the Americas to world history.

Biography Library

<http://www.autobaun.com/~kbshaw/Biographies/BioLibrary.html>

Biography Library, provided by *SPECTRUM—The Family Internet Magazine*, contains nearly 20 biographical sketches and related visuals of famous people in American and world history. The site includes papers and articles by professionals and experts in the field, products and services (books, audiotapes, videos, seminars, and workshops), and links to other Web sites with information on attention deficit disorder.

Pitsco Technology Education Web Site

<http://www.pitsco.com/wel.html>

Pitsco Technology Education Web Site provides information on technology for individuals with disabilities, mailing lists, and discussion groups, as well as links to a wide range of sites offering disability-related topics of interest to teachers and parents.

Pre-College National Mission Programs

<http://www.gallaudet.edu:80/~precpweb/>

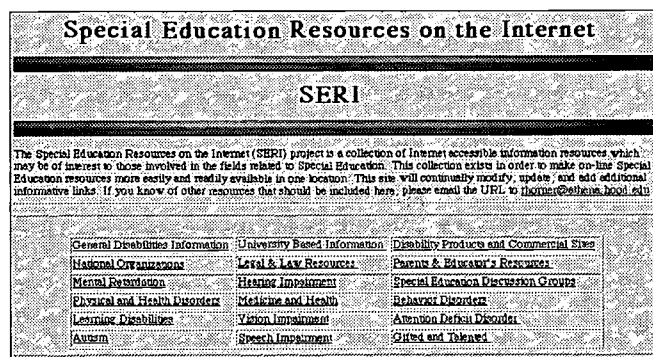

Pre-College National Mission Programs, a division of Gallaudet University, serves hearing-impaired students from preschool through high school. Click on Kendall Demonstration Elementary School (KDES); Model Secondary School for the Deaf (MSSD); Center for Curriculum Development, Research, and Evaluation (CCDRE); and Outreach Services to find innovative curriculum materials and instructional services. The site also includes links to Gallaudet University's Home Page and other resources related to deafness.

Special Education Resources on the Internet

<http://www.hood.edu/seri/serihome.htm>

Special Education Resources on the Internet (SERI) is a collection of Internet-accessible information resources that will be of interest to those involved in special education. There are links to topics, including General Disabilities Information, Disability Products and Commercial Sites, National Organizations, Legal and Law Resources, Parents and Educator's Resources, and Special Education Discussion Groups.

Special Needs Ed Network

<http://schoolnet2.carleton.ca/~kwellar/>

Special Needs Ed Network (SNE) endeavors to maintain a comprehensive and current Web directory of resources relating to special education. Click on Web Resources for a directory of links to specific disability topics, including dyslexia, attention deficit disorder, Down syndrome, and gifted education. Click on School Resources to find special needs information and resources available from K-12 schools.

Toy Catalog Listing for Children With Special Needs

<http://www.nas.com/downsyn/toy.html>

Toy Catalog Listing for Children With Special Needs provides a list of toy resources and toy catalogs (addresses and phone numbers) that either contain adapted toys or toys whose designs transfer easily to the play needs of children with special needs.

Vocational/ Technical Education

Computer Skills Lesson Plans

<http://www.dpi.state.nc.us/Curriculum/Computer.skills/lssnplns/CompCurr.LP.html>

Computer Skills Lesson Plans, provided by the North Carolina Department of Public Instruction, features a series of lesson plans to help North Carolina teachers implement the state's computer-skills curriculum. There is at least one lesson for each measure in the computer skills curriculum, as well as links to other curriculum areas.

Public Schools of North Carolina
North Carolina Department of Public Instruction

America's Job Bank

<http://www.ajb.dni.us>

America's Job Bank links 1,800 state employment offices across the country and lists 250,000 jobs.

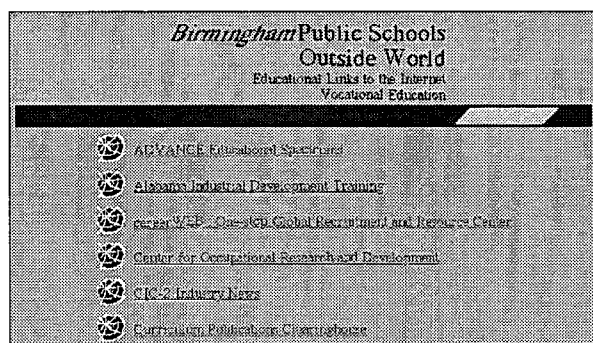

Birmingham Public Schools Outside World: Educational Links to the Internet—Vocational Education

<http://www.the-matrix.com/bps/outside/vocat.html>

Birmingham Public Schools Outside World: Educational Links to the Internet—

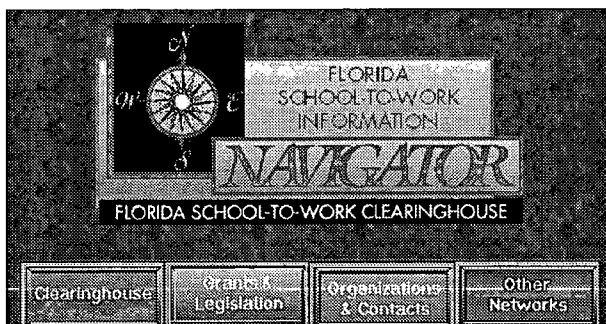

Vocational Education provides vocational education teachers and students with links to a variety of relevant information, including school-to-work opportunities, outreach projects, training and development Web sites, employment and job opportunities, and curriculum publications.

Florida School-to-Work Information Navigator

<http://www.fsu.edu/~flstwtp/fl-stwtp.html>

Florida School-to-Work Information Navigator provides a variety of school-to-work resources. You can find links to grants and legislation, organizations and contacts, and work/labor employment. You can also subscribe to a mailing list.

International Technology Education Association

<http://www.tmn.com/Organizations/Iris/ITEA.html>

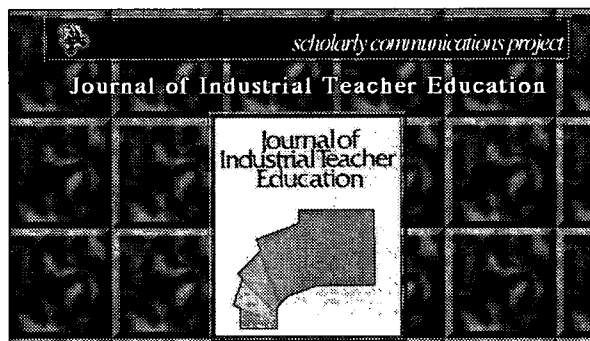

International Technology Education Association (ITEA) contains a variety of information on technology education, including links to several states' technology Web sites. Click on K-12 Programs for links to elementary schools, middle schools, and high schools that have technology education home pages.

Journal of Industrial Teacher Education

<http://scholar.lib.vt.edu/ejournals/JITE/jite.html>

Journal of Industrial Teacher Education is an online journal for vocational education teachers.

National Center for Research in Vocational Education

<http://vocserve.berkeley.edu/>

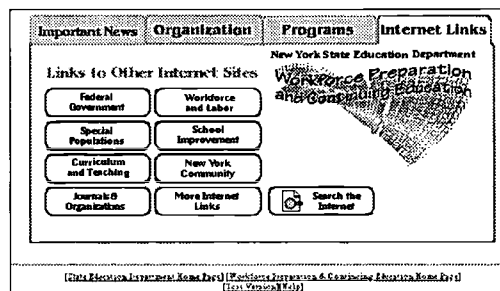

National Center for Research in Vocational Education (NCRVE), from the University of California, Berkeley, is the nation's largest center for research and development in work-related education. The site provides links to NCRVE publications, newsletters, and digests, as well as other vocational education resources of interest to teachers and students.

New York State Education Department—Office of Workforce Preparation and Continuing Education

<http://www.nysed.gov/workforce/tabwork4.html>

New York State Education Department—Office of Workforce Preparation and Continuing Education provides vocational and technology education teachers with links to resources including Curriculum and Teaching, School Improvement, and Journals and Organizations.

Occupational Outlook Handbook

<http://www.espan.com/docs/oohand.html>

Occupational Outlook Handbook can be read online by teachers and students interested in vocational education. Among its topics are career preparation and training. It also includes a section on tomorrow's jobs.

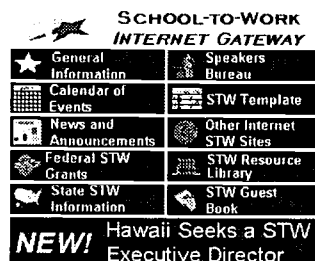

School-to-Work Internet Gateway

<http://www.stw.ed.gov/>

School-to-Work (STW) Internet Gateway site contains current STW publications, resource bulletins, resource and research material, media announcements, and information on school-to-work practices across the country.

Welcome to the School-to-Work Internet Gateway. This Gateway is designed to promote awareness of the School-to-Work Initiative, increase communication between the Federal- and State-level sponsors and the national community. This site contains current STW publications, Resource Bulletin, resource and research material, media announcements and information on School-to-Work practices across the country.

Technology Student Association

<http://www.tmn.com/Organizations/Iris/tsawww/tsa.html>

Technology Student Association (TSA) is an organization for elementary school, middle school, and high school students interested in technology education. Click on TSA K-12 Program, where you will find a set of programs and activities for students. You can select from among Elementary School Program, Middle School Program, and High School Program. The site also includes links to State Associations and Web Sites of Interest.

Appendix I

Newsgroups (USENET) and Mailing Lists (Listserv)

EdWeb

<http://k12.cnidr.org:90/>

EdWeb offers a collection of the best online educational resources available for K-12 students. These resources include newsgroups (public messages posted for everyone to see), listserv discussion groups (they are like private newsletters; you subscribe to a topic, then receive the latest news and views via e-mail) and electronic journals. To get to these groups, you click on Home Room at the bottom of the page, then scroll down and click on Educational Resource Guide.

When you reach the EdWeb K-12 Resource Guide, click on USENET News Group for lists of more than three dozen newsgroups for teachers and kids. The newsgroups focus on every subject in the K-12 curriculum, including art, business education, health and physical education, math, music, social studies, and many others. You can read what other teachers think and, if you wish, write messages of your own. Or click on Listserv Discussion Groups and E-Journals to find a long list of education-centered private newsletters (mailing lists) to which you can subscribe. There is a mailing list for just about every topic of interest to K-12 educators.

Explore on-line K-12 education with scores of WWW sites, discussion groups, commercial subscription services, and more. It's a great place for educators looking for key sites on the Internet.

Exploring Technology
and School Reform
by Andy Carvin

© Graphics Only. Copyright 1996. Corporation for Public Broadcasting. All rights reserved.

Latest Revision: March 3, 1996

Named by NetGuide Magazine as One of the 50 Best Places to Go Online!
 (and a recent Cool Site of the Day as well)

WELCOME TO EdWEB, written and maintained by Andy Carvin. The purpose of this hyperbook is to explore the worlds of educational reform and information technology. With EdWeb, you can hunt down on-line educational resources around the world, learn about trends in education policy and information infrastructure development, examine success stories of computers in the classroom, and much, much more. EdWeb is a dynamic work-in-progress, and numerous changes and additions occur on a regular basis.

To begin, please enter the EdWeb Home Room.

Special thanks to The Corporation for Public Broadcasting
 and The Center for Networked Information Discovery and Retrieval
 for helping make EdWeb possible

EdWeb - Exploring Technology and School Reform by Andy Carvin. All rights reserved.

Appendix 2

Search Tools

All-in-One Search Page

<http://www.albany.net/allinone/>

All-in-One Search Page features a compilation of various search tools to help you find things on the Internet. For example, scroll down the page and click on World Wide Web. There, you will find Alta Vista Web Search, InfoSeek, Lycos, WebCrawler, Yahoo, and other search tools. Just enter keywords, and your search of the Web begins. If you want to find tools to search for someone's e-mail address, return to the Home Page and click on People. If you are interested in software, click on Software to search for useful programs you can download. If you want to find USENET Newsgroups, click on General Internet.

Compiled List of Some of the Best Search Engines

<http://infoshare1.princeton.edu:2003/vlib/engines3.html>

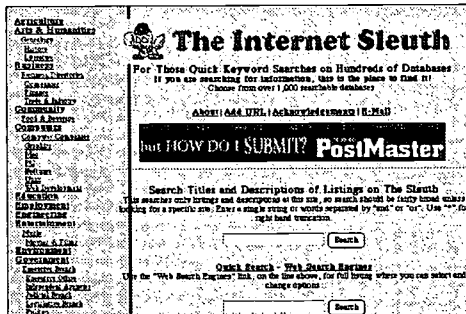

Compiled List of Some of the Best Search Engines lives up to its name by having some outstanding search engines. The user chooses a search engine from the list and submits queries one at a time. Available search engines include Alta Vista, InfoSeek, Lycos, Open Text Web, Yahoo, and WebCrawler.

Internet Sleuth

<http://www.intbc.com/sleuth/>

Internet Sleuth provides you with quick keyword searches of more than 1,000 searchable databases on the Internet. Enter a keyword in Lycos, InfoSeek, Alta Vista, Yahoo, or DejaNews to find lists of Internet sites that may contain the requested information. You can also search the Internet Sleuth by category, for example, Education, Math, or Science.

Appendix 3

Evaluation Forms

Educational Web Sites Recommended by Others

Use this form to record and supplement information on educational Web sites described in this book or recommended to you by others. The form allows you to collect Web site information that is more detailed than the information you may have originally been given, and can be used to evaluate the site's usefulness in terms of your own particular needs.

Site Name: _____ Site Address/URL: _____

Brief Description: _____

This site was recommended by: _____

For: _____

I could use this site for the following:

- ☐ Reference source for my students (appropriate reading level and content)
- ☐ Source of up-to-date data for analysis by my students
- ☐ Source of project(s) for my classes to join
- ☐ Source of connections to other projects at other sites
- ☐ Question/answer site where students can have their questions answered
- ☐ Ask-an-Expert sessions (special sessions to interact with a writer or other expert)
- ☐ Interactive sessions (students interact with the site's learning activity while online)
- ☐ Reference for myself (content for my subject area, lesson plans, etc.)
- ☐ Newsgroup site where I can share and get information
- ☐ Professional information site (educational research or other relevant material)
- ☐ Other: _____

Educational Setting—Mark all that apply: K 1 2 3 4 5 6 7 8 9 10 11 12 T

- ☐ Individual students
- ☐ Downloadable content
- ☐ Completely interactive
- ☐ Student groups
- ☐ Interactive time necessary

Subject Areas—Check all that apply:

- ☐ Language Arts
- ☐ Social Studies
- ☐ Science
- ☐ Mathematics
- ☐ Arts
- ☐ Foreign Language
- ☐ Careers
- ☐ Business
- ☐ Cross-Curricular

Rate the site performance for each criteria listed.

	Exemplary	Adequate	Unacceptable
Content			
Does the content meet my needs?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Educational Value			
Can students collaborate with other sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Can teachers share results?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the site respond to student questions?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Technical Quality			
Is the site easy for my students to navigate?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Overall Rating	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Educational Web Sites You Discover

Use this form to record complete information on educational Web sites you discover as you explore the World Wide Web. The information can be used to help you evaluate the site's usefulness in terms of your own particular needs.

Site Name: _____ Site Address/URL: _____

Brief Description: _____

Approximate time necessary to access and download desired information: _____

Check all the categories that describe the site:

- | | | |
|--|--|---|
| <input type="checkbox"/> Student Reference | <input type="checkbox"/> Question/Answer | <input type="checkbox"/> Newsgroup |
| <input type="checkbox"/> Data Source | <input type="checkbox"/> Access to an Expert | <input type="checkbox"/> Professional Information |
| <input type="checkbox"/> Student Projects | <input type="checkbox"/> Interactive | <input type="checkbox"/> Other _____ |
| <input type="checkbox"/> Connections to Other Projects | <input type="checkbox"/> Teacher Reference | |

Educational Setting—Mark all that apply: K 1 2 3 4 5 6 7 8 9 10 11 12 T

- | | | |
|--|---|---|
| <input type="checkbox"/> Individual students | <input type="checkbox"/> Downloadable content | <input type="checkbox"/> Completely interactive |
| <input type="checkbox"/> Student groups | <input type="checkbox"/> Interactive time necessary | |

Subject Areas—Check all that apply:

- | | | |
|--|---|---|
| <input type="checkbox"/> Language Arts | <input type="checkbox"/> Social Studies | <input type="checkbox"/> Science |
| <input type="checkbox"/> Mathematics | <input type="checkbox"/> Arts | <input type="checkbox"/> Foreign Language |
| <input type="checkbox"/> Careers | <input type="checkbox"/> Business | <input type="checkbox"/> Cross-Curricular |

Rate the site performance for each criterion listed.

	Exemplary	Adequate	Unacceptable
Content			
1. Is it correct, accurate?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Is it from an authoritative source?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Is it free from stereotypes and bias?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Is this the best medium for this information?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Do the images enhance the content?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Educational Value			
1. Is the information useful?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Is the information readable by students?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Is the information available elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Can students collaborate with other sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Can teachers share results?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Does the site respond to student questions?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Technical Quality			
1. Does the site work the way it is intended to work?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Are all the links current?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Is the home page concise and quick to view?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Are lengthy pictures files saved for later pages?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Is the menu clear, informative, and current?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Is the navigation for the site obvious?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Overall Rating	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

ISTE BRINGS THE WORLD OF TECHNOLOGY CLOSER TO YOU.

By drawing from the resources of committed professionals worldwide, ISTE provides support that helps educators like yourself prepare for the future of education.

ISTE members benefit from a wide variety of publications, the activities of our USA National Office, and our work with Teacher Accreditation.

They also enjoy exciting conferences, global peer networking, and graduate-level Distance Education courses.

So if you're interested in the education of tomorrow, call us today at 800/336-5191.
